

Sapawe – Line Re-Establishing

Job Description – Haveman Brothers was hired by Pierre Gagne to re-establish all old claims lines on claims 4222971 and 4272750. Mike Haveman and Ted Gilverson were the prospectors responsible for carrying out the work as requested.

Access – Claims were accessed by atv using a trail running off Pipeline Rd. which runs out of Sapawe. A kayak was used to cross the lake and reach the lines connecting the number 1 post and witness posts on the island.

Rates – There was approximately 10km of line to be cut, the rate per Km was set at \$680 and covered wages, food, lodging, equipment, fuel, kayak, atv, and truck.

Dates – Completing this job took 2 days of work in the field with 2 personnel, and a few hours of office work. Job started on June 3, 2015 and final report was submitted on June 6, 2015.

Work – Lines were cut and blazed making them very visible and easy to walk. Old lines on 4222971 were very difficult to follow and the bush was extremely thick. Lines on 4272750 were easier to follow as it had been staked multiple times previously. Tying onto these claims or locating these claims has become much easier due to the work completed.
