WORK REPORT
OF
GRASS ROOTS PROSPECTING PROGRAM
HARRINGTON PROPERTY
PONTIAC TOWNSHIP
LARDER LAKE MINING DIVISION, ONTARIO

BY: M. HARRINGTON, FEBRUARY 5, 2022

INTRODUCTION: A Two-day grass roots prospecting / sampling program was conducted from November 10-11 on the Pontiac Township Property which is currently held by prospector M. Harrington (Lic.K22526). The work focused on one specific area described in Geological Report 125 by L.S. Jensen- "Geology of Pontiac and Ossian Townships" (1975). An old pit mentioned in Report 125 south of Clarice Lake was located and sampled.

ACCESS: The property was accessed north from the village of Virginiatown-Kearns on Highway 66 via the drivable Labyrinth Lake Road for 22km. The narrow Clarice Lake Road was then driven for approximately 1.8km after being brushed out. A canoe was then carried for the last 300m to the western shore of the lake for the 1600m canoe trip to a landing site 400m west of the old Pit. This area is currently difficult to access and was only accessible by float plane at the time of Jensen's work in the seventies.

WORK HISTORY: The property has been held by M. Harrington since April 2020 and has seen only limited grassroots exploration. The old pit sampled on claim 584728 is of unknown age.

WORK PERFORMED:

Nov. 10: M. Harrington and Jackson Harrington brushed out a very narrow Clarice Lake access road to drive a truck as close as we could to the lake with the canoe. The last 300m of road was not drivable with clay gumbo soil and ATV ruts.

Nov. 11: M. Harrington and Jackson Harrington canoed across Clarice Lake, located the old pit then sampled it. Six samples were taken from the Pit area and were assayed at Swastika Labs Ltd. for gold, silver and copper. Please see attached sample sketch and the assay certificate attached to this report.

SAMPLE LOCATION (UTM NAD83) / DESCRIPTIONS

S029614	609521E	5353987N	Volcanics 1%py
S029615	609522E	5353987N	Volcanics 1%py
S029616	609526E	5353994N	Volcanics 1%py, muck pile
S029617	609528E	5353990N	Volcanics 1%py, muck pile
S029618	609481E	5354038N	Rusty volcanics 2%py, blasted area
S029619	609482E	5354040N	Rusty volcanics 2%py, blasted area

RESULTS/RECOMMENDATIONS:

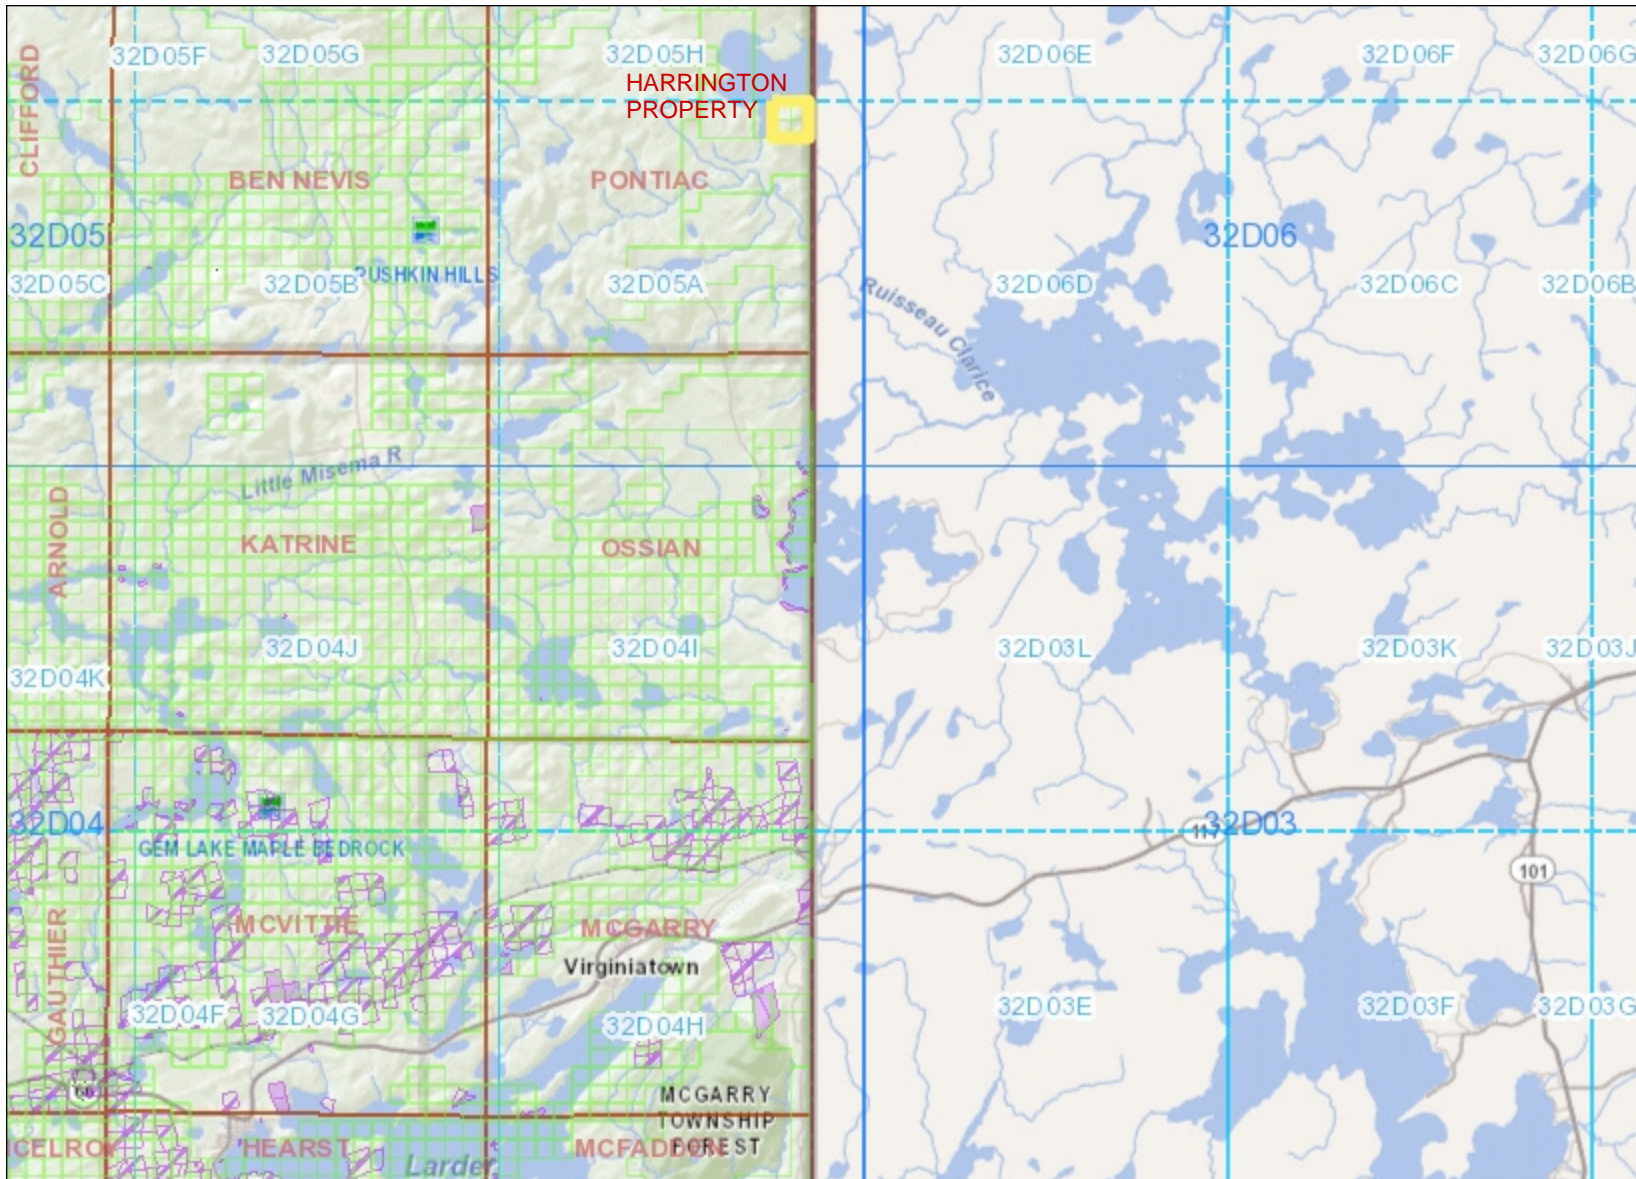

The samples returned low values when assayed for gold, silver and copper. More time should be spent conducting a prospecting traverse of the whole property with a focus on examining the intrusive contact near the north boundary of claim 584726.
