MAGNETIC
NORTH

DAVE KRDOCMO
FACTOR LAKE PROPERTY
1: 500

The property is located in the Factor Lake Area
40 kms. west of Atikokan and just north of highway 11.

An old logging has the best access to the property.
It heads north from highway 11 and cuts through
the southwest portion of claim 4215428.

The property lies along the Quetico Fault.

The purpose of this program of mechanical stripping
and sampling is to determine what caused the
six channel anomalies from an airborne survey
flown in the eighties.

Typical sulfides in the area are iron pyrite,
chalcopyrite and arsenopyrite.

I exposed a quartz vein with this phase of
stripping. Since there is still some mud
left on the rocks I will know better once the
rain washes some of this off.

The next step will be to take some samples
of the newly stripped ground.

Log of Activities

Dates of mechanical stripping: April 17-19 2016

A JSW BH80 backhoe was used for this job.

DAVID KROOCMO - PROSPECTOR (40 years experience)

Backhoe Operator: DAVID KROOCMO

Expenditures

Mechanical Stripping 16 hrs. X \$100 — \$1600
