Kenogaming Property

A program of mechanical overburden stripping and sampling was conducted on the Kenogaming property in the fall of 2004 and the spring of 2005 on mining claims 3014975 and 3014976 recorded in the name of CANADIAN ARROW MINES LTD. The property is located approximately 75 km southwest of the City of Timmins in the Township of Kenogaming in the Porcupine Mining Division.

Access to the property is gained by travelling west on highway 101 from the City of Timmins then turning south on the Penhorwood/ Kenogaming road. Travel south approximately 7 km to a junction and make a turn left and travel to a point just past the km 8 marker then turn right and travel south approximately 2 km to the site.

The purpose of the work was to expose a silica occurrence discovered by David Larche based on research and information obtained from government geology maps.

Mechanical stripping commenced November 5th, 2004 over a period of two weeks to expose primary areas of interest. The equipment operator for this work was Marc Chiasson from South Porcupine and Steve Bureau from Timmins worked the pressure pump.

Followup work was conducted in the spring consisting of mechanical stripping and percussion drilling. Eight dust samples were collected for analysis and sent to Accurassay in Thunder Bay, Ontario. The sampling was a composite of 25 holes, 25 to thirty feet deep. Assays returned values of 77.76 % to 93.83 % SiO₂ with an average of 84.74 %. Three distinct grades were identified and are shown on the enclosed map titled Lown Lake Quarry. "A" grade SiO₂ is above 90%, "B" grade SiO₂ is below 90% and above 77.7%. "C" grade is below 77.7% and categorized as waste.

The sampling program consisted of a grid pattern 12'x12' with hole depths a minimum of 25 feet. The sampling occurred on a stripped area on mining claim 3014976 just west of the access road.

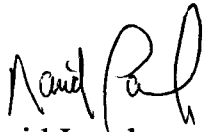

Kenogaming Project Work

Nov. 5, 2004- mobilized equipment to site, started stripping.

Nov. 6- 24- overburden stripping and washing to expose primary areas of interest.

April 20-28, 2005 – mechanical stripping (54 hours excavator)

April 25-27, 2005- percussion drilling and sampling

A handwritten signature in black ink, appearing to read "David Larche". The signature is stylized and cursive.

David Larche
