Lebel Twp., Ontario

AUG 19 1986

MINING LANDS SECTION

This submission is made in support of proof of expenditures for assessment work under Sec. ~~26-18~~²⁶⁻¹⁹ of the Mining Act, and to present the data accumulated by these expenditures.

The work was performed on claims L 531042 and -43, Lebel Twp, Larder Lake Mining Division, Ontario. The claims are in a group of nine contiguous claims registered in the name of R. W. Lawrence, Lic. T 1782, c/o Eden Roc Mineral Corp., Suite 606, 199 Bay Street, Toronto, M5J 1L4. The other seven claims are: L 531082, L 642592-94, L 643668-69, and L 531691.

The field work was performed by the writer (G. E. Parsons), of 136 Chatsworth Drive, Toronto, M4R 1S2, and F. L. Hodgins, during the period July 6-23, 1986. Time sheets are included in the attachments.

The assays for gold were performed by Swastika Laboratories Limited, and their Certificate of Analysis is attached.

The exploration being reported on here was a follow-up of a trenching programme using a power shovel. The present programme consisted of power washing (with a Honda water pump) of soil left by the power shovel on exposed rock, surveying and mapping the trenches in detail, and followed by sampling and assaying of the exposed mineralization for gold.

The programme is a continuation of one conducted on a gold find made and explored in 1984. The northern limits of the find were not uncovered at that time because it extended into a heavy talus slope. The talus and steep terrain necessitated the use of a power shovel capable of moving material, which was not available at that time.

A plane table and alidade were used to map the trenches and geology of the exposed rock. Elevations were carried during this survey and are presented as 10-ft. spaced contours on the attached map.

Seventeen chip samples were taken across exposed mineralization and adjacent rock. The locations of the samples are shown on the attached map and the assay results tabulated there.

The accompanying map presents all the data and is entitled:

Assay
and
Trench Survey Plan
R. W. Lawrence Claims,
Lebel Twp., Ont.
1 in. = 20 ft.

along with the following attachments:

- (1) Certificate of Analysis, Swastika Labs.,
dated July 21, 1986
- (2) Proof of payment of Swastika Labs. invoice
- (3) Proof of payment of G. E. Parsons Ltd. invoice
for services (with time sheet)
- (5) Proof of payment to F. L. Hodgins and record
of days worked.

G. E. Parsons

Mining Lands Comments

Clarence Kustra:

A plane table survey was carried out in addition to trench mapping and assaying. I think this could be considered a Property Evaluation, with all of the costs applicable. Do you agree? If so, do you feel the report is adequate?
