

May 13/2015 Prospecting^① on Claim #4270852

Why I Douglas Lalonde and Gil Allaire was checking out the old trenches was because in a old assessment file report #T-2612. had high assays in the report. There was very high copper, gold and silver assay in the samples taken (by 655 group holding Ltd.) in Turnbull Twp.

2-56052

There was no way that the high grade samples which was reported in the T 2612 files every had that kind of assays. Because I checked out all their muck piles and both ends of the long trench and there was no quartz veining or mineralization of any kind in the muck piles or trench ends. The trench is 25' long and 6' wide and full of water. The rock types is a granite diorite and some gabbro mix. There was nothing of interested in the muck Piles to take samples for assaying. There was also a old pit stripped area about 600' North west of trench which was supposed to have gold the pit is a granodiorite formation with a few stringers of quartz veins but it had

only very few specks of pyrite in the sample
area. So I did not sample it because I figured
it wasn't going to run in gold any way.
I was very disappointed in what I saw in the
trenched area and the pit also. Which was in
the T2612 assessment file report.

Map attached of Location of trench & Pit area.

May 14/2015 Prospecting on Claim # 4210373

2-56052

I Douglas Lalonde and Gil Allaire did some prospecting, sampling and stripping of outcrops with grub hoes. There is the DeSantis shaft and trenching which was done back in the early ¹⁹²⁷⁻¹⁹²⁸ years. The shaft is about 150' deep with a level at 125' and about 1000' of drifting done on the property. My idea was to check out the wallrock on both sides of the quartz vein which was trenched south of the Shaft. At the east side of the shaft the outcrop is a granodiorite with a ^{B.L.} mixture of some feldspar porphyry. At the shaft area 50' south of the shaft we took a sample #1133589 from the muck pile which had lots of quartz and pyrite in the sample it assayed 1243 ppb Au. which is sample #8 Samples #1133582 - #1133587 which was taken about 300 ft South East & South west of shaft only ran <5 ppb Au. The samples was all in a feldspar porphyry which some samples had lots of mineralization and they didn't carry any gold. It was disappointing I thought the porphyry would carry gold. See assay sheet attached samples #1 - #6 locations

There are pictures and GPS location maps
also attached in the files. This Property needs
very important work done on the property to under-
stand what really going on with the gold vein
system. It need line-cutting, mag, VLF and most
important a
IP Survey

Report Douglas Lalonde

TURNBULL TOWNSHIP

(De Santis Prospect)

Main Metals: Au.

Location: 17 miles west of Timmins, Turnbull Township, southwest part.
Claim P8604 etc.

Map Reference: ODM 34f, Kamiskotia Gold area; ODM P.21, Turnbull Township.

Geology: A granite body is intrusive into a gabbro stock and in turn is cut by a diabase dike. The vein strikes N13°W, is 170 feet long, up to five feet wide and is about six feet east of the diabase and parallel to the contact. Vein minerals are quartz, pyrite, chalcopyrite and native gold.

History: 1920-24: Surface exploration, test pit by Peter De Santis.
1927: Shaft to 150 feet, at 125-foot level 45 feet of crosscutting by De Santis Mining Company Ltd.
1928: On the 125-foot level drifting and crosscutting 1,000 feet, small mill operated, work by De Santis Gold Mining Company Ltd.

<u>Production:</u>	Year	Gold ounces	Total Value dollars
	1926	15	146
	(ODM Statistical Files, De Santis Porcupine Mines Ltd. and ODM 1929, Vol. 38, pt.1, p.96-97).

May 15/2015 Prospecting on Claim #4270851

Sample #1133588 #7 sample ran 35 ppb Au which wasn't much it was in a coarse feldspar porphyry. There is a real large outcrop running North to South stops at old walking road at the north end of the outcrop. (see ^{GPS} map attached)

Also took a sample #9 north of the walking road on Claim #4270851 but I didn't send it in for assay because it had only a few specks of pyrite it was a carbonated quartz veining. (see ^{GPS} map attached)
