2.18346

After finding the anomaly next to pipeline in 1996 and sending in an assessment report.

We prospected to the south & found copper pyrite in the ravine. We next prospected to the west. Between first anomaly & Bernice Lake we found outcroppings showing small amounts of copper.

To the north we found an anomaly at the claim post on the pipeline.

We started on the south end of Bernice Lake we were waiting on permission to clear & strip a small area where we found another anomaly. We had to quit working because of weather.

Stripping with D 6. Tractor

I went North of the first anomaly I found & continued to strip an area about 70 x 40 meters to see how far the mineral showing went. I drilled a couple of pop holes & found more C.V. assayed at 3.74 When the showings went out of sight. I prospected to the N.E. corner post of claim 1214928 & found more C.V. in face rock beside & to the North of the claim post. I stripped an area there about 30 x 45 meters. I broke off samples with a sledge hammer & had one assay of 0.93 C.V. I also stripped an area between first anomaly beside pipe line & the west side of the road & Bernice Lake & found more showings of C.V. in granite & Diabase an area about 100 x 40 M. We are still prospecting & working in the general area

Trenches #1 & 2 are on the sides of the road. Visible from the road. Cliff Guppy
