INTRODUCTION

The following report will deal with the results of a preliminary prospecting program carried out on the Centennial Property. This property consists of nine full and/or boundary mining cells located in Naveau Township, Sault Ste Marie Mining Division, Ontario (Figure #3). This work was carried out by Vision Exploration and was supervised by Steven Anderson.

A total of 2 days were spent by two individuals, in an attempt to locate the western extension of the past producing Centennial Mine. This work was carried out on September 28th and 29th, 2019.

A total of 3 grab samples were taken from a network of quartz porphyry veins. The purpose of this program was to establish whether the quartz vein system that hosts the Centennial mine continue westward and if they contain economic amounts of gold. The historic Centennial Mine identified 9 separate quartz veins that were tested with shafts or trenching. Grab samples taken from the dump site have ran up to .22 oz./ton Au

This report will deal with the results of the preliminary prospecting program carried out on the above-mentioned property.

Location Map
Figure #1

LOCATION AND ACCESS

The Centennial Property consists of 9 full and/or boundary claim cells located in the northwestern portion of Naveau Township (Figure #2). The claim numbers can be found under the "Claims" portion of this report

The property is located approximately 9 km south east from the town of Wawa, Ontario. Access to the work area was gained by taking Hwy 17 South from Wawa for approximately 7km to High Falls Road. Traveling east on High Falls road for approximately 9km will lead to within 200m of the area prospected.

PERSONNEL

The following people were directly involved in carrying out the preliminary prospecting on the Centennial Property. All work was supervised by Steve Anderson of Vision Exploration.

PREVIOUS WORK

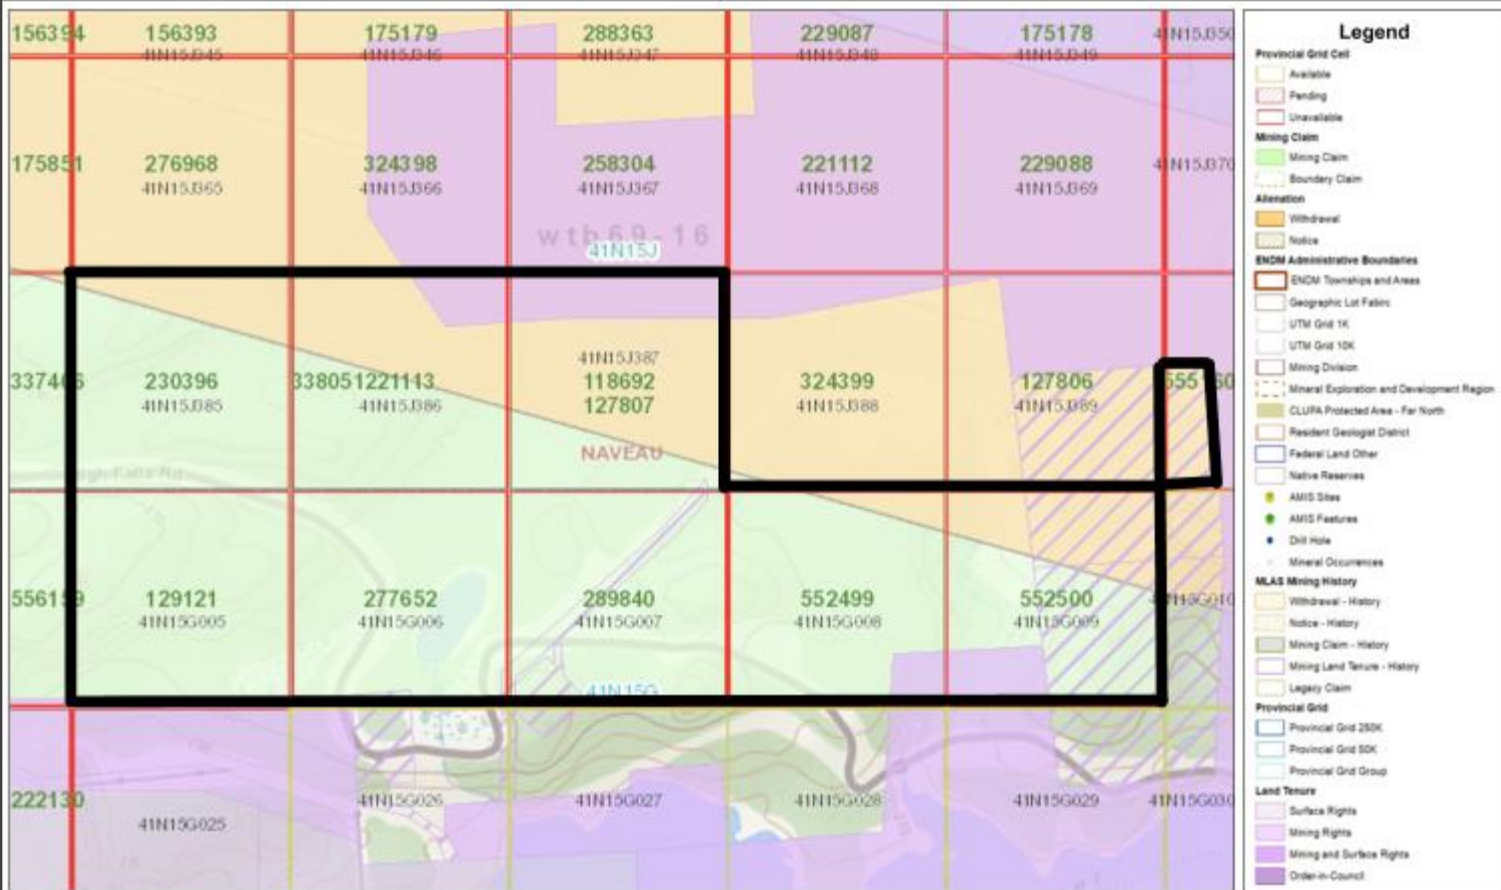

The first phase of exploration on this property involved prospecting and sampling of the area around the past producing Centennial mine

Previous work is reported in MDI file MDI41N15NE0004, Centennial Mine, 1934.

CLAIMS

The Centennial Property is made up of 9 mining cells as described below. A map of the claim group can be found under Figure #3 of this report.

WORK PROGRAM

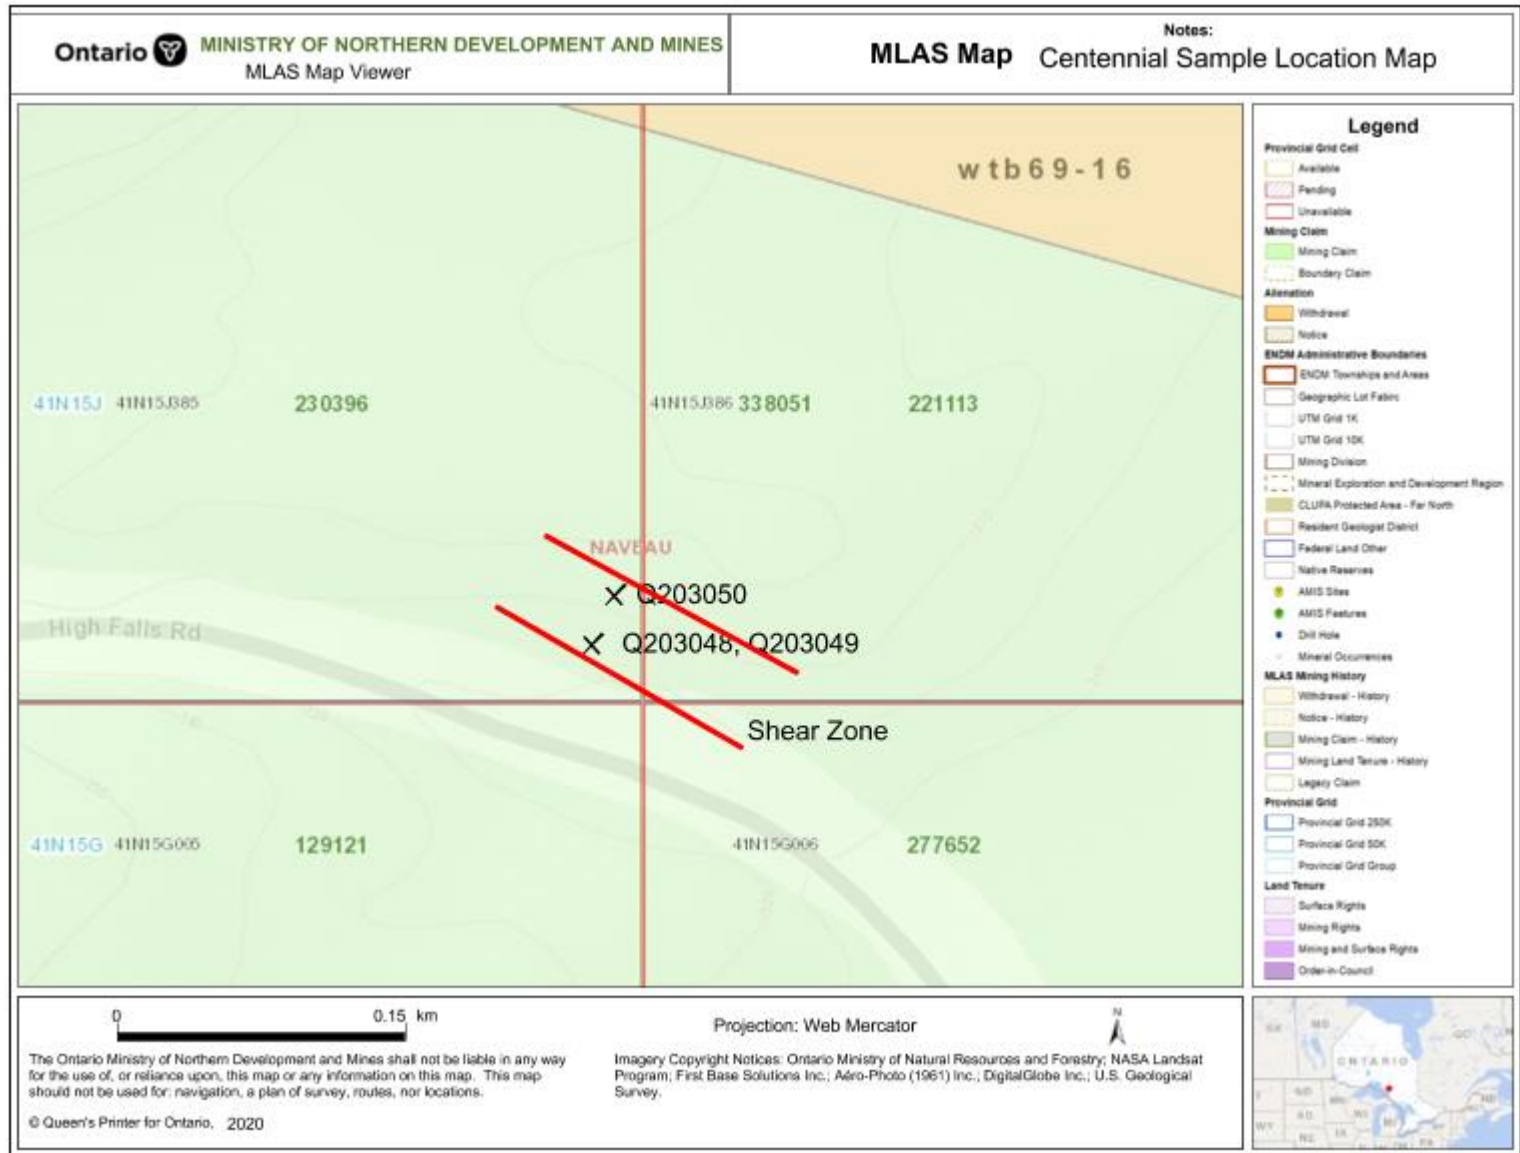

The current work program involved 2 men spending 2 day travelling from Sudbury to Wawa, via Timmins to prospect and sample the subject claim. A total of 3 grab samples taken from some of quartz veins located. A description and location of the veins located and samples taken can be found under Figures 4 of this report. All 3 grab samples were cut and half sent to SGS Canada Inc. and assayed for gold. The assay results can be found under appendix A of this report.

SAMPLE LOCATION AND DESCRIPTION

<u>Sample Number</u>	<u>UTM Zone 16 Nad 83</u>			
Q203048	670402mE	5309621mN	Quartz porphyry	1-2% sulphides
Q203049	670402mE	5309621mN	Quartz porphyry	1-2% sulphides
Q203050	670405mE	5309684mN	Quartz porphyry	1-2% sulphides

The samples were taken from what appeared to be a shear zone that may be up to several meters wide. The quartz veins samples were within an altered mafic volcanic.

Figure # 4

SURVEY RESULTS

A description as well as the location of the 3 samples taken can be found above. Assays ranged from .081g/t to 5.58g/t Au.

RECOMMENDATIONS AND CONCLUSIONS

The prospecting program carried out on the Centennial Project was successful in locating and sampling quartz veins containing disseminated sulphides. Assays of up to 5.58 g/t Au were obtained. It is likely that this is the same system of quartz veins that were explored by the past producing Centennial Mine in the

Due to the encouraging results reported by this work program, additional work is warranted. A detailed 50m spaced grid should be cut over the entire property. This should then be covered with geological mapping as well as surveyed with magnetometer and induced polarization surveys. This data should then be compiled and if warranted, a diamond drill program initiated.

CERTIFICATION

I, Steve Anderson of Crystal Falls, Ontario hereby certify that:

1. I hold a three-year Geological Technologist Diploma from Sir Sandford College, Lindsay, and Ontario, obtained in May 1981.
2. I have been practising my profession since 1979 in Ontario, Quebec, Nova Scotia, New Brunswick, Newfoundland, NWT, Manitoba, Saskatchewan and Greenland.
3. I have been employed directly with Asamera Oil Inc. Urangellschaft Canada Ltd. Nanisivik Mines Ltd., R.S. Middleton Exploration Services Ltd., Rayan Exploration Ltd and I am currently the owner of Vision Exploration.
4. I have based conclusions and recommendations contained in this report on knowledge of the area, my previous experience and on the results of the fieldwork conducted on the property during September, 2019.
5. I am currently the claim holder for the subject property.

Dated this 27th day of January, 2020
At Crystal Falls, Ontario.
