Schedule

Claim No 4276058

When prospecting for outcrops and garnets, most of the area had overburden. About 10% was outcrops which was on the north side of Hwy 533 running at an east west parallel direction. It runs about 300 ft to 500 ft from the Hwy 533. All the outcrops consisted of gneisses and garnets were totally absent.

Claim N-4276057

When prospecting this claim, it was similar to claim 4276058, with less outcrop. (5%), some boulders consisting of hornblende gneiss with little garnets 5% was found at the North end of claim. Some area were wet, shown on Map. for both claims. Types of trees were also mapped.

Ron Montemil

Client No - 411968.
