Job: Aylmer

Date: August 31, 2016

Picked up Tom in Capreol and drove up to sample showings on claim 4216910. These large blocks of quartz breccia and sulphides were uncovered by Gervais Lumber building a cut road. There is a large number of pieces of quartz breccia in area that has not travelled far. We will assay samples for Gold. We also visited Gervais Lumber new work area north of claim 4216908 that might give us better access.

Preamble

After prospecting the cut area on claim 4216910, I took the samples of float to the resident Geologist, Dan Farrow. It was of his opinion to not spend money on assays as the larger piece of quartz breccia did not have much sulphides in it and the rusty piece would be difficult to trace.
