Prospecting
Lemay Road Property
Big Pic Forest

Abstract

The Lemay property falls on the north side of the Lemay Rd. in the Big Pic Forest. Located within the Big Pic Forest are several operating gold mines. The mining claim was prospected to locate any sign of mineralization that could lead to commercial potential.

A one man crew spent 5 days surveying newly acquired mining claims.

1.0 Survey Details

1:1 Project Name

This project is known as the Lemay Road Property

1:2 Location

The Lemay Road Property is located in the Big Pic Forest, approximately 42 km north of Manitouwadge, Ont. It is located within the Thunder Bay Mining Division. Coordinates of the property are in the NAD 85, Zone 16N.

1:3 Access

Access to the property was obtained with a 4x4 truck travelling west from Manitouwadge, Ontario on the Caramat Industrial Road. The Caramat Industrial Road turns northward, and at the 42 Km marker the Lemay Road was taken west for 2.5 Km. Access to the claim is on the north side of the road by foot.

1:4 Ownership

Claim # 653211 and # 743706 is held by Lou Paleczny
Prospector Licence #2001922

2:0 Survey of Work Undertaken

2:1 Survey Log

Sept 17, 2022 - Performed Traverse 5hrs

Sept 24, 2022 - Performed Traverse 4.5hrs

Oct 08, 2022 - Performed Traverse 3.5 hrs

Oct 09, 2022 - Performed Traverse 4hrs

Oct 29, 2022 - Performed Traverse 2.5hrs

2:2 Personnel

Lou Paleczny of Manitowadge, Ont. performed the prospecting traverses.

2:3 Traverse Specifications and Purpose

The purpose of the prospecting traverse was to:

- a) Determine access and possible access issues
 - b) Survey the land for possible mineral deposits
 - c) Survey the river for possible mineral deposits
-

3.0 Overview of Survey Results

3:1 Summary of Traverses

The Lemay Road Property sits at the base of a series of hills. It is surrounded on three sides by the White Otter River, and within a couple of hundred yards of the Everest Creek. Access to the claim was made by cleaning up a series of old walking trails. The Topography of the land, and location of several gold mines in the area, lead to the possibilities of gold deposits on or near the claim.

In traversing from the southwestern side of the claim moving northwards upstream of the White Otter River, no outcrops were located. In the White Otter River there were areas of sand deposits along the bank that could produce mineral deposits. Due to the heavy fall rains the river's water level was very high and was moving quickly in areas. I was unable to hand sample by panning.

3:2 Recommendations

The steep embankment along the river system should be prospected in the future to search for evidence of outcrops, or lode deposits. In the summer months when water levels are lower hand sampling the sand deposits along the river's banks to check for evidence of mineral deposits.

3:3 Conclusion

Traversing the Western side of the mining claim along the river has produced some areas of interest that hopefully will produce some mineral deposits when hand sampling is possible.

Log Submission of Performed Traverse:

Sept 17/22 - Traversed an area 0.03km² starting in the southwest corner of claim 653211 just off Lemay Rd and Everest Creek.

Soil conditions were sandy with light gravel just off Lemay Rd 5-10m to the bank of the White Otter river , light underbrush. Moving north up stream the soil has grass and vegetation with black earth and 20m plus to the east away from the river bank poplar and spruce trees getting quite thick in areas with underbrush.

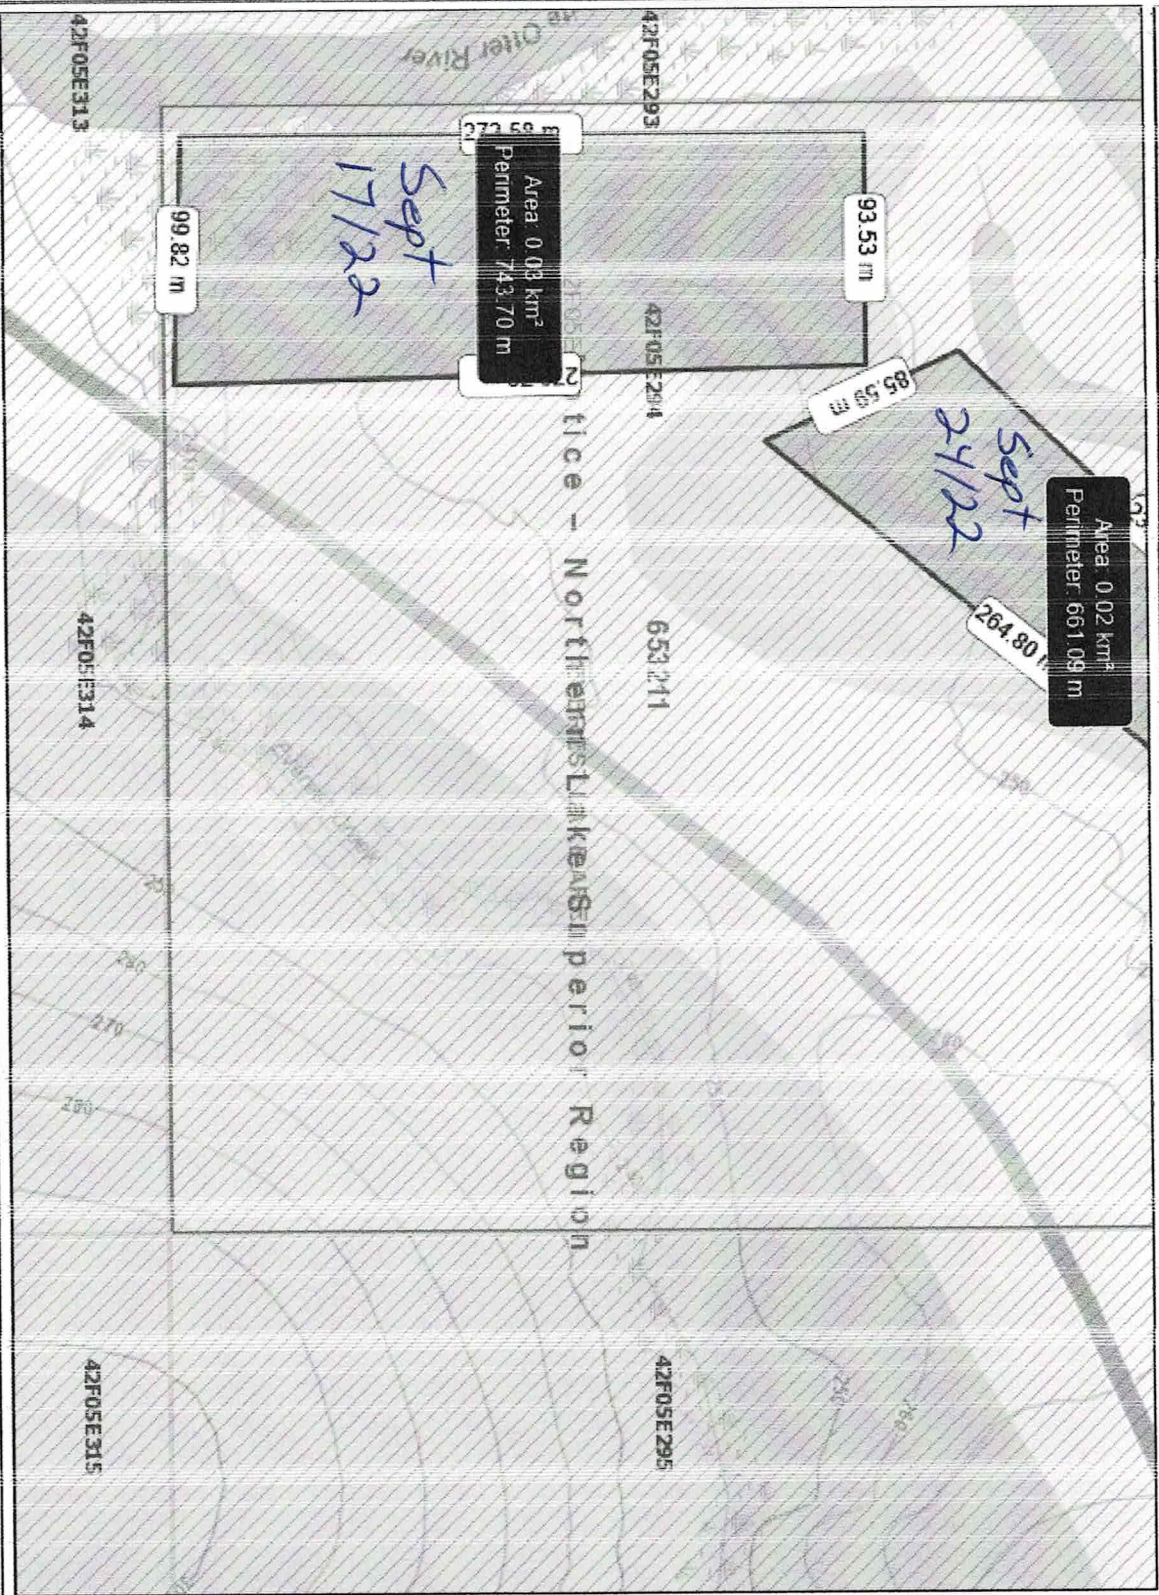

Sept 24/22 - Traversed an area 0.02km² starting from the Sept 17/22 northeast position. Tall grass to the west with sedge all the way to the swamp area. To the northeast underbrush and mixed forest.

Oct 08/22 - Traversed an area 0.02km² starting from the Sept 24/22 southeast corner. Tall grass and underbrush with smaller spruce trees moving northwest towards the riverbank. The river bank is sandy with some gravel, Otter river has large and small rocks with a sand and gravel base. Took interest in large sand deposits in areas with slow moving water and at bends in the river. Due to the heavy rainfall the water levels are too deep and moving fast to safely take hand panning samples.

Oct 9/22 - Traversed an area 0.01km² starting from the Oct 08/22 southeast corner. Moving northwest ground was black earth solid with tall grass and underbrush with small patches of mixed trees. Otter river has large and small rocks with a sand and gravel base. Took interest in large sand deposits in areas with slow moving water and at bends in the river. Due to the heavy rainfall the water levels are too deep and moving fast to safely take hand panning samples.

Oct 29/22 - Traversed an area 0.01km starting from the Oct 09/22 southwest corner. Moving north ground was black earth solid with tall

grass and underbrush with small patches of mixed trees. Otter river has large and small rocks with a sand and gravel base. Took interest in large sand deposits in areas with slow moving water and at bends in the river. Due to the heavy rainfall the water levels are too deep and moving fast to safely take hand panning samples.

Appendix B: Correction Update - Travel Cost

Report #5733

Transaction I.D. 96989

Claim # 653211 and #743706

Lou Paleczny - Prospector Licence # 2001922

Client # 10006379

Mileage claimed at the rate of 0.68 cent per Km as per the Government of Canada's Automobile and Motor Vehicle Allowances.

For the Dates listed in B-001 mileage claims for travel to mining claims 653211 and 743706 and back home. Mileage was calculated using Avenza maps measuring tool.

B-001:

Sept 17, 2022 to claim 50km, return home 50km

Sept 24, 2022 to claim 50km, return home 50km

Oct 08, 2022 to claim 50km, return home 50km

Oct 09, 2022 to claim 50km, return home 50km

Oct 29, 2022 to claim 50km, return home 50km

Total Kms driven - 500km

Rate per Km - 0.68 cent

Total cost \$340.00

Total mileage cost for driving to perform work at the Lemay Road Property, Big Pic Forest mining claim is \$340.00 for 5 days.
