

LEGEND

- silicified zone
- quartz veining
- channel sample
gold assay (grams/tonne)
channel length metres
- Sandy Lake shoreline
- treeline/
limit of outcrop
- fault slip
- felsic tuff
- mafic dyke
- outcrop exposure
- interpreted contact

Note: Entire outcrop exposure except for mafic dyke (blue stipple) is variably altered and variably strained felsic volcanics

WEEBIGEE PROJECT, SANDY LAKE, ONTARIO	
Date: May 12, 2014 Author: DRJ Office: Dwg: Draft	Sandborn Area (North half) Mapping and Channel Sampling Results
Scale 1:50	Projection: UTM Zone 15 (NAD 83)
