Prospecting Report - Belfast Twp.
Claim # 51223122

This report identifies the prospecting work carried out in July of 2001 and July of 2002.

This claim was staked in July 2000 to include an area of rock outcroppings showing quartz veins. Previous trenching had occurred in this area in the late 1930s. Gold had been identified in sampler taken by a person prospecting the area back at that time.

The writer held this claim from 1996-1999 and assay results indicated the presence of gold as per attached assay certificate.

In July 2001, and again in July 2002 with assistance of R. COMSTOCK, licence number C36293 (holder of adjacent claim) we traversed the claim searching out trenches and rock outcroppings. Location of trenching is identified on attached map.

This claim is a rocky area that has been logged with no merchantable timber left on it and there are no usable roads. Most of the claim is a hill with a steep slope into a beaver pond to the north. Beyond part #2 to the north is Area 39 of the Temagami land

Use Plan, that covers the shoreline of Lake Temagami that has special mining regulations.

Considerable time was spent cleaning woody debris from trenches that collected over many years to examine exposed quartz. Considerable quartz was located to the east of this claim but none was located on the west half of the claim.

As indicated on the attached map there is a area of exposed quartz with a blue tint to it but it does not appear to have any mineral content.
