Prospecting in Bristol Twp #4277638
Claim

Day #1 ^{Douglas Lalonde} August 15/16 prospecting on Line #0 & #1
found outcrop at the start of lines #0 & #1 for
about 300 ft but the rocks are massive with
a few specks pyrite in a feldspar porphyry. no
samples was taken for assaying. Flag a compass and
GPS lines

Day #1 / August 15/16
Lilles Allaire prospected on Lines #2 & 3 some
outcrop was found on Line #2 South at start
of the Line which was feldspar porphyry. no
sample taken few specks of pyrite.
On line #3 south no outcrops where found.
Flag and GPS, compass lines.

Day #2 August 16/16

Douglas Lalonde prospected on Line #5 large
outcrop was located worked on flag line, compass
GPS line. Outcrop is about 300 ft Long and 350 ft
wide We worked together grub hoeing overburden and
taken 3 samples for assaying.
Lilles Allaire prospected on Line #4 which had the
same outcrop as on Line #5 flag line compass
GPS line, worked grub hoeing overburden, taken
3 samples the outcrop is metamorphism felsic
to intermediate intrusive rocks send 3 samples
in to Act Lab for assays see attached sheets for
location

Day #3 August 17/16 Flag, compass & GPS Lines

Gilles Allaire prospected on Lines #6 & 7 South

There was outcrop found on Line #7 South which is metamorphism felsic to intermediate Intrusive rocks only few specks pyrite no sample was taken outcrop is about 320 ft long & wide and is at around 800 M South see attached maps.

Line #7 the whole line is swamp some spruce cedar bush and the same on Line #6 also except for the one outcrop near the 800 M mark, see the attached maps for location

Day #3 August 17/16

Douglas Lalonde compass, flag & GPS Line #8 The whole line is spruce, cedar, swamp on all the line but the lasted 100 M south near the

#3 Post of Claim 4277638 there is some real low outcropping which is metamorphism felsic to intermediate Intrusion rocks which only had few specks of pyrite no sample was taken. see attached map for location.

Day #4 August 18/16 compass, flag & GPS lines #9, 10, 11 South the bush is mixed spruce, cedar and few jack pine ^{trees} in sand & some swamp areas.

Work done by Gilles Allaire

Day #4/16 August 18/16 Page 3

Douglas Lalonde prospected on lines #72 & 13 South the bush is spruce, cedar, some jack pine trees in sand and some swamp areas. GPS lines, flag & compass lines a low outcrop was located near line post outcrop is about 50 ft wide by 110 ft long which is metamorphism felsic to intermediate intrusion rocks no sample was taken because it only had a few specks of pyrite.

Report in Bristol Twp Claim #4277638

There was 4 days each spend by Douglas Lalonde and Gilles Allaire doing GPS, Flag & Compass Lines to do prospecting. We located 5 outcrops on this property. There was only one outcrop which was interesting to take sample from it. It was located on Lines #4 & #5 South. We worked together on this outcrop doing grub hoeing overburden and taking samples which we send in for assaying at Actlab assay office. There are is mostly spruce, cedar little bit of jackpine and lots of cat tails pictures are attached and outcrops maps and line maps with GPS locations are attached in the report and the rock types of the outcrops are described in the daily work reports which is day by day report. The rock assays from the Actlab didn't carry much gold just back ground gold.

CERTIFICATE OF ANALYSIS

3. Rock samples were submitted for analysis.

The following analytical package(s) were requested:

Code 1A2-Timmins Au + Fire Assay AA

Code 1E2-Timmins Aqua Regia ICP(AQUAGEO)

REPORT A16-074680

This report may be reproduced without our consent. If only selected portions of the report are reproduced, permission must be obtained. If no instructions were given at time of sample submittal regarding excess material, it will be discarded within 90 days of this report. Our liability is limited solely to the analytical cost of these analyses. Test results are representative only of material submitted for analysis.

Notes:

If value exceeds upper limit we recommend re-assay by fire assay gravimetric-Code 1A3.

Values which exceed the upper limit should be assayed for accurate numbers

1	Report Number: A16-074680								
2	Report Date: 2016								
3	Analyte Symbol		Au						
4	Unit Symbol		ppb						
5	Detection Limit		5						
6	Analysis Method		FA-AA						
7	1133502		73						
8	1133503		18						
9	1133504		60						

(These are the same samples)

Samples #1133502 is #2 sample

Sample #1133503 is #3 sample

Sample #1133504 is #4 sample

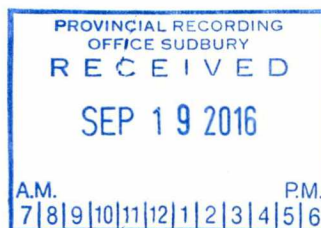

In the sample tag which I used I just used the last number on the sample tag which was #2, #3, #4 on the sample bags in the pictures.

The next time from now on I will use the complete tag number in any sampling I will do from now on.

Then this way there won't be any mix up.

Douglas Lalonde

I hope every thing is OK now
Sept 19/2016 Thanks Jim
