Here is a sketch of claim 1110757 which I prospected.
I ribbon the line and looked quite alot between lines etc.
I marked the outcrop the best I could for your information.
I did not come up with anything of value in that claim.

*Cesard Bartowick
+
Alex Mettiss*

*P.S. Enclosed are two copies of this prospecting
Sketch. We might ~~to~~ do more work
around anomaly #1 on the outcrop that is
close by. So we will not ^(submit) this for the
moment.*

Thank you

Here is a sketch of the drill Hole B-1-91 in Elliott Township.

As you see we had trouble in the overburden boulder etc. We recovered only 171' of bedrock.

As I took the recommendations of the Geophysicist. Maybe we should have went steeper with the hole 55° or 60° and angle east a few degrees. We have recovered some sections, with a few pyrite which I assay with (nil) result. Also a dyke of porphyry of 8' which I checked for gold with (nil) result. I will try to meet Remi Belanger soon (Geophysicist) and see what he thinks of the result of the drill hole.

Gerard Bostwick

Wes Mathies

NOTE:

WE ARE ENCLOSING
TWO COPIES OF THIS WORK
ON ANOMALY #4 WE ARE
IN THE PROSESS OF DOING
MORE WORK ON IT, SO WE
WILL NOT SUBMIT ANY
WORK ON THIS ANOMALY FOR
A WHILE. (to mining Department)

Thank you

L-11107 56
 SHOWING SULPHIDE
 I SEE ZINC + COPPER

AT THE MOMENT we are working on this showing
 (we are) going to do more plugger work on it, and
 blasting, and sampling. Remy Belanger thinks it
 is pipe from dept. we might not be on the top
 of it yet, but closed all things. we will let you know
 later on the result of this work. Thank you.

P.S. quite a lot of dirt has to be removed from
 this anomaly.
