Assays/Sample Descriptions

Introduction:

A field exploration program was conducted in the Autumn of 1996 and 1998 by D.L. Goddard & associates and Redstar Resources Corporation on the Jessie Lake Property in Strathcona Township, Temagami Ontario.

The results of this program are summarized in this report.

Location:

The Jessie Lake Property is located in Strathcona Township in the village of Temagami approximately (see Redstar Claim Map for Location) 100 kilometers north of the City of North Bay in northeastern Ontario.

Access/Infrastructure:

The Jessie Lake Property straddles Highway 11 (Trans-Canada Highway northern route) the Trans-Canada Pipeline and the Ontario Northland Railway. The property contains several powerlines, a telephone line, a secondary roads numerous trails, and a Marina. water access is abundant.

The availability of support services, municipal services and housing, and skilled labour is excellent.

In short, the Jessie Lake Property has tremendous access and infrastructure to support exploration and mining initiatives.

KANICHEE
(Northern Platinum Ltd)
2,060,000 tons grading 0.4% copper
0.25% nickel

LECKIE
(Stroud Resources)
Reserves: 405,000 tons grading 0.20 oz/t gold

SHERMAN MINE
(Dofasco and Tetapaga Mining Company)
Production: 25,000,000 tons of iron concentrate

DIADEM/ O' CONNOR
(Teck Corporation)
Reserves: 500,000 tons grading
0.50% copper, 0.10% nickel

REDSTAR RESOURCES CORP.
CLAIM MAP
TEMAGAMI REGION
September 1997

Work History:

The land in which the Jessie Lake Property covers has seen very limited exploration. The land was frozen to exploration due to the Temagami Land Caution from 1973 to Autumn 1996 when the land came open to development and was subsequently staked by Gino Chitaroni, the report author, D.L. "Locky" Goddard and associates and partners Kevin Filo and David Jones. Later in the 1997, the ground was sold to the Vancouver stock exchange listed, Redstar Resources Corporation of Vancouver, British Columbia which is still the current owner of the Jessie Lake Property.

Over the past 40 years, the Temagami region has seen several significant mining operations and exploration programs in the immediate area near the Jessie Lake Property. The past mine operations include: Temagami Copperfields Mine (copper-nickel precious metals), Teck Corporation; Sherman Mine (iron-ore), Dofasco, Kanichee Mine, (copper-nickel precious metals) Northern Platinum Ltd.; while significant ore resource/reserves exist at the Leckie Deposit (gold), Stroud Resources Ltd., and the Diadem Deposit (copper-nickel), Teck Corporation.

The Diadem Deposit, which is located adjacent to the Jessie Lake Property, contains 500,000 tons @ 0.50% Copper & 0.1% Nickel.

The Copperfields Mine (copper-nickel deposit) which is similar in nature to the Diadem Deposit is roughly located 15 kilometers southwest from the Jessie Lake Property.

The other significant exploration projects in the Temagami area are currently being conducted by: Falconbridge Ltd., Silver Century Explorations Inc., Wabana Explorations Inc., Bargold Resources Ltd., Curion Ventures Corp., Sedex Mining Corp. and Teck Corporation.

The best way to describe the work history of the Jessie Lake Property, is that of being underexplored.

Property:

The Jessie Lake Property contains 36 unpatented claims (for the most part) or 97 units and totals approximately 3,880 acres or 1552 hectares in size. (See Appendix A and "claim map" in back pocket of the report)

Geology:

Briefly, the Jessie Lake Property is mainly covered by archean aged granitoid rocks of the Iceland Lake Pluton, felsic-intermediate metavolcanic rocks and mafic-intermediate metavolcanic rocks with some felsic intrusive rocks (Quartz Porphyry) and mafic-ultramafic rocks (Diorite-Gabbro).

Future reports on the property will elaborate further in detail on the Geology.

1996-1998 Exploration Program:

1996 Program

In 1996, D.L. Goddard and associates conducted a preliminary exploration program on the Jessie Lake Property that included; prospecting, sampling, assaying, blasting, and hand-stripping. A total of 39 samples were collected for assay.

The program concentrated on covering the ONR tracks area, Pingue Lake area, Strathcona Road on claim # 1220048, 1214062, 1217615 and 1214064 in Strathcona Township.

The program was conducted sporadically over a one month period September 22, 24, 25; Oct 7, 8, 9, 10, 14, 17, 1996. Please refer to the Sampling Map located in the back pocket of this report.

1998 Program

In 1998, Redstar Resources Corporation re-traced much of the Goddard work in its exploration program conducted from September 1st – 20th. The program actively explored the property on September 8, 9, 10, 16, 1998 covering claim # TRt 5591, 122048, 1214062 and 1217615 in Strathcona Township. This work was sub-contracted to Blackstone Development Inc. and conducted by Locky Goddard under the guidance of Gino Chitaroni for Redstar Resources Corp.. The work consisted of prospecting and sampling and then summarized in a report. The program collected 25 samples for assay purposes.

All samples, containing both of the chip and grab type: were tagged, bound by electrical tape, labelled and shipped to Swastika Laboratories, located in Swastika, Ontario near the Town of Kirkland Lake for assaying purposes. (See Appendix C for Assays and Sample Descriptions)

1996-1998 Prospecting Summary

Mineralization:

No massive sulphide mineralization was encountered thus far. However, no attempt was made to follow-up the extension of the Diadem Cu-Ni sulphide deposit (Teck Corporation) on the adjacent ground west of the northern portion of the Jessie Lake Property held by Redstar Resources Corporation.

There were several areas of interest encountered during this program for disseminated sulphide mineralization. Finely disseminated pyrite was the predominant sulphide mineral present in all of the rocks; averaging, in the samples taken for assay between 1-5%; and can go as high as 20% py. Minor amounts of chalcopyrite and possibly arsenopyrite were also evidenced.

There was no evidence of magnetic mineralization (eg magnetite, ilmenite or pyrrhotite) in any of the samples taken.

Structure/Alteration:

The rocks appeared to lean toward a felsic/acidic rock assemblage; possibly, the rock-types are of a dacite-rhyolite nature mixed in with some intermediate-basaltic rocks.

During this phase of prospecting, the alteration evidenced was kaolinite and carbonate, heavy bleaching/silicification, sericite and some minor chlorite; also found were minor grey "quartz-eye" features in some of the felsic rocks. Some quartz veining was found but not prominent; neither was there any significant sulphide mineralization with the quartz veining found to date.

Iron gossan is prominent, and can be best characterized as "fair to moderate" on average in these felsic suite of rocks.

Shearing is common and strong in the felsic rocks located on the property. Sulphide mineralization is present in these sheared rocks along with Iron gossan and kaolinite-carbonate alteration by-products. The overwhelming sulphide present is pyrite.

At this point in the exploration program no attempt was made to investigate the quartz porphyry rocks (possible felsic volcanic vents) located on the property.

Recommendations:

In the next phase of exploration, prospecting/bedrock sampling could continue concentrating on several areas or points of interest; which are as follows:

- 1) Quartz Porphyry felsic vents rocks (Refer to the Briggs-Strathcona Provincial Government Geology Map) should be investigated.
- 2) Teck Corporation's Diadem Copper-Nickel Deposit may extend eastward onto the Jessie Lake Property. It is recommended that that prospecting be targeted to find this possible Diadem Cu-Ni sulphide zone extension. It is further recommended that this phase of exploration also check for other metals eg. Cobalt, Gold, Silver and Platinum Group Metals that may associated to this type mineralization (similar to Teck Corporation's Copperfields Mine "Temagami Copper Mine" that operated in the 1960's and into early 1970's several kilometers down strike of the Diadem Deposit in a southwesterly direction).
- 3) Continue to explore any previously discovered, exposed mineralization; especially, if past sampling proved up any significant economic metal assay numbers.
- 4) Explore any unexplored area on the property.

Should the next phase of prospecting prove out to be encouraging; any discovered mineralized shear zone could be power stripped, washed, sampled and geologically mapped.

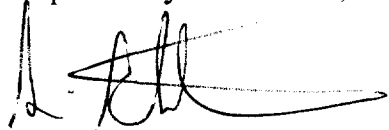

It is also recommended that an exploration survey grid be put in place for control; followed up by several ground geophysical surveys, for example: magnetics (walkmag), and HLEM horizontal loop (Maxmin method) electromagnetics using several frequencies and possibly VLF EM as a back-up. Geological mapping could also be contemplated as an exploration tool at the same time.

From what I have seen and know of this property I believe the final electromagnetic method employed for definitive diamond drill target selection will be Induced Polarization (I.P.) electromagnetics. There appears to be strong evidence to support IP geophysical surveying based on the known disseminated sulphide (pyrite) mineralization already discovered on the property. I believe Maxmin and VLF electromanetic surveying along with manual prospecting will develop numerous target areas required for follow-up IP surveying.

After employing these recommended exploration methods I foresee no real problem in the program eventually generating several to numerous legitimate diamond drill targets.

In my opinion, "Gold" potential is the main priority of this exploration program. However, there is good evidence for the potential to discover a poly-metallic Copper-Nickel deposit on the Jessie Lake Property as well.

Respectfully submitted,

Gino Chitaroni, B.Sc. Geology
Blackstone Development Inc.

Statement of Qualifications

I, Gino Chitaroni, reside and live in Coleman Township near the Town of Cobalt Ontario; and do hereby declare the following statements as factual and true.

- 1) Gino Chitaroni is a qualified Geologist, B.Sc. and Mining Technologist.
- 2) Gino Chitaroni is a licensed Prospector in the Province of Ontario since 1987.
- 3) Gino Chitaroni is Fellow of The Geological Association of Canada Membership #F6874.
- 4) Gino Chitaroni is a graduate of the Haileybury School of Mines (Northern College), Haileybury, Ontario, Canada; and Lake Superior State University, Sault Ste. Marie, Michigan, United States of America.
- 5) Gino Chitaroni is employed as the President and Geologist with the contractor company, Blackstone Development Inc.; located at 50 Silver Street, P.O. Box 699, Cobalt, Ontario.
- 6) Redstar Resources Corporation, a publicly listed company on the Vancouver Stock Exchange is headquartered in Vancouver, British Columbia, Canada and owns the Jessie Lake Property.
- 7) Redstar Resources Corporation has contracted the services of Blackstone Development Inc. and Mr. Gino Chitaroni to manage its field exploration program on the Jessie Lake Property in Strathcona Township, Temagami Ontario, Canada.
- 8) Gino Chitaroni/Blackstone Development Inc. was present on, accountable for, and involved in all aspects of the exploration program conducted on the "The Jessie Lake Property".
- 9) Gino Chitaroni does have a financial/benefication interest in the Jessie Lake Property, as the said property was purchased by Redstar

Resources Corporation from Gino Chitaroni and his partners.

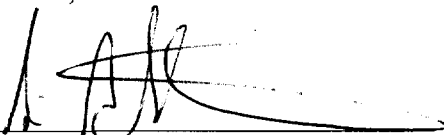

- 10) Blackstone Development Inc. will earn a common stock ownership for services provided on the Jessie Lake Program but not a direct interest ownership in the Jessie Lake Property.

Date: September 20, 1988.

Place: Cobalt, Ontario

Signed:

Gino Chitaroni, B.Sc. Geology

A .5 gm. sample is digested with 2 ml of 3:1 HCL/HNO₃
 at 95 C. for 90 min and diluted to 10 ml with DI H₂O
 This method is partial for many oxide materials

1998 Prospecting & Sampling Program

“The Jessie Lake Property”
Strathcona Township
Temagami, Ontario

Sample Description:

Map#	Sample #	Location	Description
1	P8151	Claim # 1214064 112 m west of post #1	Felsic rock shear zone carbonated kaolinite alteration present 6-8% py in fine disseminations semi-massive (grey pyrite) streaks are present; check for possible arsenopyrite; Fe gossan. grab/chip?
2	P8152	Claim # 1214064 114 m west of post #1	Ditto, as above less py 2-4% grab/chip?
3	P8153	Claim # TRT 5591 Strathcona Road, 70 m west of Highway 11	Ditto, heavy Fe gossan, kaolinite alteration; py 2-4%; chip sample.
4	P8154	Claim #TRT 5591 Highway 11 west side 30 m south of the Strathcona Road	Ditto; no fresh exposure, grab sample; yellowish to brown Fe gossan; grab.
5	P8155	Claim #1214062 14 m north of post #2 east side of the old Ferguson Highway	Felsic metavolcanic rock Fe gossan, some py; chip sample.

6	P8156	Claim #1214062 Same as #5 P8155	Ditto, minor py, Fe gossan; chip sample.
7	P8157	Claim #1214062 74 m north of post #2 East side of Highway	Ditto, fair kaolinite and Fe gossan; minor pyrite; grab- chip.
8	P8158	Claim #1214062 As above #8 P8157	Ditto, with some chlorite 2-3% py +/- cpy? Pale grey colour; kaolinite alteration and Fe gossan are evident; grab sample?
9	P8159	Claim # 1214062 20 m Northwest of post #2	Ditto, some minor qtz eyes, alittle Fe gossan with minor 0.1-.3% py +/- cpy & aspy? Grab/chip.
10	P8160	Same as #9 P8159	Ditto, exhibiting rounded grey quartz eyes; no apparent mineralization but some Fe gossan present; grab/chip.
11	P8161	Claim # 1214062 70 m northwest of post #2	Ditto, kaolinite alteration is present; malachite (cpy) is evident; py?, Grab.
12	P8162	Claim #1214062 Pingue Lake Road	Carbonatized sheared felsic pale/brown coloured metavolcanic rock; fairly heavy Fe gossan, replacing sulphide grains possibly pyrite? 1%+? py; chip sample.
13	P8163	Same as #12 P8162 North side of Pingue	Ditto, fairly heavy Fe gossan; diss. 1%? py;

		Lake Road	chip sample.
14	P8164	Claim # 1217615 Pingue Lake Road north side	Intermediate-felsic rock 1% py in fine disseminations, note: some lichen was on the sample; chip sample.
15	P8165	Claim # 1217615 South end of rock cut ONR "rail tracks" 8 m north oif post #2	Felsic-intermediate volcanics, no apparent mineralization; grab/chip sample.
16	P8166	As above #15 P8165 80 m north of post #2	Felsic volcanic rock, pale yellow stain accompanied by Fe gossan on surface; finely disseminated pyrite 4-6% + arsenopyrite? Chip sample.
17	P8167	Claim # 1217615 105 m north of post #2	Quartz Vein, milky white with no mineralization evident; chip sample.
18	P8168	Claim # 1217615 East side of the ONR "rail tracks" south of Pingue Lake	Felsic-intermediate volcanics, no mineral. grab/chip sample.
19	P8169	Claim # 1217615 North of Pingue Lake	Intermediate -felsic volcanics minor 1% py, chlorite alteration; Fe gossan present on surface. Note: lichen is on rocks. Chip sample.
20	P8170	Claim # 1217615 North of Pingue Lake at edge of lake	Ditto, slightly more felsic; .5-2.0% py and possibly cpy? Grab.

21	P8171	Claim #120048 Ag/Au showing on the ONR "rail tracks" 180 m south of post #4 at south end of rock-cut	Felsic volcanics with minor narrow quartz stringers; very finely disseminated py 1-2%; Grab sample.
22	P8172	Claim #120048 145 m from post #4 in rock-cut on the ONR "rail tracks"	Ditto; a 6 foot or (1.5 –2.0) m sheared brown-yellow stained; finely disseminated py .5% -1% possibly accompanied by some arsenopyrite; grab/chip.
23	P8173	Claim # 120048 120 m south of post #4 in rock-cut	Grey felsic dyke 1.0 m wide with a strike trending NW-SE, minor pyrite; grab/chip sample.
24	P8174	Claim # 120048 Schist zone, 100 m south of post #4 in rock cut	Schist zone next to 8 ft wide diabase rock cap steeply dipping strike NW-SE, 1-3% py finely disseminated +/- cpy; grab/chip sample. Felsic rock..
25	P8175	Claim # 120048 50 m south of #4 post at pipeline and ONR tracks	Felsic volcanics with 3-5% py + minor cpy finely well disseminated; chip sample.

I, Gino Chitaroni, do hereby certify that the above work credits are eligible under subsection 7 (1) of the Assessment Work Regulation 6/96 for assignment to contiguous claims or for application to the claim where the work was done.

Signature of Registered Holder or Agent Authorized in Writing Gino Chitaroni Date Sept 20 1998

6. Instructions for cutting back credits that are not approved.

Some of the credits claimed in this declaration may be cut back. Please check (✓) in the boxes below to show how you wish to prioritize the deletion of credits:

- ☐ 1. Credits are to be cut back from the Bank first, followed by option 2 or 3 or 4 as indicated.
- ~~☒~~ 2. Credits are to be cut back starting with the claims listed last, working backwards; or
- ~~☒~~ 3. Credits are to be cut back equally over all claims listed in this declaration; or Yes
- ☐ 4. Credits are to be cut back as prioritized on the attached appendix or as follows (describe):

Note: If you have not indicated how your credits are to be deleted, credits will be cut back from the Bank first, followed by option number 2 if necessary.

Food			120.00
Gaddard, Blake et al (\$120.00)			
Total Value of Assessment Work			\$ 5050.00

~ \$ 5,050

Calculations of Filing Discounts:

1. Work filed within two years of performance is claimed at 100% of the above Total Value of Assessment Work.
2. If work is filed after two years and up to five years after performance, it can only be claimed at 50% of the Total Value of Assessment Work. If this situation applies to your claims, use the calculation below:

TOTAL VALUE OF ASSESSMENT WORK $\times 0.50 =$ Total \$ value of worked claimed.

Note:

- Work older than 5 years is not eligible for credit.
- A recorded holder may be required to verify expenditures claimed in this statement within 45 days of a request for verification and/or correction/clarification. If verification and/or correction/clarification is not made, the Minister may reject all or part of the assessment work submitted.

Certification verifying costs:

I, Gina Chitarrini (please print full name), do hereby certify, that the amounts shown are as accurate as may reasonably be determined and the costs were incurred while conducting assessment work on the lands indicated on the accompanying Declaration of Work form as Agent / Recorded Holder (recorded holder, agent, or state company position with signing authority) I am authorized to make this certification.

Dear Sir or Madam:

Submission Number: 2.18892

Status

Subject: Transaction Number(s):	W9870.00542 Approval After Notice
	W9870.00543 Approval After Notice

We have reviewed your Assessment Work submission with the above noted Transaction Number(s). The attached summary page(s) indicate the results of the review. **WE RECOMMEND YOU READ THIS SUMMARY FOR THE DETAILS PERTAINING TO YOUR ASSESSMENT WORK.**

If the status for a transaction is a 45 Day Notice, the summary will outline the reasons for the notice, and any steps you can take to remedy deficiencies. The 90-day deemed approval provision, subsection 6(7) of the Assessment Work Regulation, will no longer be in effect for assessment work which has received a 45 Day Notice. Allowable changes to your credit distribution can be made by contacting the Geoscience Assessment Office within this 45 Day period, otherwise assessment credit will be cut back and distributed as outlined in Section #6 of the Declaration of Assessment work form.

Please note any revisions must be submitted in DUPLICATE to the Geoscience Assessment Office, by the response date on the summary.

If you have any questions regarding this correspondence, please contact Lucille Jerome by e-mail at lucille.jerome@ndm.gov.on.ca or by telephone at (705) 670-5858.

Yours sincerely,

Work Report Assessment Results

Submission Number: 2.18892

Date Correspondence Sent: February 22, 1999

Assessor: Lucille Jerome

Transaction Number	First Claim Number	Township(s) / Area(s)	Status	Approval Date
W9870.00542	1214064	STRATHCONA	Approval After Notice	February 02, 1999

Section:
9 Prospecting PROSP

The revisions outlined in the Notice dated December 15, 1998, have not been fully corrected. There were no revisions provided for the Physical work portion. No assessment work credit is provided for the Physical work portion.

Assessment work credit has been redistributed, as outlined on the attached Distribution of Assessment Work Credit sheet, to better reflect the location and value of work.

Transaction Number	First Claim Number	Township(s) / Area(s)	Status	Approval Date
W9870.00543	TRT5591	STRATHCONA	Approval After Notice	February 02, 1999

Section:
9 Prospecting PROSP

Administration costs are not eligible for assessment work credit. A portion of the claim for expenses under Blackstone Development have been reduced from the total submission.

Assessment work credit has been redistributed, as outlined on the attached Distribution of Assessment Work Credit sheet, to better reflect the location and value of work.

WORK PERMITS FOR MINERAL EXPLORATION ACTIVITIES

11111111 September 15, 1998

The area shown as SKYLINE RESERVE and the land covered by the waters of LAKE TEMAGAMI on this map was subject to Ontario Regulation 516/98 made under the Public Access to Private Land Act. Depending on the type and timing of your exploration work you may require a Work Permit. For further information please contact: Geoffrey Meyer, Regional Road and Geologist at (705) 967-5242 or full-time Regional Manager at (705) 967-5242.

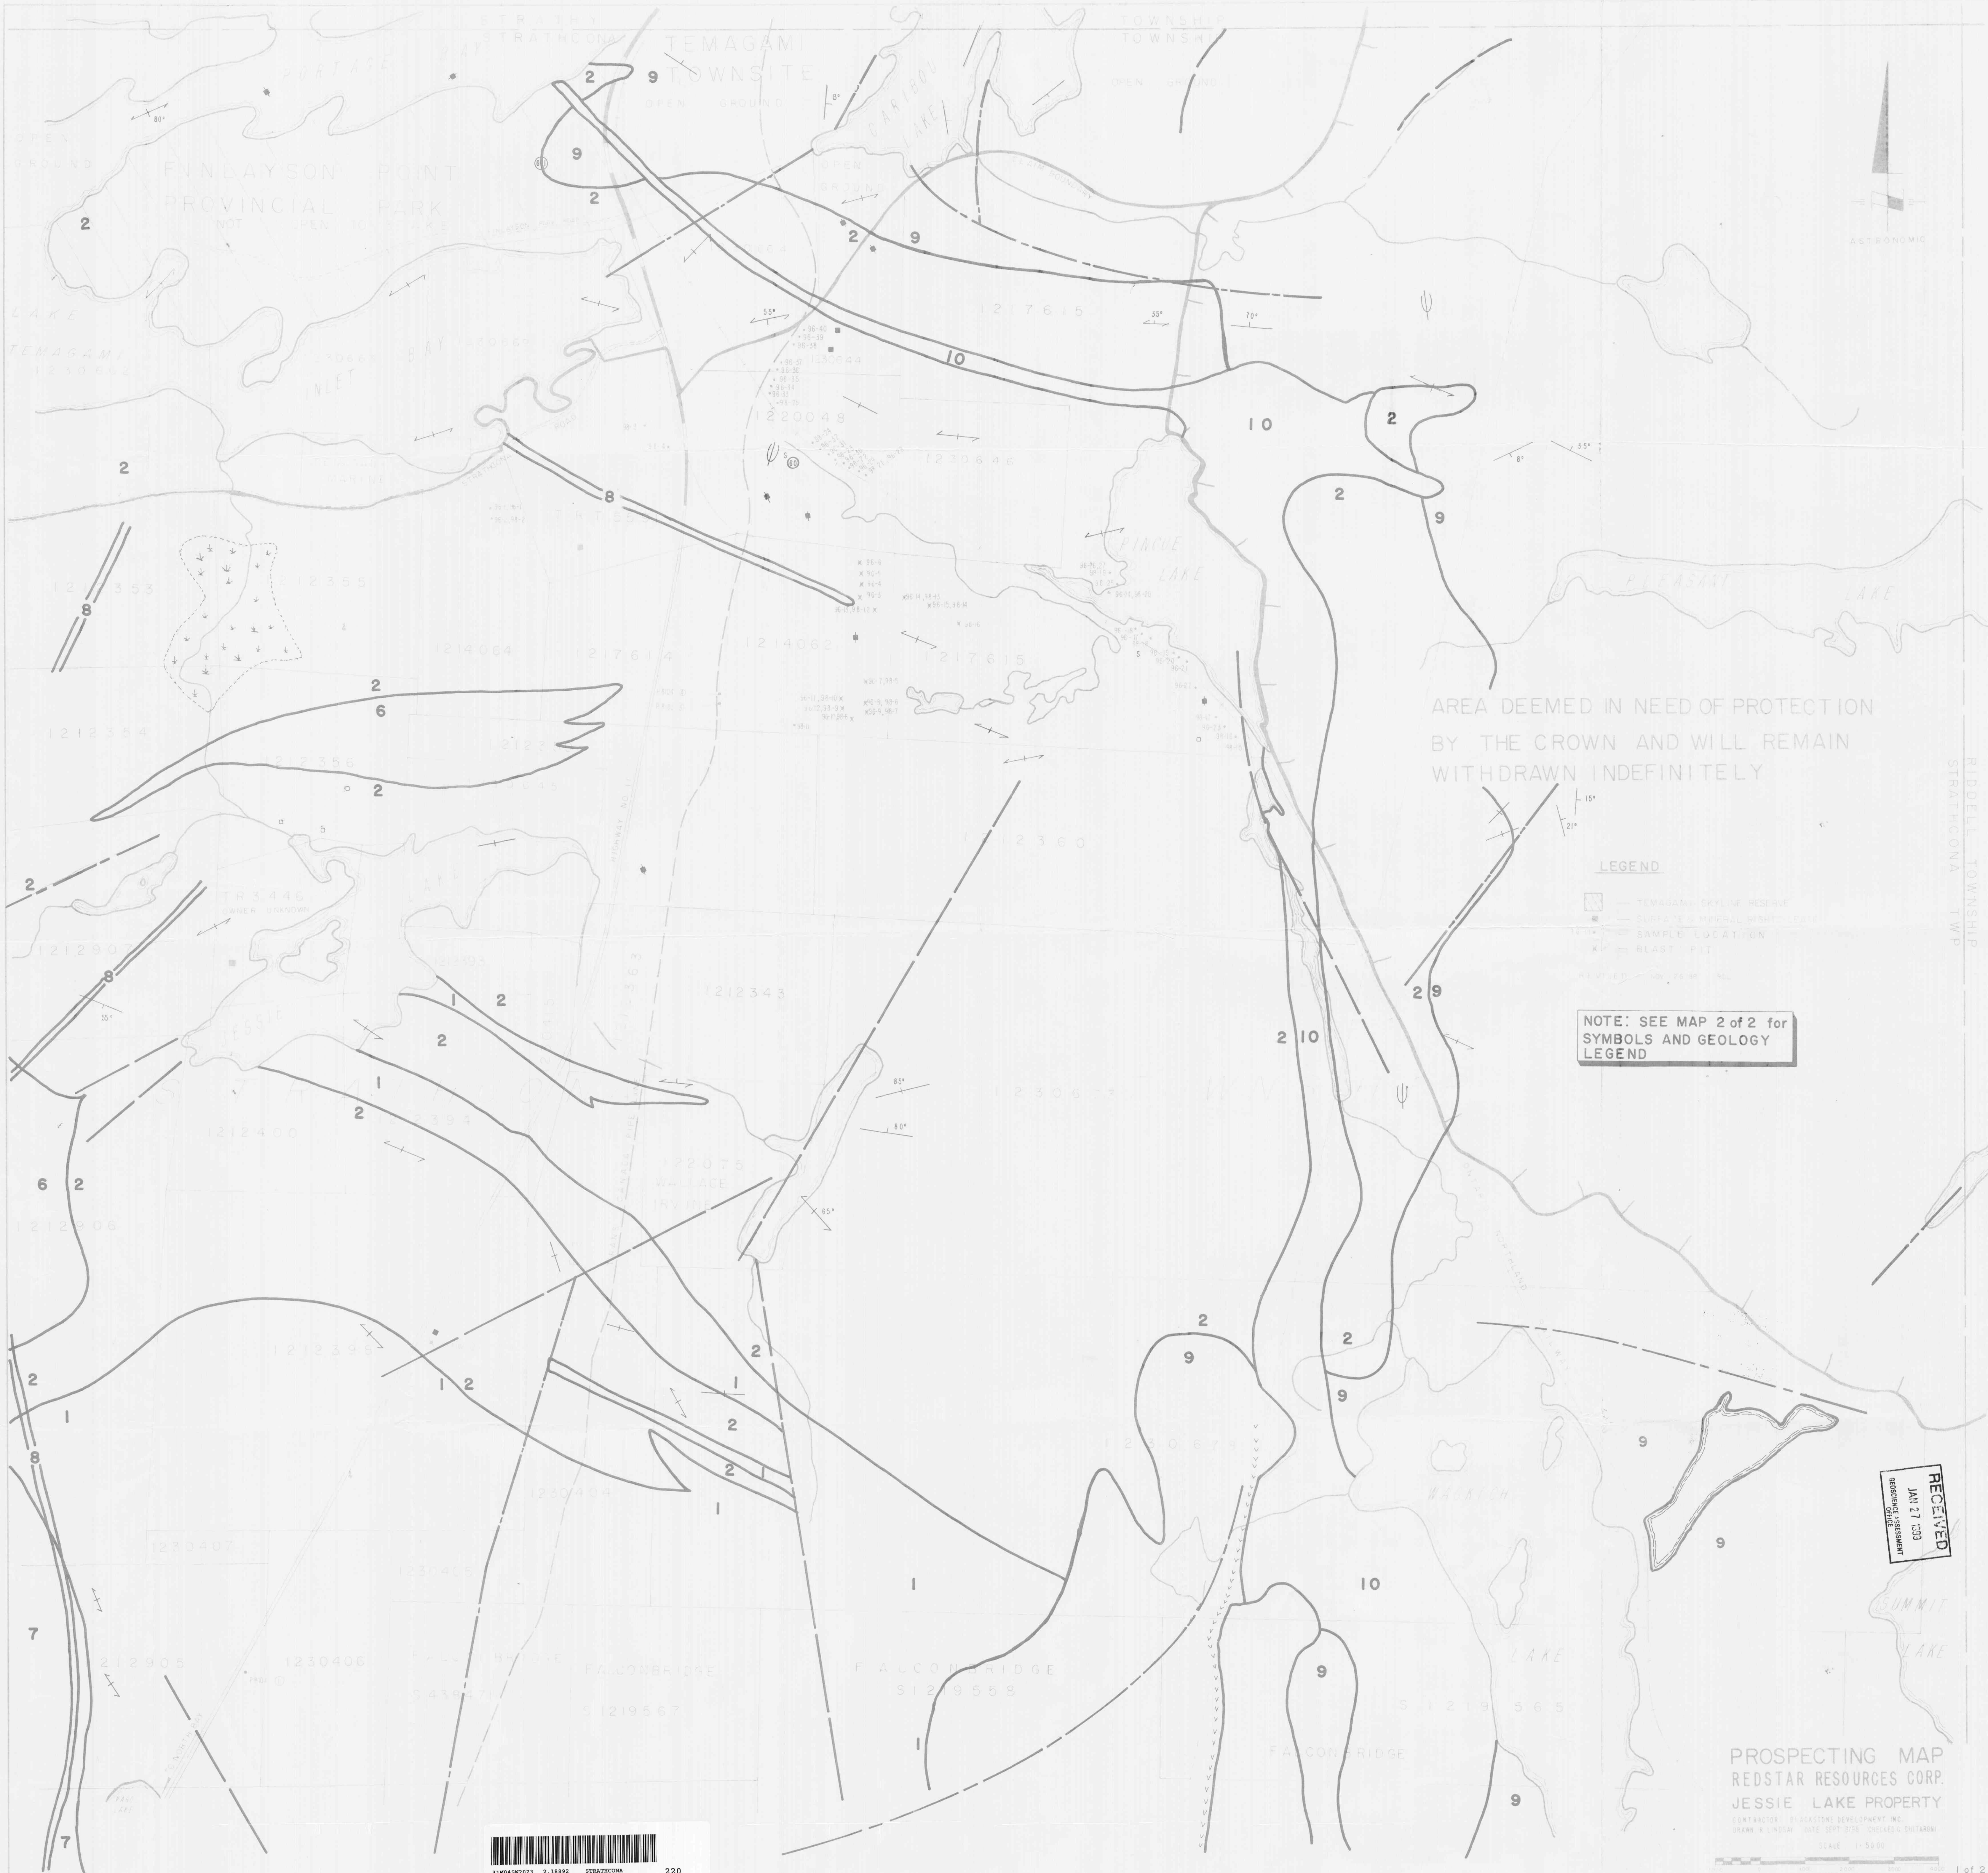

NOTICE

Pursuant to Section 35 of the Mining Act, R.S.O. 1990, the MINING AND SKYLINE RESERVE RIGHTS of the area shown as SKYLINE RESERVE and the land covered by the waters of LAKE TEMAGAMI as indicated on this map are hereby RE-OPENED TO PROSPECTING AND STAKING OF CLAIMS. This Order comes into effect on October 27, 1998 at 9:00 a.m. Eastern Standard Time, which is equivalent to 9:00 a.m. local time. These lands will be subject to Ontario Regulation 516/98 made under the Mining Act. ALL CLAIM STAKING ACTIVITIES IN THIS AREA are subject to this new regulation. MAJOR AMENDMENTS TO NORMAL STAKING PRACTICES HAVE BEEN IMPLEMENTED FOR THIS AREA. Consult and understand these amendments prior to carrying out any staking in this designated area. For further information please contact the Provincial Records Office at 1-888-415-9844.

PLEASE NOTE: THE ISLAND ON LAKE TEMAGAMI ARE WITHDRAWN AND WILL NOT BE OPEN TO PROSPECTING AND STAKING OF CLAIMS.
