Project #2 Prospecting on Claims #4287100, #4287178, #4287308

Doug Lalonde Day #1 August 16/17

Prospecting on Line #0 Flag, compass & GPS Line
Pit #1 is located on this line # July 25/17 so I prospected
the rest of Line #0 but no more outcrop was found
around pit #1 is a large outcrop which is chlorite gabbro.
the pit is discribed in the July 25/17 report 0449107 UTM.
Trees spruce, balsam Poplar sand area see attached map 5368865 #
Wages 300.

Gil Allaire Day #1 August 16/17

Prospecting on Line #1 flag, compass & GPS Line.
Pit #23 is located on this line July 25/17 so prospecting
the rest of Line #1 but no more outcrop was found
around Pit #23 is a large outcrop which is chlorite gabbro.
the #2 Pit 0449123 UTM. See attached map 5368879 #
Wages 300.

Douglas Lalonde Day #2 August 17/17

Prospecting on Line #2 Flag, compass, GPS Line
Pit #4 is located on this line July 25/17 so prospecting
the rest of Line #2 but no more outcrop was found.
around Pit #4 is a large outcrop which is chlorite gabbro.
the Pit #4 0449184 UTM then the outcrop goes into cedar
spruce swamp area. See attached map 5368881 #
Wages 300.

Gil Allaire Day #2 August 17/17

Prospecting on Line #3 Flag, compass, GPS Line.
First half of the line is cedar swamp the whole line #3
didn't have any outcrop the last half of Line #3
has popular Pine, spruce, balsam trees sand area.
Wages 300.

~~August 18 & 19/17 D.L.~~

Page #2

Doug Lalonde August 18/17 Day #3

Prospecting on Line #4 Flag, compass, GPS Line
Outcrop was Located which is about 200' long 100' wide
it had a trench on the outcrop about 100' long
3'-4' wide had some carb quartz in chlorite gabbro.
Sample was taken to look at it had some pyrite in it.
not send in for assay didn't look good enough. Spruce
balsam pine popular tree sand area trench # 0449488 UTM
See Attached map.
Wages \$300, outcrop

Gil Allaire August 18/17 Day #3

Prospecting on Line #5 Flag, compass, GPS Line
No outcrop was Located on this line spruce, popular
pine, balsam trees sand area.
Wages \$300.

Doug Lalonde August 19/17 Day #4

Prospecting on Line #6 Flag, compass, GPS Line
No Outcrop was Located on this line, spruce, popular
pine, balsam trees sand area.
Wages \$300.

Gil Allaire August 19/17 Day #4

Prospecting on Line #7 Flag compass GPS Line
No outcrop was Located on this line, spruce, popular
pine, balsam trees sand area.
Wages \$300.

Doug Lalonde August 20/17 Day #5

Prospecting on Line #8 flag compass GPS Line
Outcrop was Located at 0449876 UTM outcrop is about
150' long by 100' wide Trench #2 quartz vein 1'-2' wide for
about 40' long has few speck pyrite rock chlorite gabbro
formation sample taken but not assay. spruce, pine, popular
balsam trees sand area. See attach outcrop map.
Wages \$300.

Page #3

Gil Allaire August 20/17 Day #5

Prospecting on Line #9 Flag, compass, GPS Line
There was no outcrop located on this line
pine, balsam, poplar, spruce trees sand area.
Wages \$300.

Doug Lalonde August 21/17 Day #6

Prospecting on Line #10 Flag, compass, GPS Line.
There was no outcrop located on this line spruce
pine, poplar, spruce trees sand area. Wages 300.

Gil Allaire August 21/17 Day #6

Prospecting on Line #11 & #12 Flag, compass, GPS Line
There was no outcrop located on these 2 lines.
spruce, balsam, pine, poplar trees sand area.
Wages \$300.

August 22, 23/17

Write report make GPS maps for Daily
working. develop pictures, Photo copying etc.

2 days 2 men at \$300. each man
Make outcrop map.
Total Report etc \$1200.00
Total Wages \$3600.00
\$4800.00

Trench #2

Final Prospecting Report.

After Prospecting on all the lines 0-12 there was only 2 new outcrops found which had
Trench #1 ^{6449484 UTM}₅₃₆₉₂₃₃ in chlorite gabbro outcrop
this is all reported in my daily report with
attached outcrop map and the other outcrop which
was located at ⁰⁰⁴⁹⁸⁷⁶₅₃₆₉₄₄₇ UTM is also in chlorite
gabbro this is also reported in my daily report
with outcrop map attached. One real important
formation found was pits #1, #2, #3, #4 which
was all located on a major east west
fault which has a large width and length
to it. And there is lots and lots of coarse
and fine pyrite all threw the fault zone
from pyrite in in the Pits #1 to pit #4
The fault is dipping at 70° South and it
at less 30' to 40' that can be seen in these
pits. This property is very important
property which will need line-cutting
Mag, VLF and IP survey because there
is a major Fault and also a major Shear
zone in the same are. And both fault & Shear
zone carries very good gold & silver numbers.
See Work done in July & August Douglas Lalonde
