Work Invoice Work Done

Spend 1 day each man brushing out the trails to go in to the work area. Lots of brush on the trails after the winter snow knock down the brush on the trails and old road ways to get in to the job area.

2 men x \$300. per day each man = \$600.

Travel 140KM round trip 2 trucks x .50KM \$70.

Food & drink \$30, per man x 2 men

\$60.  
\$730.00

Turnbull Group 6 Days

Douglas Lalonde Day #1 May 2/17

Prospecting on line #8 & line #1 located.

large ultramafic<sup>Diabase</sup> outcrop no mineralization<sup>Wages per day</sup> #300.  
found few specks of pyrite no samples taken  
see Map Location outcrop, picture.

Gil Allaire Day #1 May 2/17

Prospecting on line #2 & line #3 located

2 real large ultramafic outcrops with a  
large Diabase running thru the outcrop N to South  
direction just a few specks of pyrite all thru  
the outcrop no samples taken  
see outcrop map locations, pictures Wages per day #300.

Douglas Lalonde Day #2 May 3/17

Prospecting on line #8 & line 9 south of Claim  
#4210373

No outcrops found

Wages per day #300.

Gil Allaire Day #2 May 3/17

Prospecting on line #4 & line #5

No outcrops where located the area was  
mostly cedar & spruce swamp Wages per day #300.

Douglas Lalonde Day #3 May 4/17

Prospecting on line #10 & line 11 south of

Claim #4210373 located a ultramafic outcrop

with a large Diabase running thru it from N to South

No samples was taken only few specks pyrite in outcrop #300.  
See attached outcrop map, pictures Wages per day

Lil Allaire Day #3 May 4/17

Prospecting on line #6 & line #7

No outcrops were located in that area  
was mostly cedar & spruce swamp

Wages per day \$300.

Douglas Lalonde Day #4 May 5/17

prospecting on lines #8 & lines #9 North of  
Claim #4210373 No outcrop was found  
spruce & poplar bush wages per day

\$300.

Douglas Lalonde Day #5 May 6/17

prospecting on line #10 & line #11 north  
of Claim #4210373 One large ultramafic  
outcrop was located with a large diabase  
running thru the middle of it. See attached  
prospect outcrop map, picture Wages per day

\$300.

Lil Allaire Day #<sup>02</sup> May 5/17

Prospecting on line #12 & line #13

Real Large ultramafic outcrop was found  
with a large Diabase running thru the middle  
of it. The outcrop is about 1800' long & 300'-400' wide  
The ultramafic has some pyrite but no samples  
was worth ~~that~~<sup>02</sup> taken Pine & spruce, poplar bush.  
See attached outcrop map, picture. Wages per day

\$300.

Page #3

Lil Allaire Day #5 May 6/17  
prospecting on Lines #14 & #15

One large outcrop which is part of the outcrop  
which was on line #13 which is a ultramafic  
with very little pyrite no sample was taken  
Pine, spruce & popular bush

See attached outcrop map, picture location.

Wages per day \$300.

Douglas Lalonde Day #6 May 7/17  
prospected on Line #18

No outcrop was located bush spruce, popular #

Per day Wages 300.

Lil Allaire Day #6 May 7/17  
prospecting lines #16 & Lines 17

No outcrops where found spruce & popular bush

Wages per day \$300.

From May 2 - 7 May Total wages

\$3,600.<sup>00</sup>

Expenses May 2 - 7/17 = 6 days

Travel with 2 trucks rounded trip from Timmins to job site and back 70KM each day x 2 trucks 140KM

$140 \times .50^{\$} \text{ per KM} \times 6 \text{ days travel} = \$420.00$

Food & drink at  $\$30.$  each man  $\times 6 \text{ days} \times 2 \text{ men} = \$360.00$

Make maps compile<sup>all</sup> data, write reports for day work, closer report, do GPS Maps copy pictures. picture locations of outcrops 2 days work 2 men at  $300.$  per day

Total  $\$1200.$

Total Bill

$\$1980.00$

Final Written Report Turnbull Property  
after all the prospecting was done on the property  
we found 7 large outcrops of ultramafic. The  
outcrop had very little mineral just small  
specks of pyrite. Which was not good for token  
and samples for gold because they will not  
run in gold any way. We thought that with  
the Desanti's shaft which was 150' deep and  
had 1000' of drifting done on the property. That  
maybe we could fine some more gold zone  
but we where unsuccessful in fining any new  
zones. We didn't find any faulting or shear zones.  
There should be a line-cutting project then  
a Mag & V L I and I P survey done on this property.  
I think that its possible to fine a gold orebody  
a depth because the gold zone at the Desanti's Mine  
is vertical so that means you have to chance  
this zone down to depth. There was only very  
shallow drill holes drilled at the mine site. They  
had visable gold and good assays for gold at the  
Mine in the early years. That was said in the old  
reports.
