Gold ----- 146.02 milligrams

Note: Above gold obtained from sluicing and panning approx. 0.5 cubic yards of material. Due to high water velocity from pump used, the recovery is probably about 65%.

Grade:  $\frac{0.146}{31.1} \times \frac{1}{0.5} = 0.009$  or say 0.01 ounces/ cubic yard.

Assuming a recovery of 65% the heads would be 0.015 oz/yd<sup>3</sup>.

With a 90% recovery of values, the recoverable grade would be ~~0.014 ounces/cubic yard~~ **recoverable grade**

With gold at \$350/oz U.S. the recoverable value per cubic yard would be \$6.37 Canadian. (\$1 Can = \$0.80 U.S.)

Dear Mr. Mathews:

Re: Your letter 1983 03 31 with respect to  
to assaying submitted for assessment work  
credits on Claim S 515437 Hutton Twp.

The cancelled cheques for verification of  
the expenditures of \$84.25 are available, however, subsequent  
work with a back hoe was applied which was more than adequate  
to cover the balance of assessment work requirements. There is  
a credit of 153 days of work performed on this claim.

Therefore, the submissal of the above assay  
charges for assessment credit would be redundant at this date  
and I would prefer to cancel that portion of the filing.

Yours truly,

Oliver T. Maki.
