Attached:

1- Copy of work performed
on mining lands

2- 2 copies of Report.

J. Richard Morin,
172554

Page 1

The subject property is located in the southeast quadrant Mallard Twp., Swayze Gold area. Approx. 5 miles northwest of the Jerome Gold mine (past producer).

Purpose of Report is to briefly summarize work carried out by Richard Morin and wife on June 8th 2014.

Property History: Gold first discovered in Mallard in 1931 and area has undergone exploration since. Initial claims (1177542 & 1177543) on the property were staked to cover gold showing found while prospecting along new logging road. Main showing (VG) is on mining claim

Page 2

1177543 recorded June 3, 1994

Geophysics carried out in 1985.

GEOLOGY:

Mallard is in the Abitibi greenstone belt, Porcupine mining division.

Predominant Rock types are mafic intrusives. A pervasive schistosity in the area strikes 30° - 40° .

Regional geology of Mallard covered in the Ontario geological survey 248. Geology of Garnet area 1987.

PROPERTY LOCATION and ACCESS:

Via hwy. 101 to 144 south to
Junction of Sultan industrial
road Thence west along Sultan
road for 46 km. to a junction
in Edith Twp. then North via
gravel road for 26 km. to a
bridge (Opeepesway River) then
 $\frac{1}{2}$ mile to claims. Approx. 226 km. to property.

Claim Nos.

1172542	1 unit
1177543	1 unit

Client No. 172554.

PROJECT:

Further investigate Main Gold
showing (1177543) consisting of
quartz stringer veins/pods hosted
by a shistose mafic volcanic.

Page 4

The Quartz stringer veins/pods in general trend parallel to the schistosity/shearing at 40° west and have been exposed within Zone approximately 40 ft wide (across the shearing) by 30 ft long. In places the quartz has significant disseminated pyrite (cubes) and minor chalcopyrite. Specs of visible Gold are also present.

A $\frac{3}{4}$ day (2 persons) spent manually removing and splitting (pick shovel hammer) blasted rocks from main Gold showing. Samples also collected across road from main showing and west of Post 4 (1177542)

1. The first step is to identify the problem.
2. Next, we need to gather information.
3. Then, we should analyze the data.
4. After that, we can develop a solution.
5. Finally, we must implement the plan.
6. It is important to monitor progress.
7. We should also evaluate the results.
8. The process should be flexible.
9. Communication is key throughout.
10. The goal is to solve the problem effectively.
