## **Additional Assessment work report for Claim 555456**

### **Sunday July 26th 2020 Time 10 am to 5 p.m (Total Kilometers 32)**

Drove from Espanola down Penage lake Road to the Stratton Lake boat launch.

Launched my boat and parked my truck and then traversed to Claim 555456 by boat.

Parked my boat at the Claim area and walked up to the trench located on the claim. Collected six different mineral samples from different locations along the trench. I have attached pictures from all six locations with the universal mercator coordinates from each sample location.

Left the claim area and returned back home with the samples.

### **Monday July 27th 2020 Time 9 a.m to 10 a.m(Total Kilometers 70)**

Drove to Sudbury and submitted the six samples to ALS Geochemistry lab for assaying.

### **Tuesday August 4th 2020 Time 10 am to 6 p.m(Total kilometers 32)**

Drove from my home in Espanola down the Panage Lake Rd to the Stratton lake boat launch.

Launched my boat and Parked my truck and the traversed to Claim 555456.

Parked my boat at Claim 555456 and proceed to look around for the possibility of another quartz vein running parrallel to the one already identified. Used a Garrett all terrain gold metal detector and scanned the area. Identified an area of highly mineralized chunks of material about the size of golf balls (eight in total) buried about eight inches under ground approximately 100 feet South of the vein that has already been identified. Its possible that there is another vein in the area or the mineralized material is from the existing vein. I will return another day and search the area more.

### **Tuesday August 18th 2020**

Received the assay results back from ALS Geochemistry for the six assay samples.

Wow! Excellent results!

I have attached the assay results along with the receipt for the samples. \_\_\_\_\_

"Mineralized chunks of material"

41104J FOSTER 41104J210 555456

41104J211 533914

Sample #1 is described as oxidized material Deep red in colour, smells of sulphur and chipped approximately 1 kg of material from in situ and sent it in for assaying.

Sample #2 is described as oxidized material. Visible metallic looking sulphides and also smells of sulphur. Chipped approximately 1 kg of material from in situ and sent in for assaying.

Sample #3 is described as oxidized material. Visible quartz with red rusty staining with visible metallic looking sulphides and smells of sulphur. Chipped approximately 1 kg of material from in situ and sent in for assaying.

Sample #4 is described as black material with metallic looking visible sulphides and smells of sulphur. Chipped approximately 1 kg of material from in situ and sent in for assaying.

Sample #5 is described as brown material with metallic looking visible sulphides and smells of sulphur. Chipped approximately 1 kg of material from in situ and sent in for assaying.

Sample #6 is described as black, brown with some yellow colour to the material and smells of sulphur. Felt heavy for its size relative to other rocks of the same size. Was a float rock of approximately 1 kg.

**CERTIFICATE SD20158953**

This report is for 6 Rock samples submitted to our lab in Sudbury, ON, Canada on 27-JUL-2020.  
 The following have access to data associated with this certificate:  
 JEAN PAUL VIENNEAU

SAMPLE PREPARATION	
ALS CODE	DESCRIPTION
WEI-21	Received Sample Weight
LOG-22	Sample login - Rcd w/o BarCode
OA-HSUL10	Handling of High Sulphide Samples
CRU-31	Fine crushing - 70% <2mm
SPL-21	Split sample - riffle splitter
PUL-31	Pulverize up to 250g 85% <75 um
CRU-QC	Crushing QC Test
PUL-QC	Pulverizing QC Test

ANALYTICAL PROCEDURES		
ALS CODE	DESCRIPTION	INSTRUMENT
PGM-ICP23	Pt, Pd, Au 30g FA ICP	ICP-AES
ME-ICP61	33 element four acid ICP-AES	ICP-AES

This is the Final Report and supersedes any preliminary report with this certificate number. Results apply to samples as submitted. All pages of this report have been checked and approved for release.
