August 30<sup>th</sup>, 2017.

To: Geoscience Assessment Office

933 Ramsey Lake Road,

Sudbury ON P3E 6B5

From: Scott Woolhead

To Whom it may concern:

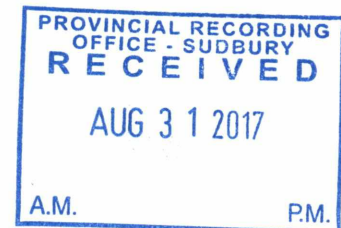

On August 22<sup>nd</sup> of 2016 I undertook to evaluate a copper showing in Nouvel township in the mining district of SSM. I travelled to the community of Ironbridge where I obtained lodging for the evening. I then went to the area of the showing which was listed as a prospect with reserves. After spending some time on the 22<sup>nd</sup> prospecting and taking samples (2), I determined that I would be going to stake the ground. Subsequently on the next day I staked the prospect.

Please find my assessment work form 204E included here for work credits on our property. I have also included the sampling tests as part and parcel of my assessment work.

Sincerely yours,

Scott Woolhead.

November 22<sup>nd</sup>, 2017.

To: Geoscience Assessment Office

Sudbury ON P3E 6B5

From: Scott Woolhead

Re: Submission #: 2.58151 ; Transaction #: W1750.01706

Revision to correct inadequacies of the previous work report.

The following are taken from my field notes:

1<sup>st</sup> sample: from 334910, 5149593. Taken from wall rock of pit discovered at this point. Sample consists of quartz veining with significant pyrite in the rock pieces. This sample had a green tinge on the one side that was exposed before I broke it off with my hammer.

2<sup>nd</sup> sample: from 334892, 5149627. This sample was dug from the muckpile that was located beside the trench. Chalcopyrite was observed in this sample of rock.

The first 30 metres of my traverse was on level ground consisting of tag alders and a few hardwoods with pine interspersed. Very quickly the ground began to rise steeply in front of me. Further up slope I noted the establishment of more mature trees, hardwoods mainly – the ground cover here also opened up. Whereas the first part of my walk was a pushing through of underbrush the south side of the claim is more open under the trees once you get up the main slope. Spruce and cedar trees were seen on the north side of the road where claim post # 4 is situated.

Sincerely yours,

*Michael Scott Woolhead*  
Scott Woolhead.

Traverse of Nouvel Township Cu Showing on August 22<sup>nd</sup>, 2016.

Blue pin above is the location of where I parked the truck.

Two green spots are location of two rock samples taken and subsequently sent in for analysis (report from lab contained within this assessment package).

Having previewed a number of trenches and with the samples taken, I staked the ground on the following day (August 23<sup>rd</sup>, 2016).
