OME

010

OMSG-I-149

O.M.E.P.

My project consisted of establishing a picket line along the strike of mineralized AREAS AS EXPOSED BY GOSSAN IN float AND bedrock. Favourable AREAS were then stripped AS shown ON MAP. [AREAS 1, 2, & 3].

OUR WORK exposed the NORITE, Sudbury IRRUPTIVE near the contact with granite. All three TRENCHES encountered MINERALIZATION which consisted of PYRITE, PYROXITE AND chALCOPYRITE, AS disseminations AND blebs in the NORITE. Some QUARTZ AND A SMALL AMOUNT of galena was encountered in TRENCH #1, from which our best ASSAYS were received -- -- .279 AU. Nickel, COPPER minerals that would be of economic significance were NOT encountered, BUT MORE WORK is planned FOR 1987.

Thank you  
Dorinda Brown

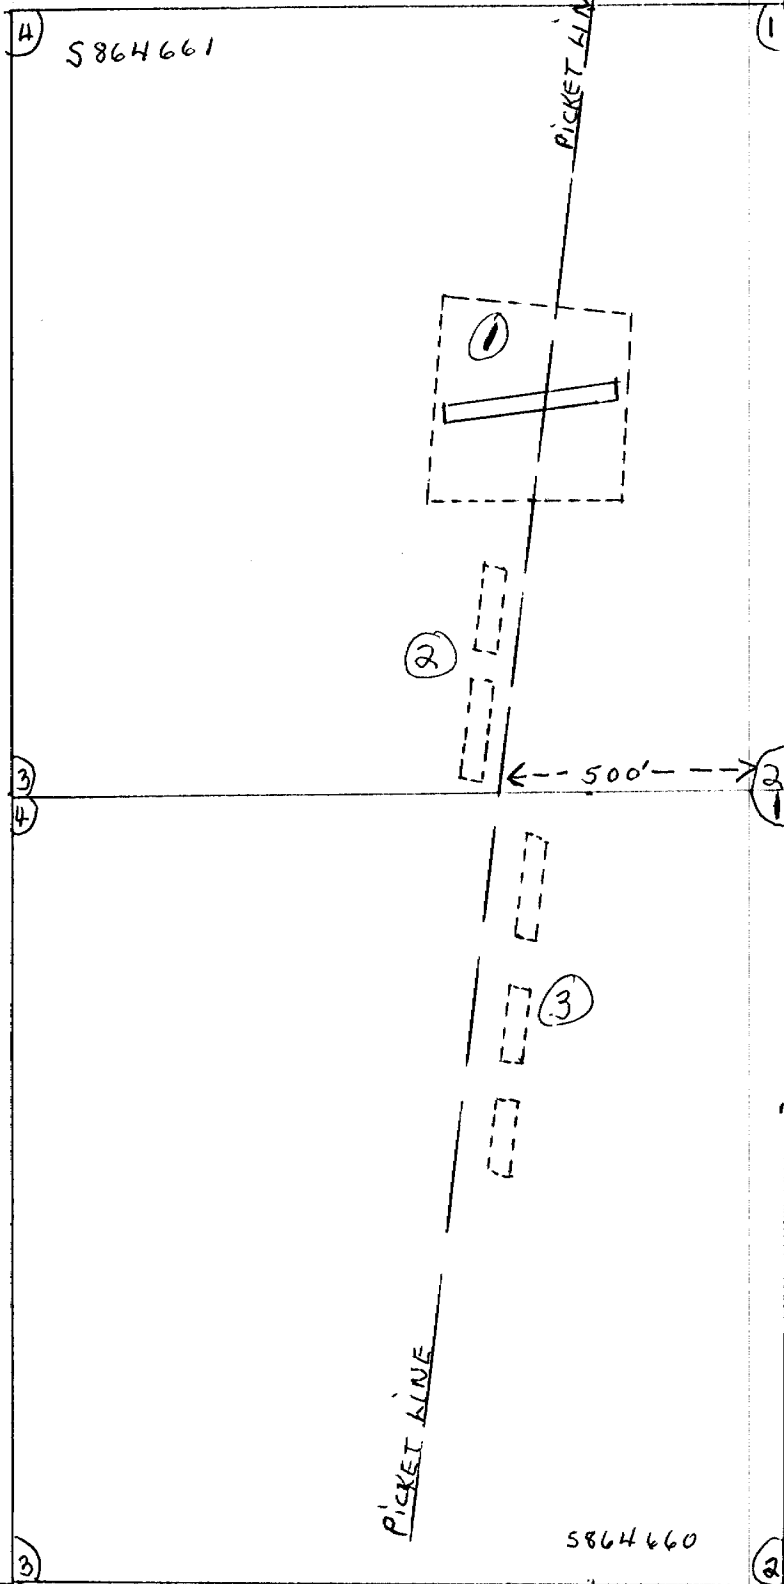

North.
