Cutting and clearing of trees.

I hired Bob Miller and his wife, also Anne Noble to help me cut and clear off five outcrops. It took us six days, about six hours per day. We are a little old for this work, but we got it done.

Sept 26/2000

I Richard E Bain drove from Huntsville to Lount Township, 90km to assist in the bulldozing of six outcrops on five claims in Lount Township.

We worked about eight hours (Mike Cossec) resident geologist said we had done an excellent job. The bulldozing costs were very reasonable, they said they are looking for work in the future.

See maps from (AI) to (Ab)

For location on claims see map 7.

Sept 27/2000

I drove to J. S Construction and paid them for their work. Please find receipt for \$505.57.

Sept 30/2000

Mike Cossec wanted the outcrops washed down but there was no water nearby, so Anne and I swept them off with brooms, it worked well, as Mike said, it was an excellent job. It took the two of us eight hours, it was a good job the soil was dry.

See maps (AI) to (Ab) for outcrops swept off, and map 7 for location of claim.

Oct 25/2000

On this day (Mike Cosco) resident geologist came to the claims, to look over the work we had done, he said we had done an excellent job.

Mike thought the grade of garnet was the best he had seen, he said it might take a couple of years to sell it, as there isn't a big demand for garnet.

All outcrops have garnet, some more than others, have gneiss mixed with the garnet, also calcite. This is shown on all maps marked from (B1) to (B6). Map #7 will show location of outcrops on claims.

D

Richard E Bain Lic # C37981

There is a total of five claims.

I have drawn 7 maps - 6 maps are outcrops, map #7 shows the location of the outcrops on the claim eg - (AI) outcrop should show you the approx. length and width of the area cut and cleared, done so that the bulldozer operator would know where to push off the top soil. These areas are marked on the map as (ACB - area cut and bulldozed, also the dates we did the cutting and the date that the bulldozer worked, the date that we swept. Each outcrop has a claim number and to find out where (AI) outcrop is refer to map (#7)

All maps with B in front of the number, eg. (BI) refer to the type of mineral or rock found on each outcrop.

It took me about two days to draw up the maps. I hope they are to your satisfaction.

Maps (A1) to (A6)
