Prospecting Report
on the
Montrose-Midlothian Claims
Matachewan Area, Ontario

Claims 612997 612998 612999 613000
Montrose and Midlothian Townships
Larder Lake Mining Division

Work conducted from
September 05, 2021 to September 07, 2021

By; Douglas Lalonde

Timmins, Ontario, March 14, 2022

Introduction

A prospecting program was conducted by the claim holder, Douglas Lalonde and helpers on four claims in Montrose and Midlothian Townships, from September 05 to September 07, 2021.

Claims, 612997, 612998, 612999, 613000.

Nine east-west flag lines were established in conjunction with locating outcrops and collecting samples.

Summary

Outcrops were scarce and encountered only in the west claim and in the southeast claim.

All outcrops appear to be a conglomerate type of rock. There was no economic mineralisation observed in the outcrops.

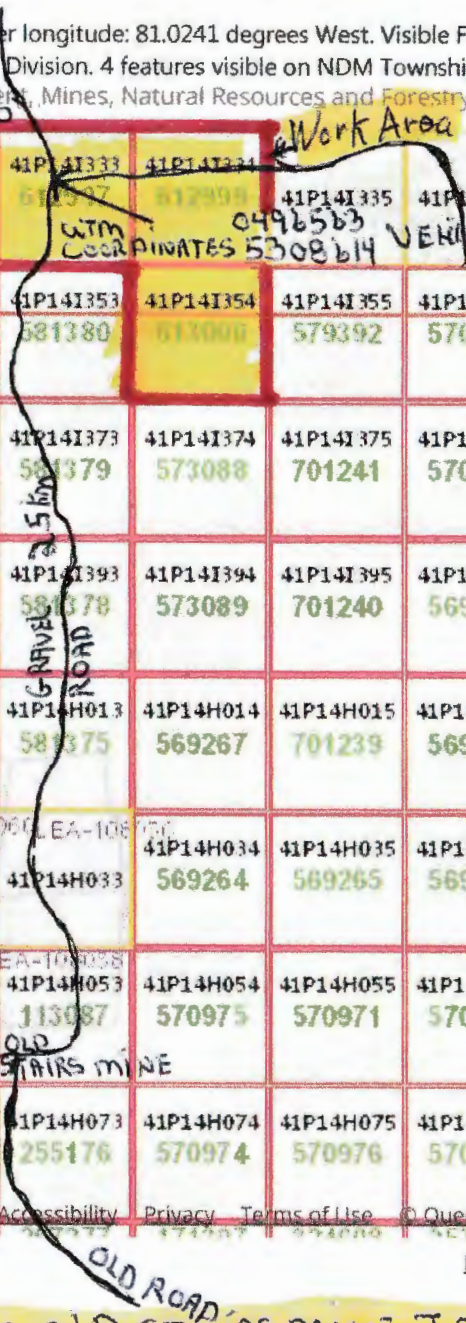

A total of five samples were collected. After reviewing the samples it was determined that none were worth sending to the lab for assays.

Conclusion and Recommendations

Since no mineralisation was found no further prospecting work is recommended on these four claims. Possibly only a geophysics program could uncover some potential of buried mineralised targets.
