INTRODUCTION

During the month of August 1994 Conquest Yellowknife Resources Inc. initiated a program of mechanical stripping, trenching, mapping and sampling on the claims in Heenan Township. This program continued for approximately one month until it was stopped on September 03, 1994 due to lack of funds. In the summer of 1996 the president of Conquest died suddenly. The property was not returned to the optioners until November of 1997 and it was not until August 1998 that the mapping and sampling was completed to the present stage.

The program tested 5 different areas that had either previously been sampled or trenched or had an associated gold in humus anomaly.

The following report covers the results of this program. A copy of the assays and plans are appended.

Property

The property consists of 2 claim blocks of 16 units each situated in the Township of Heenan and numbered 1197251 and 1197252.

The claims are owned equally by Mr. Angus MacDonnell, Mr. Michael Shunock, Mr. Gerard Paquette and Mr. Raymond Lashbrook.

Access

Access to the property is gained via a good all weather logging road west off of highway 144 on the Sultan Industrial Road for 56 kilometers then north on the Dore Road for 16 kilometers to the Heenan Road. This road leads north easterly to access the western portion of the claims.

General Geology

The property is underlain to the south by the Marion Volcanic Group and overlain by the Woman River Iron Formation which is in turn covered by the October Lake Group.

The Marion Volcanics consist of felsic to intermediate volcanic flows, breccias and tuffs and are the oldest rocks in the area.

The Woman River Iron Formation is an extensive banded iron formation composed of chemogenic sediments, greywackes and fine grained tuffs.

The October Lake rocks consist of massive to pillowed mafic flows, tuffs and related sediments.

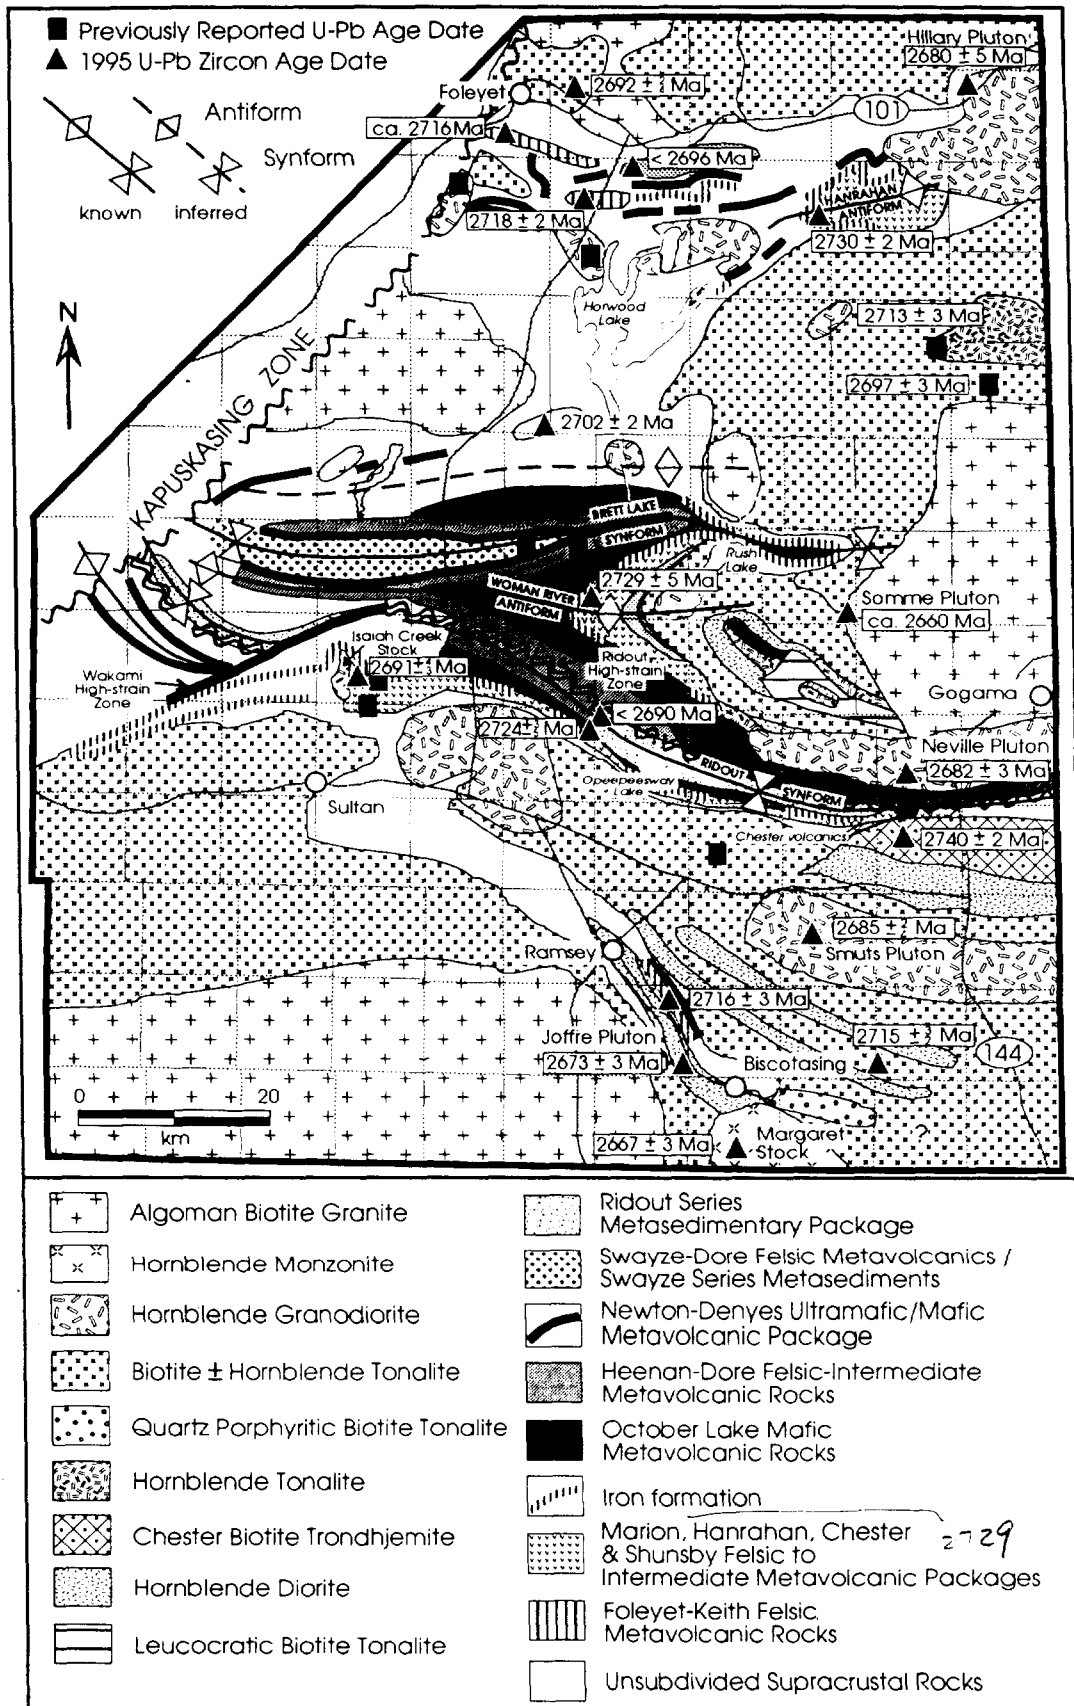

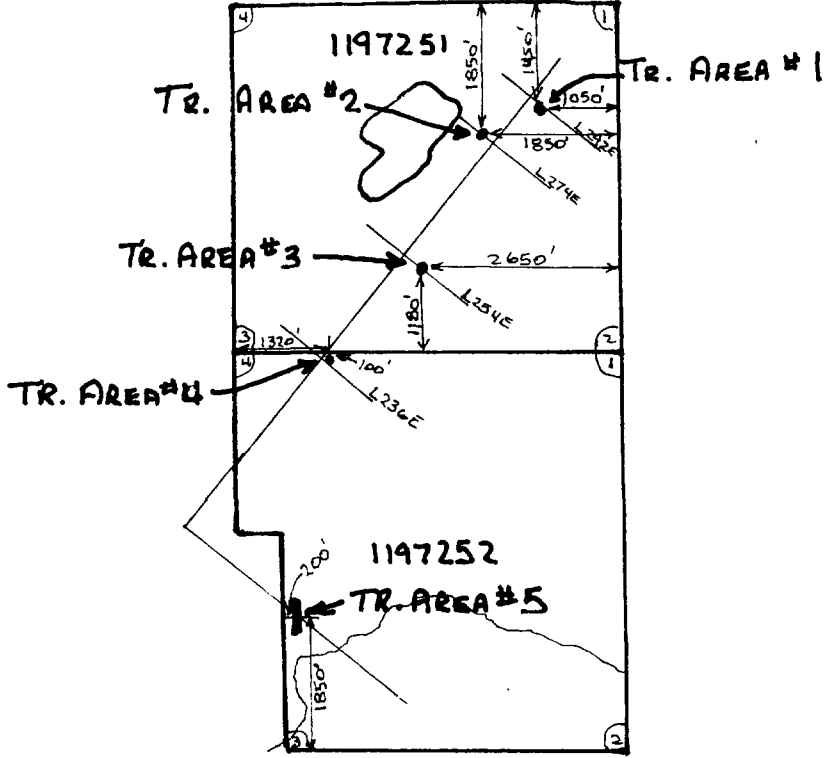

Figure 36.2b. Simplified bedrock and structural geology of the Swayze greenstone belt depicting major F_2 fold axes and high-strain zones. The locations of new U-Pb age dates are indicated. Late diabase dikes have been omitted for clarity.

Fig. 1c

(2)

Equipment Used

A John-Deere 690B Excavator was rented from Neil Jones Construction. This machine is track mounted and has a 1 yard bucket. The machine operated from August 10th to the 18th, 1994. The rate was \$75.00/hour. A copy of the invoice is appended.

Trench Area #1

This area is located near line 292E between 1998 and 199N. This area was stripped to test the up-slope potential of a soil humus anomaly. The stripping uncovered mainly banded iron formation composed to varying degrees of chert, magnetite, pyrite and carbonate facies. Intruding the iron formation are feldspar +/-quartz porphyry dikes.

Four grab samples were taken of the more sulfide rich areas with the best sample assaying 228 ppb gold from a 1.5' to 2' lens of massive pyrite.

Trench Area #2

This area is located near line 274E at 202N. The area had been previously partially stripped and an old trench put down. Good gold values from the trench had been obtained along with diamond drilling returning some good gold grades. The stripping exposed mainly banded iron formation composed of chert, jasper, magnetite and pyrite intruded by feldspar-/-quartz porphyry. Quartz veins and veinlets carrying pyrite were exposed in the central area.

This area was trenched using a gas plugger. A total of 26 man days were spent drilling, blasting and mucking out the trenches (August 12, 13, 14, 15,16, 17, 18, 20, 21, 22, 23, 25, and 27). The rate for the plugger was \$50/ day and the rates for the men were \$175 /day and \$100/day.

Assaying returned trench values of 0.28 oz/ton Au over 12 feet, 0.155 oz/ton Au over 9.5 feet, 0.054 oz/ton Au over 6.0 feet and 0.025 oz/ton Au over 22'.

Trench Area #3

This area, located at line 254E at 197N, was stripped because of a soil humus anomaly and an old trench. The stripping uncovered banded iron formation composed of chert, magnetite, pyrite, hematite and jasper and intruded by feldspar-/-quartz porphyry. An old trench contained a quartz-carbonate vein carrying jasper fragments and up to 20% pyrite that assayed 4,577 ppb gold. A float piece of pyritic cherty tuff with 20%pyrite was assayed and returned 5,246 ppb gold.

(3)

Trench Area #4

This area is located at line 236E, 199N. The area had an old trench put down just to the north of the stripped area of this program. Assay values in gold were returned from this trench as well as the zone being undercut by a diamond drill hole.

The stripping revealed chert-magnetite-pyrite iron formation intruded by feldspar-+/- quartz porphyry dikes. Some quartz-carbonate veins carrying pyrite were exposed. Assaying returned an anomalous zone averaging 753 ppb Au over 12 feet.

Trench Area #5

This area, located between lines 216E and 212E from 181N to 183N, area was stripped to expose a zone of alteration, humus anomaly and an I.P. anomaly. One drill hole near the north portion of the stripping returned low gold values.

The stripping uncovered rhyolite breccia and laharic debris flows. A diabase dyke was a partially uncovered intruding the rhyolite breccia. The alteration consists of a reddish hematization (or K-spar alteration) containing disseminated to coarse grained pyrite. This alteration appears to be more intense in the laharic breccia which has a more chloritic matrix than the rhyolite breccia.

Two grab samples were taken of the alteration zones returning values of 501 ppb Au and 2,674 ppb Au.

(4)

Conclusions

The program of stripping, trenching and sampling was successful in locating new areas of gold mineralization and a better understanding of the possible genesis of the mineralization. It is unfortunate that the program was cut so quickly and not all of the areas could be trenched and assayed systematically.

Numerous other gold showings exist on the property that have similar settings as the areas reported in this program.

Excellent results were obtained in Trench area #2 with results of 0.28 oz/ ton Au over 12 feet and 0.155 oz/ton Au over 9.5 feet. These are probably the surface expression of a zone intersected in a drill hole 20 feet to the southwest and approximately 50 vertically below this trench which returned 0.25 oz/ton Au over 10.1 feet.

Recommendations

Because the trenching and sampling portion of the program was not completed it is recommended that it be completed, ie:

1. The stripped areas be further cleaned , trenched and assayed in areas that have mineralization.
2. More mechanical stripping should be performed in the trench #5 area as the alteration is much more extensive than what was exposed.
3. Other areas on the property having a gold in humus anomaly should be stripped and trenched.

subsections 65(2) and 66(3) of the Mining Act. Under section 8 of the Mining Act, this assessment work and correspond with the mining land holder. Questions about this collection should be directed to the Assessment Files Research Imaging, 3rd Floor, 933 Ramsey Lake Road, Sudbury, Ontario, P3E 6B5.

Instructions: - For work performed on Crown Lands before recording a claim, use form 0240. - Please type or print in ink.

2.19636

1. Recorded holder(s) (Attach a list if necessary)

Form with fields for Name, Address, Client Number, Telephone Number, and Fax Number for Raymond Lashbrook and Angus MacDonnell.

2. Type of work performed: Check (✓) and report on only ONE of the following groups for this declaration.

Geotechnical: prospecting, surveys, assays and work under section 18 (regs) [] Physical: drilling stripping, trenching and associated assays [x] Rehabilitation []

Form with fields for Work Type (Mapping Stripped Areas, Assays), Office Use, Commodity (Au), Total \$ Value of Work Claimed (\$5,391), Dates Work Performed (02 Aug 1998 to 4 Aug 1999), and Township/Area (Heenan Twp).

Please remember to: - obtain a work permit from the Ministry of Natural Resources as required; - provide proper notice to surface rights holders before starting work; - complete and attach a Statement of Costs, form 0212; - provide a map showing contiguous mining lands that are linked for assessment work; - include two copies of your technical report.

RECORDED AUG - 4 1999

3. Person or companies who prepared the technical report (Attach a list if necessary)

Form with fields for Name, Address, Telephone Number, and Fax Number for Raymond Lashbrook and Callander.

RECEIVED AUG 04 1999 GEOSCIENCE ASSESSMENT OFFICE

4. Certification by Recorded Holder or Agent

I, Raymond Lashbrook do hereby certify that I have personal knowledge of the facts set forth in this Declaration of Assessment Work having caused the work to be performed or witnessed the same during or after its completion and, to the best of my knowledge, the annexed report is true.

Form with fields for Signature of Recorded Holder or Agent, Date (Aug 04/99), Agent's Address, Telephone Number, and Fax Number.

Dated Nov 02/99.

5. Work to be recorded and distributed. Work can only be assigned to claims that are contiguous (adjoining) to the mining land where work was performed, at the time work was performed. A map showing the contiguous link must accompany this form.

6. Instructions for cutting back credits that are not approved.

Some of the credits claimed in this declaration may be cut back. Please check (✓) in the boxes below to show how you wish to prioritize the deletion of credits:

- 1. Credits are to be cut back from the Bank first, followed by option 2 or 3 or 4 as indicated.
- 2. Credits are to be cut back starting with the claims listed last, working backwards; or
- 3. Credits are to be cut back equally over all claims listed in this declaration; or
- 4. Credits are to be cut back as prioritized on the attached appendix or as follows (describe):

 GEOSCIENCE ASSESSMENT OFFICE

\$ 5,391.00

Calculations of Filing Discounts:

1. Work filed within two years of performance is claimed at 100% of the above Total Value of Assessment Work.
2. If work is filed after two years and up to five years after performance, it can only be claimed at 50% of the Total Value of Assessment Work. If this situation applies to your claims, use the calculation below:

TOTAL VALUE OF ASSESSMENT WORK x 0.50 = Total \$ value of worked claimed.

Note:

- Work older than 5 years is not eligible for credit.
- A recorded holder may be required to verify expenditures claimed in this statement of costs within 45 days of a request for verification and/or correction/clarification. If verification and/or correction/clarification is not made, the Minister may reject all or part of the assessment work submitted.

Certification verifying costs:

I, KAYANON L. BISHOP, do hereby certify, that the amounts shown are as accurate as may reasonably be determined and the costs were incurred while conducting assessment work on the lands indicated on the accompanying Declaration of Work form as Part Owner (25%) I am authorized to make this certification.

Signature: Kayanon L. Bishop Date: Aug 04/99

RECORDED
 AUG - 4 1999

I, RAYMOND LASABROOK (Print Full Name), do hereby certify that the above work credits are eligible under subsection 7 (1) of the Assessment Work Regulation 6/96 for assignment to contiguous claims or for application to the claim where the work was done.

Signature of Recorded Holder or Agent Authorized in Writing: Ray Lasabrook Date: Aug 04/99

6. Instructions for cutting back credits that are not approved.

Some of the credits claimed in this declaration may be cut back. Please check (✓) in the boxes below to show how you wish to prioritize the deletion of credits:

- 1. Credits are to be cut back from the Bank first, followed by option 2 or 3 or 4 as indicated.
- 2. Credits are to be cut back starting with the claims listed last, working backwards; or
- 3. Credits are to be cut back equally over all claims listed in this declaration; or
- 4. Credits are to be cut back as prioritized on the attached appendix or as follows (describe):
 " " " " " from # 1197251

RECEIVED
 41²⁵ AUG 04 1999
 GEOSCIENCE ASSESSMENT OFFICE

Note: If you have not indicated how your credits are to be deleted, credits will be cut back from the Bank first, followed by option number 2 if necessary.

RECEIVED
Total Value of Assessment Work
AUG 04 1999
GEOSCIENCE ASSESSMENT OFFICE

Calculations of Filing Discounts:

1. Work filed within two years of performance is claimed at 100% of the above Total Value of Assessment Work.
2. If work is filed after two years and up to five years after performance, it can only be claimed at 50% of the Total Value of Assessment Work. If this situation applies to your claims, use the calculation below:

TOTAL VALUE OF ASSESSMENT WORK 18080 x 0.50 = 9,040 Total \$ value of worked claimed.

Note:

- Work older than 5 years is not eligible for credit.
- A recorded holder may be required to verify expenditures claimed in this statement of costs within 45 days of a request for verification and/or correction/clarification. If verification and/or correction/clarification is not made, the Minister may reject all or part of the assessment work submitted.

Certification verifying costs:

I, KAYMONA L. POHOREK, do hereby certify, that the amounts shown are as accurate as may reasonably be determined and the costs were incurred while conducting assessment work on the lands indicated on the accompanying Declaration of Work form as Part owner (25%) I am authorized to make this certification.
(recorded holder, agent, or state company position with signing authority)

Dear Sir or Madam:

Submission Number: 2.19636

Status

Subject: Transaction Number(s): W9960.00320 Approval
W9960.00321 Approval

We have reviewed your Assessment Work submission with the above noted Transaction Number(s). The attached summary page(s) indicate the results of the review. **WE RECOMMEND YOU READ THIS SUMMARY FOR THE DETAILS PERTAINING TO YOUR ASSESSMENT WORK.**

If the status for a transaction is a 45 Day Notice, the summary will outline the reasons for the notice, and any steps you can take to remedy deficiencies. The 90-day deemed approval provision, subsection 6(7) of the Assessment Work Regulation, will no longer be in effect for assessment work which has received a 45 Day Notice. Allowable changes to your credit distribution can be made by contacting the Geoscience Assessment Office within this 45 Day period, otherwise assessment credit will be cut back and distributed as outlined in Section #6 of the Declaration of Assessment work form.

Please note any revisions must be submitted in DUPLICATE to the Geoscience Assessment Office, by the response date on the summary.

If you have any questions regarding this correspondence, please contact Lucille Jerome by e-mail at lucille.jerome@ndm.gov.on.ca or by telephone at (705) 670-5858.

Yours sincerely,

A handwritten signature in black ink, appearing to read "Blair Kite".
