**PROSPECTING REPORT**

**LOCATION:**

This property is 50 km southwest of the town of Armstrong ON.

**ACCESS:**

I left Thunder Bay by float plane at 10:30 a.m. on the 9th of October 2017 and proceeded 91 miles north to Obonga Lake where I picked up Glenn Speirs to assist me with the geo referencing of claim posts for claim #1245540 as well as the collection of ore samples.

We then proceeded on to Puddy Lake where we docked the aircraft in a protected bay and proceeded 1.72 km by boat to the #4 WP, which was easily visible on the shore.

We then followed the ribboned and blazed trail .24 km to the #3 corner post and commenced to GPS the coordinates. On our return to the #4 WP we investigated possible outcrops but determined that the overburden was such that we did not have access to the bedrock, we took one sample but on reflection felt that the source was as likely a large bolder which had been deposited there and decided not to use the sample in this work report.

We then proceeded east by boat .81 km to the #1 WP which was visible from the lake. We then walked 4.2 km to the #2 corner post.

On our return to the boat we collected 5 ore samples which were labeled as sample numbers 0431, 0441, 0451, 0461 & 0471 in reference to the tags assigned by the Garman 650 used to record their locations. Sample 0431 was collected from a rock face in an area which consisted of small ravines which ran east and west.

Sample 0441 was collected in a clearing which evidence suggested had been the sight of extensive drilling in the past. From here we proceeded north down the hill to the lake. On the way we notice what appeared to be evidence of past trenching

operations and collected sample number 0451. Sample 0461 was collected from a small rock face near the shore and sample 0471 was collected from the bedrock adjacent to the #1 WP.

We then returned to the Beaver aircraft a distance of 2.54 km. we then flew to Obonga Lake where Glenn Speirs was dropped off and I then returned to Thunder Bay.

### **STYLE OF WORK CARRIED OUT:**

We used a G.P.S. (Garmin Rhino 650) and a Sylva Ranger Compass. The majority of the area is treed with a mixture of black spruce with some jack pine and birch. Locations referred to are numbered with corresponding numbers on the accompanying map, as well as an ORE SAMPLE DATA SHEET showing the UTM coordinates.

### **SUMMARY:**

The prospecting for this day was carried out in reasonably good weather and the conditions were such that we were not rushed or distracted from the task. It is apparent from first glance that some of the areas sampled might warrant further investigation. The samples will be reviewed to determine if a geological assay is warranted in the future.

This work was done by Don Plumridge and Glenn Speirs and the report was prepared by Don Plumridge.

Don Plumridge \_\_\_\_\_ Date December 29, 2019

## Sample Collection Data Sheet

<b>LOCATION ID</b>	<b>UTM MAP CO-ORDINATES</b>		<b>Claim #</b>	<b>Descriptions</b>
0431	E 319240.08	N 5537885.4	178013	Greenish to grey colouring with rust appearing in fishers
0441	E 319244.1	N 5537963.96	178013	greenish grey colour with burgundy streaks and metallic speck visible
0451	E 319239.35	N 5538035.19	299298	Salmon and green colour with black metallic and rust visible at break
0461	E 319238.1	N 5538071.62	299298	Black to grey colour with soapy texture
0471	E 319252.58	N 5538097.8	299298	greenish grey with red patches an rust in pockets
