WORK REPORT
CARR TOWNSHIP, LARDER LAKE MINING DIV.
ONTARIO

UTM NAD 83, ZONE 17
537000 E 5378800N

2 · 58326

INTRODUCTION

A Beep Mat Survey was conducted over a an area of Mining claim 4251165, Carr Township in the Larder Lake Mining Division. The purpose of this work was to locate any mineralized bedrock or near surface conductors that could be exposed.

PROPERTY STATUS

The claims are recorded entirely in the name of Martyn Harrington, (Lic.K22526), of Kirkland Lake, Ontario.

LOCATION/ ACCESS

The claim is located in Lot 8, Concession 2, Carr Township and was accessed via Buffalo Road which ends at the landing on the Black River . A boat was then used to cross the river to the survey area on the east bank.

WORK HISTORY

Numerous past stakeholders have explored this area for its gold potential and have proven the existence of gold in the Carr Township area by diamond drilling. The main geological feature being the Porcupine-Destor Fault Zone and Black River cross Fault. These claims have been held by the current holder since 2009, since then, only grassroots prospecting and geophysics have taken place in an effort to find gold values on the property.

WORK PERFORMED/ RESULTS

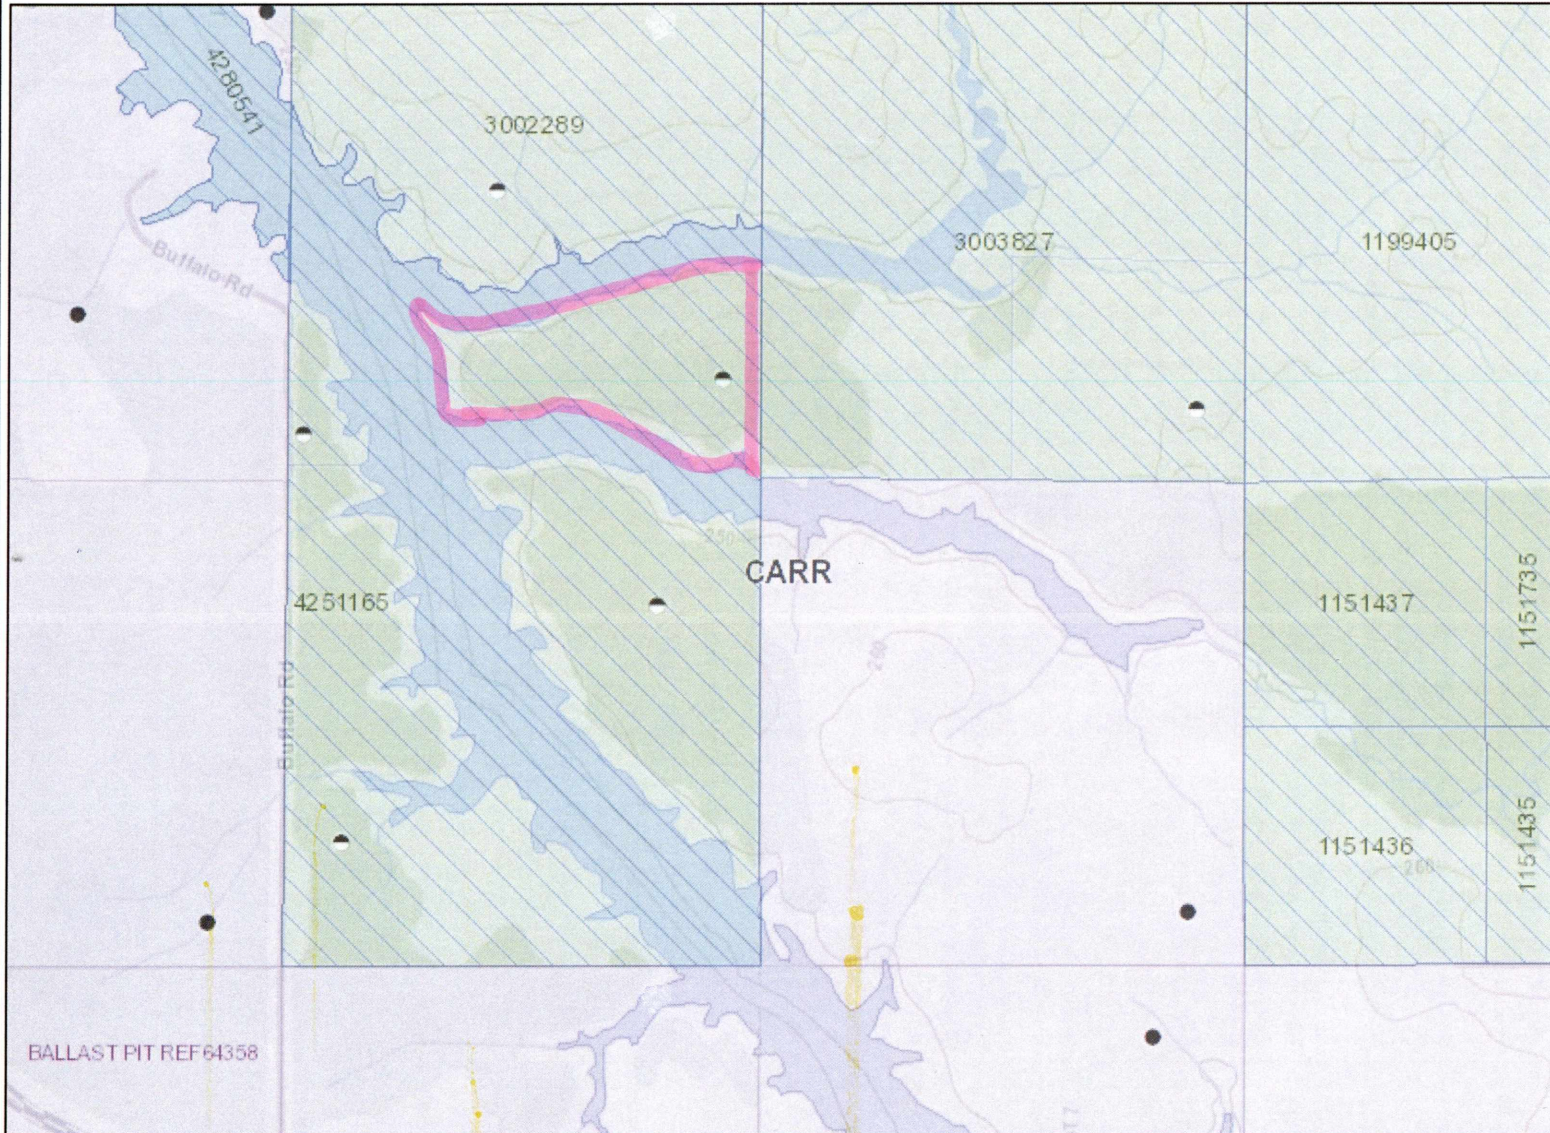

The work was performed on September30-October 1, 2017 by Martyn and Jackson Harrington. A Beep Mat survey, utilizing a Kirkland Lake MNDM instrument was conducted to determine if any near surface conductive rock could be located. Control was maintained using a handheld Garmin GPS. Readings were noted at 50m intervals along lines spaced 50m apart. The survey gave low readings of both high frequency/HFR and low frequency/LFR which is indicative of relative conductivity. No MAG values were displayed which indicates a lack of magnetite, therefore, the instrument did display intrinsic conductivity/Rt%.

RECOMMENDATION

Future work in this particular area should include soil geochem and Diamond drilling as there are geophysical targets defined under overburden on the survey area.
