Report on Prospecting in Cancellation Group

Spent 1 day each man Douglas Johnson
and Bill Blair

Prospecting the striped area. The strip zone is about 300 ft wide and about 500 ft long. The zone is striking at 15-20° NW it is really large mineralized and very altered zone. It is a stock work formation with quartz veins going all direction. The wall rock contains lots and lots of very fine mineral and also some small and large cube pyrite all

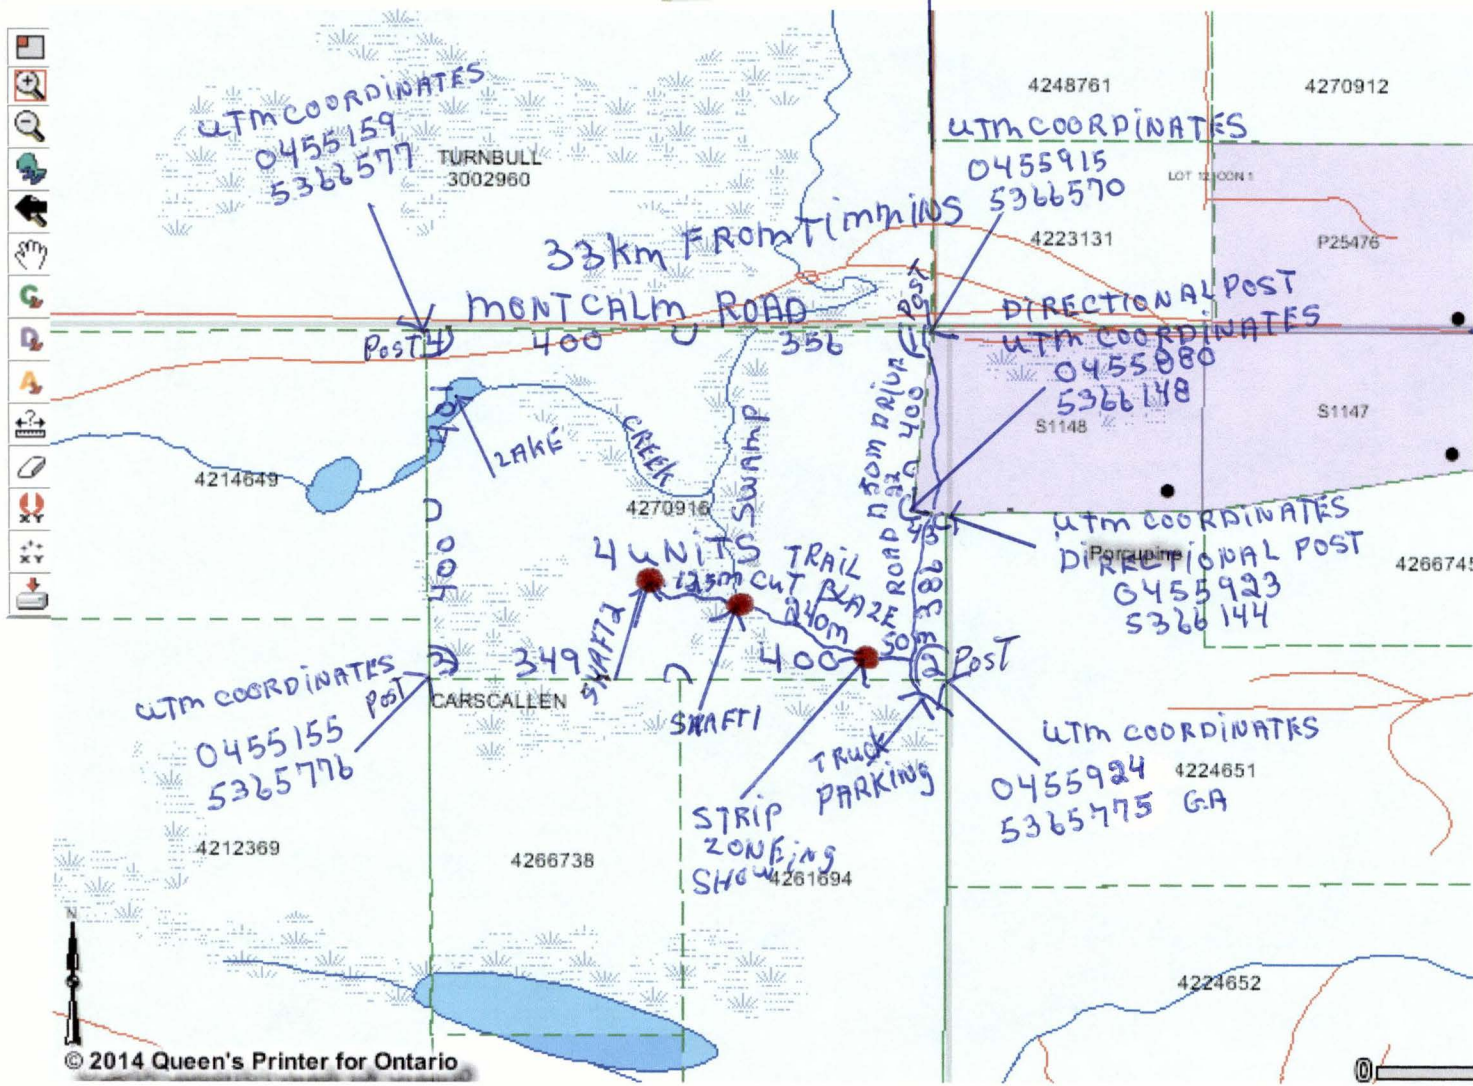

through the whole rock system which is striped off. It also contains tourmaline. This was the first visit to the property. We took 5 grab samples to run them for gold we had assays returning from 834 ppb to as high as 3000 ppb and the assay carried 3.03 gms - 3.21 gms on the check assay. \$600.00

Property visit Sept 7/2013 - 2 men x 300.00 each = 600.00
\$200.00
\$200.00
\$200.00
Total 800.00
truck & gas and etc. 100.00 each x 2 = 200.00

10.5° WEST
