

**SUMMARY REPORT**  
**PIPESTONE RECONNAISSANCE ASSAYS**  
**BROOKS and DASH LAKES AREAS**  
**DISTRICT OF KENORA**

**WESTERN WARRIOR RESOURCES INC.**

**MARCH 2007**

## **INTRODUCTION**

An evaluation of the gold potential was undertaken in the Brooks and Dash Lake areas. Widespread areas of hydrothermal alteration associated with the Phinney-Dash Lakes felsic complex and the Pipestone-Cameron Lake fault zone and were the focus of the reconnaissance assaying.

## **LOCATION AND ACCESS**

The project area is located in the Kenora Mining Division. The project area lies within NTS map sheets 52 C/13, 52 C/14, 52 F/4, 52 F/5 and 52 F/6 and is centered at 49°05'N 93°35'W. The area is accessible by the Brooks, Tri-Lake, Britton, Pipestone, Derby, and Phinney Creek road system that begins 5 kilometers north of Nestor Falls on Highway 71. Permits to use these roads are required and are available from the Ministry of Natural Resources in Kenora and Fort Francis.

## **CLAIM GROUP AND STATUS**

The property consists of 323 claims that contain an aggregate of 4327 claim units with an area of 69,232 hectares. The property lies within the Dash Lake, Dogpaw Lake, Brooks Lake, Rowan Lake, Bluffpoint Lake, Lawrence Lake, Kaiarskons Lake, Heronry Lake, Rainy Lake, Godson, Senn Potts, Fleming and Menary claim map areas.

## **WORK DONE**

Two hundred and fifty rocks samples covering a spectrum of mafic to felsic volcanic lithologies, alteration styles and mineralization types were collected by James H. Willis, Patrick M. Chute and Michael E. Chute between October and December 2006. Samples were submitted to SGS Canada Inc, Mineral Services in Red Lake. Samples were dried, crush to 75% passing 2mm screen, split to 250g and pulverized to 85% passing a 75 $\mu$  screen. Gold was determined by fire assaying a nominal weight 30g sample followed by an AAS finish. Assay certificates are attached.

## **REGIONAL GEOLOGY**

The project area lies within the Archean Kakagi-Rowan Lakes greenstone belt of the Wabigoon Subprovince. The project area is underlain by the Kakagi Lake Group, Katimiagamak Group, Brooks Lake Volcanics and the Phinney-Dash Lakes Complex. Known gold mineralization within the project area is typically associated with disseminated sulphides in zones of silicification within areas of intense iron carbonate alteration or areas of intense quartz-sericite-pyrite alteration associated with felsic volcanics of the Phinney-Dash Lakes Complex.

## **RESULTS**

Gold assay results range between the lower level detection limit of 10 ppb and a high assay of 2.88 grams/tonne. Seventy nine samples were less than the lower level detection limit. Thirty three samples were at the detection level of 0.01 grams/tonne. Twenty two samples returned values equal to or greater than 0.1 grams/tonne. Nine samples returned gold assays greater than 0.25 grams/tonne.

## **CONCLUSIONS AND RECOMMENDATIONS**

Assay results indicate that areas of anomalous gold values are present within the project area and warrant further reconnaissance sampling to define areas for detailed follow up sampling and prospecting. Gold is associated with extensive zones of disseminated pyrite, hydrothermal alteration and structural dislocation in the Dash Lake area. The alteration is interpreted to be a late stage volcanic feature of the development of the Phinney-Dash Lake complex. The spatial relationship between the distribution of the alteration and mineralization and structural features suggests that the structural features controlled the distribution of the alteration as they focused hydrothermal fluid flow.

The anomalous character of the gold values associated with the disseminated sulphides in the extensive areas of iron carbonated mafic volcanics and porphyries associated with the Pipestone-Cameron fault zone warrants continued exploration.

To identify the geographic extent of the known zones and identify additional zones a program of detailed geological mapping and systematic prospecting is recommended. This program should include detailed geologic mapping at 1:2400 on a cut grid with lines at 400 foot intervals. Areas underlain by disseminated sulphide zones should be gridded at 100 foot intervals.

## STATEMENT OF QUALIFICATIONS

I, Michael E. Chute, of the City of Kenora, Province of Ontario, declare that:

I graduated from the Nova Scotia Land Survey Institute with a Certificate in Photogrammetry in 1968.

I graduated from Acadia University with a Bachelor of Science in Geology in 1972.

I graduated from the University of Manitoba with a Master of Science degree in Geology in 1977.

I have practiced my profession since graduation.

I conducted/supervised the work described in this report.

I am the sole author of this report.

A handwritten signature in cursive script that reads "Michael E. Chute". The signature is written in dark ink and is positioned above the typed name and date.

Michael E. Chute, M.Sc.  
March 10, 2007

All orders are accepted and all reports and certificates are issued subject to the SGS General Conditions of Service for North America (copy available upon request or may be viewed at <http://www.sgs.com>) or as otherwise agreed upon. Any person, including the customer, using or relying on this certificate or report, agrees that the liability of the contracting SGS affiliate shall in no case exceed a total aggregate sum of the lesser of US \$20,000 or ten times the fee paid or payable for the service giving rise to the claim, but in no event in excess of the extent of the proven negligence of the contracting SGS affiliate. The results shown on this test or inspection report refer only to the sample(s) tested or inspected unless otherwise stated.

## Certificate of Analysis

Work Order: RL27008

To: **Western Warrior Resources Inc.**  
Attn: Western Warrior Resources Inc. Michael Chute  
922 Park Street  
Kenora, Ontario  
ONTARIO P9N 1B7

Date: Dec 15, 2006

P.O. No. : WESTERN WARRIORS (NWOD)  
Project No. :  
No. Of Samples 76  
Date Submitted Dec 05, 2006  
Report Comprises Pages 1 to 3  
(Inclusive of Cover Sheet)

Certified By :

Susan Isaac

Report Footer: L.N.R. = Listed not received I.S. = Insufficient Sample  
n.a. = Not applicable -- = No result  
\*INF = Composition of this sample makes detection impossible by this method  
M after a result denotes ppb to ppm conversion, % denotes ppm to % conversion

All orders are accepted and all reports and certificates are issued subject to the SGS General Conditions of Service for North America (copy available upon request or may be viewed at <http://www.sgs.com>) or as otherwise agreed upon. Any person, including the customer, using or relying on this certificate or report, agrees that the liability of the contracting SGS affiliate shall in no case exceed a total aggregate sum of the lesser of US \$20,000 or ten times the fee paid or payable for the service giving rise to the claim, but in no event in excess of the extent of the proven negligence of the contracting SGS affiliate. The results shown on this test or inspection report refer only to the sample(s) tested or inspected unless otherwise stated.

All orders are accepted and all reports and certificates are issued subject to the SGS General Conditions of Service for North America (copy available upon request or may be viewed at <http://www.sgs.com>) or as otherwise agreed upon. Any person, including the customer, using or relying on this certificate or report, agrees that the liability of the contracting SGS affiliate shall in no case exceed a total aggregate sum of the lesser of US \$20,000 or ten times the fee paid or payable for the service giving rise to the claim, but in no event in excess of the extent of the proven negligence of the contracting SGS affiliate. The results shown on this test or inspection report refer only to the sample(s) tested or inspected unless otherwise stated.

All orders are accepted and all reports and certificates are issued subject to the SGS General Conditions of Service for North America (copy available upon request or may be viewed at <http://www.sgs.com>) or as otherwise agreed upon. Any person, including the customer, using or relying on this certificate or report, agrees that the liability of the contracting SGS affiliate shall in no case exceed a total aggregate sum of the lesser of US \$20,000 or ten times the fee paid or payable for the service giving rise to the claim, but in no event in excess of the extent of the proven negligence of the contracting SGS affiliate. The results shown on this test or inspection report refer only to the sample(s) tested or inspected unless otherwise stated.

All orders are accepted and all reports and certificates are issued subject to the SGS General Conditions of Service for North America (copy available upon request or may be viewed at <http://www.sgs.com>) or as otherwise agreed upon. Any person, including the customer, using or relying on this certificate or report, agrees that the liability of the contracting SGS affiliate shall in no case exceed a total aggregate sum of the lesser of US \$20,000 or ten times the fee paid or payable for the service giving rise to the claim, but in no event in excess of the extent of the proven negligence of the contracting SGS affiliate. The results shown on this test or inspection report refer only to the sample(s) tested or inspected unless otherwise stated.

All orders are accepted and all reports and certificates are issued subject to the SGS General Conditions of Service for North America (copy available upon request or may be viewed at <http://www.sgs.com>) or as otherwise agreed upon. Any person, including the customer, using or relying on this certificate or report, agrees that the liability of the contracting SGS affiliate shall in no case exceed a total aggregate sum of the lesser of US \$20,000 or ten times the fee paid or payable for the service giving rise to the claim, but in no event in excess of the extent of the proven negligence of the contracting SGS affiliate. The results shown on this test or inspection report refer only to the sample(s) tested or inspected unless otherwise stated.

## Certificate of Analysis

Work Order: RL27314

To: **Western Warrior Resources Inc.**

Date: Jan 18, 2007

Attn: Western Warrior Resources Inc. Michael Chute  
922 Park Street  
Kenora, Ontario  
ONTARIO P9N 1B7

P.O. No. : WESTERN WARRIORS  
Project No. :  
No. Of Samples 98  
Date Submitted Jan 05, 2007  
Report Comprises Pages 1 to 4  
(Inclusive of Cover Sheet)

Certified By :
