Notes

AC Map accompanies a report.
GM Compilation map.
CO Colour format.
EE The earlier edition of this map may offer greater legibility with its more pronounced contrast; though outof-print, it may be viewed at the Mines Library, QSS.
FI Map also available in microfiche format; order as you would for a paper copy.
FO Map is bound in accompanying report as a foldout figure.
GP Minor geophysical data included.
HC Historic canoe route data included on map.
MO Monochrome format (black & white / red & white).
NP Not plotted on map face.
OP Map was out of print as determined from most current inventory available. This may or may not apply to the report it accompanies; verify through the current Publications Price List.
QU Minor Quaternary geology data included.
RE Reprinted with change to some aspect of the original format (usually typified by printing in 2 colours only), exemplifying revision.
RV Revised version, originally issued at an earlier date.
SC Superseded by a more recent map.
TA Map depicts 2 or more areas and/or insets. The scale given is that of the area most prominently displayed cartographically.

WHAT THIS INDEX PROVIDES

This index consists of four sheets and shows all maps published by the Ontario Geological Survey pertaining to bedrock geology and related metallic mineral and petroleum resources. Maps on the following topics are included (abbreviations used in map listings are given in parentheses):

BEDROCK GEOLOGY	
General	*(BEDROCK)*
Precambrian	*(PRECAM)*
Paleozoic	*(PALEOZ)*
Geochronology	*(CHRON)*
MINERAL DEPOSITS (excluding aggregate and industrial minerals)	*(MINDEP)*
PETROLEUM RESOURCES	*(PETROL)*

This index is intended to be used in conjunction with the ***1991 Geology of Ontario*** series of maps, and is published at the same scale, map projection, and sheet size.

The maps indexed here, representing 100 years of geologic mapping, have been produced by the Ontario Geological Survey and its predecessor organizations: the Ontario Bureau of Mines, the Ontario Department of Mines and the Ontario Division of Mines. The maps comprise five series as follows.

AR Series

The "AR" maps, accompanying the Annual Reports of the Ontario Bureau of Mines and Ontario Department of Mines, were issued during the period 1891–1944. Note that the "AR" prefix has been added to map numbers for the purpose of this index and does not actually appear on the maps.

1900 Series

Initially issued separately from Annual Reports, by the Ontario Department of Mines, these maps later replaced the AR series. They were issued during the period 1931–1960.

2000 Series

The current series of final, coloured maps has been produced since 1961. These maps commonly accompany reports.

P Series

The current series of preliminary maps, usually uncoloured, has been produced since 1956.

OFM Series

Open File Maps are a new series of maps intended for rapid release and issued without editing.

For More Information About Published Maps

The ***Publications Price List*** ($1.00 including GST) provides prices and current listings of maps in print.

The ***Index to Published Reports and Maps, 1891–1977*** (Miscellaneous Paper 77) and supplements (1978–1986 and 1987) provide a complete listing of all Ontario Geological Survey and Mineral Development and Lands Branch reports and maps. The listing provides full bibliographic information and is indexed by author, township, district, and NTS grid. A free brochure, ***How to find Reports and Maps—Your Guide to MPI77***, is also available.

The ***General Indexes to Reports***, in 9 volumes covering the years 1891–1980, provide a comprehensive subject index to reports, many of which are companions to the maps listed here. Volumes 1 to 7 are out of print and therefore only available in libraries.

SYMBOLS

Outline of map–area 2047, 2332, 2441

Position of map–areas too small to outline 2007

The different line weights are for the purpose of differentiation only and have no other significance.

International boundary
Interprovincial boundary
District, County boundary
Geographic township boundary (surveyed, unsurveyed)
Railway
Multilane highway
King's highway
Secondary highway
Elevation (land, water) 585m 164m

The positions of all boundaries and surveyed lines are approximate.

HOW TO OBTAIN MAPS

Maps Currently In Print

Maps in this index, as well as other publications by the Ontario Geological Survey currently in print, may be obtained in writing or in person from:

Public Information Centre,
Ministry of Natural Resources,
Room 1640, Whitney Block,
99 Wellesley Street West,
Toronto, Ontario
M7A 1W3
(416) 965-1348

Orders for publications must be accompanied by cheque or money order made payable to the *Treasurer of Ontario*.

In Northern Ontario, all Mining Recorder's offices sell both selected maps and reports for their respective mining divisions and publications that are of province-wide interest. The Resident Geologist's offices in Cobalt, Dorset, London, Tweed, and Wawa provide a similar service. The Regional Mineral Specialist's office in Bancroft carries a selection of publications pertinent to the Bancroft area.

Notes

AC Map accompanies a report.
FI Map also available in microfiche format; order as you would for a paper copy.
GC Minor geochemical data included.
GP Minor geophysical data included.
HC Historic canoe route data included on map.
MD Minor mineral deposits data included.
NP Not plotted on map face.
OP Map was out of print as determined from most current inventory available. This may or may not apply to the report it accompanies; verify through the current Publications Price List.
PZ Minor Paleozoic geology data included.
QU Minor Quaternary geology data included.
RV Revised version, originally issued at an earlier date.
SC Superceded by a more recent map.
TA Map depicts 2 or more areas and/or inserts. The scale given is that of the area most prominently displayed cartographically.
TS Map is a transitional stage, computer-assisted publication.
