Dear Sir or Madam

**Subject: Approval of Assessment Work**

We have approved your Assessment Work Submission with the above noted Transaction Number(s). The attached Work Report Summary indicates the results of the approval.

At the discretion of the Ministry, the assessment work performed on the mining lands noted in this work report may be subject to inspection and/or investigation at any time.

If you have any question regarding this correspondence, please contact STEVEN BENETEAU by email at [steve.beneteau@ndm.gov.on.ca](mailto:steve.beneteau@ndm.gov.on.ca) or by phone at (705) 670-5855.

Yours Sincerely,

Ron Gashinski  
Senior Manager, Mining Lands Section

Those wishing to stake mining claims should consult with the Provincial Mining Recorders' Office of the Ministry of Northern Development and Mines for additional information on the status of the lands shown hereon. This map is not intended for navigational, survey, or land title determination purposes as the information shown on this map is compiled from various sources. Completeness and accuracy are not guaranteed. Additional information may also be obtained through the local Land Titles or Registry Office, or the Ministry of Natural Resources.

This information shown is derived from digital data available in the Provincial Mining Recorders' Office at the time of downloading from the Ministry of Northern Development and Mines web site.

**WORK REPORT AND NOTES**

Mechanical trenching was undertaken by AMP Inc. on part of the Spanish River Carbonatite Complex (mining claim # S3002843) during the period between Aug. 6 and Aug. 29 of 2002. Mr. Jules Anglehart of Mississauga, Ontario carried out the trenching using a John Deere 310B loader/backhoe. Mr. Anglehart worked on five trenches over 20 days at a rate of \$100.00 / day. 158 hours of machine time were logged at a rate of \$18.75/ hr.

The local flora consists of mixed red and jack pine planted in 1987 with a diameter at breast height of 10 to 12 cm. Trees were stripped back from the trenches approx 1 to 2m or just enough to provide space for the excavated material. A consulting geologist was hired to evaluate the results and the area was toured by MNDM personnel in August 2002.

- Trench 01-02 - Length 30m, depth 1.5m, width 1-2m, overburden: glacial till (sharp sand) ~1m deep, mineralization: continuous 100% crystalline calcite from soft-weathered to hard-marble-like with minor iron stains.
- Trench 02-02 - Length 25m, depth 1.5m, width 1.5m, overburden: glacial till (sharp sand) ~1m deep, mineralization: continuous 100% crystalline calcite from soft-weathered to hard-marble-like with minor iron stains.
- Trench 03-02 - Length 20m, depth 1.5 to 2 m, width 1-2m, overburden: glacial till (sharp sand) ~1m deep, mineralization: continuous 100% crystalline calcite, fairly soft and weathered with minor iron staining.
- Trench 04-02 - Length 15m, depth 1.5m width 1-2m, overburden: glacial till (sharp sand) to depth, mineralization: some strongly weathered calcite within overburden.
- Trench 05-02 - Length 35m, depth 2m, width 2m, overburden: glacial till (sharp sand) from 1 to 1.5m, mineralization: continuous crystalline calcite with banded iron staining.

NOTE: Contiguous link between claim #3002843 and claim #1198344
