INTRODUCTION

The following report will deal with the results of a prospecting and sampling program carried out on the Groves Township Property. The property is made up of eight, unpatented block and single unit (95 units) mining claims, located in Groves Township, Porcupine Mining Division, Ontario. This work was carried out over a two-phase work program. The first phase focused on the gold potential of the area. A total of 24 rock samples were taken over a two-day period during the month of September 1997. Phase two focuses on the areas potential to host a copper-nickel, platinum deposit. Here, 23 rock samples were taken over a three-day period during the month of August 1999.

The purpose of this program was to provide reconnaissance geological data that may reflect the gold, copper, nickel and platinum content of the underlying geology.

LOCATION AND ACCESS

The Groves Township Property consists of 8 unpatented mining claims (95 units) situated within the central portion of Groves Township, Porcupine Mining Division. The block is located approximately 90 miles southwest of the city of Timmins or 6 miles southeast of the village of Gogama. Groves Lake borders the eastern portion of the block while the CNR rail line runs through the western portion.

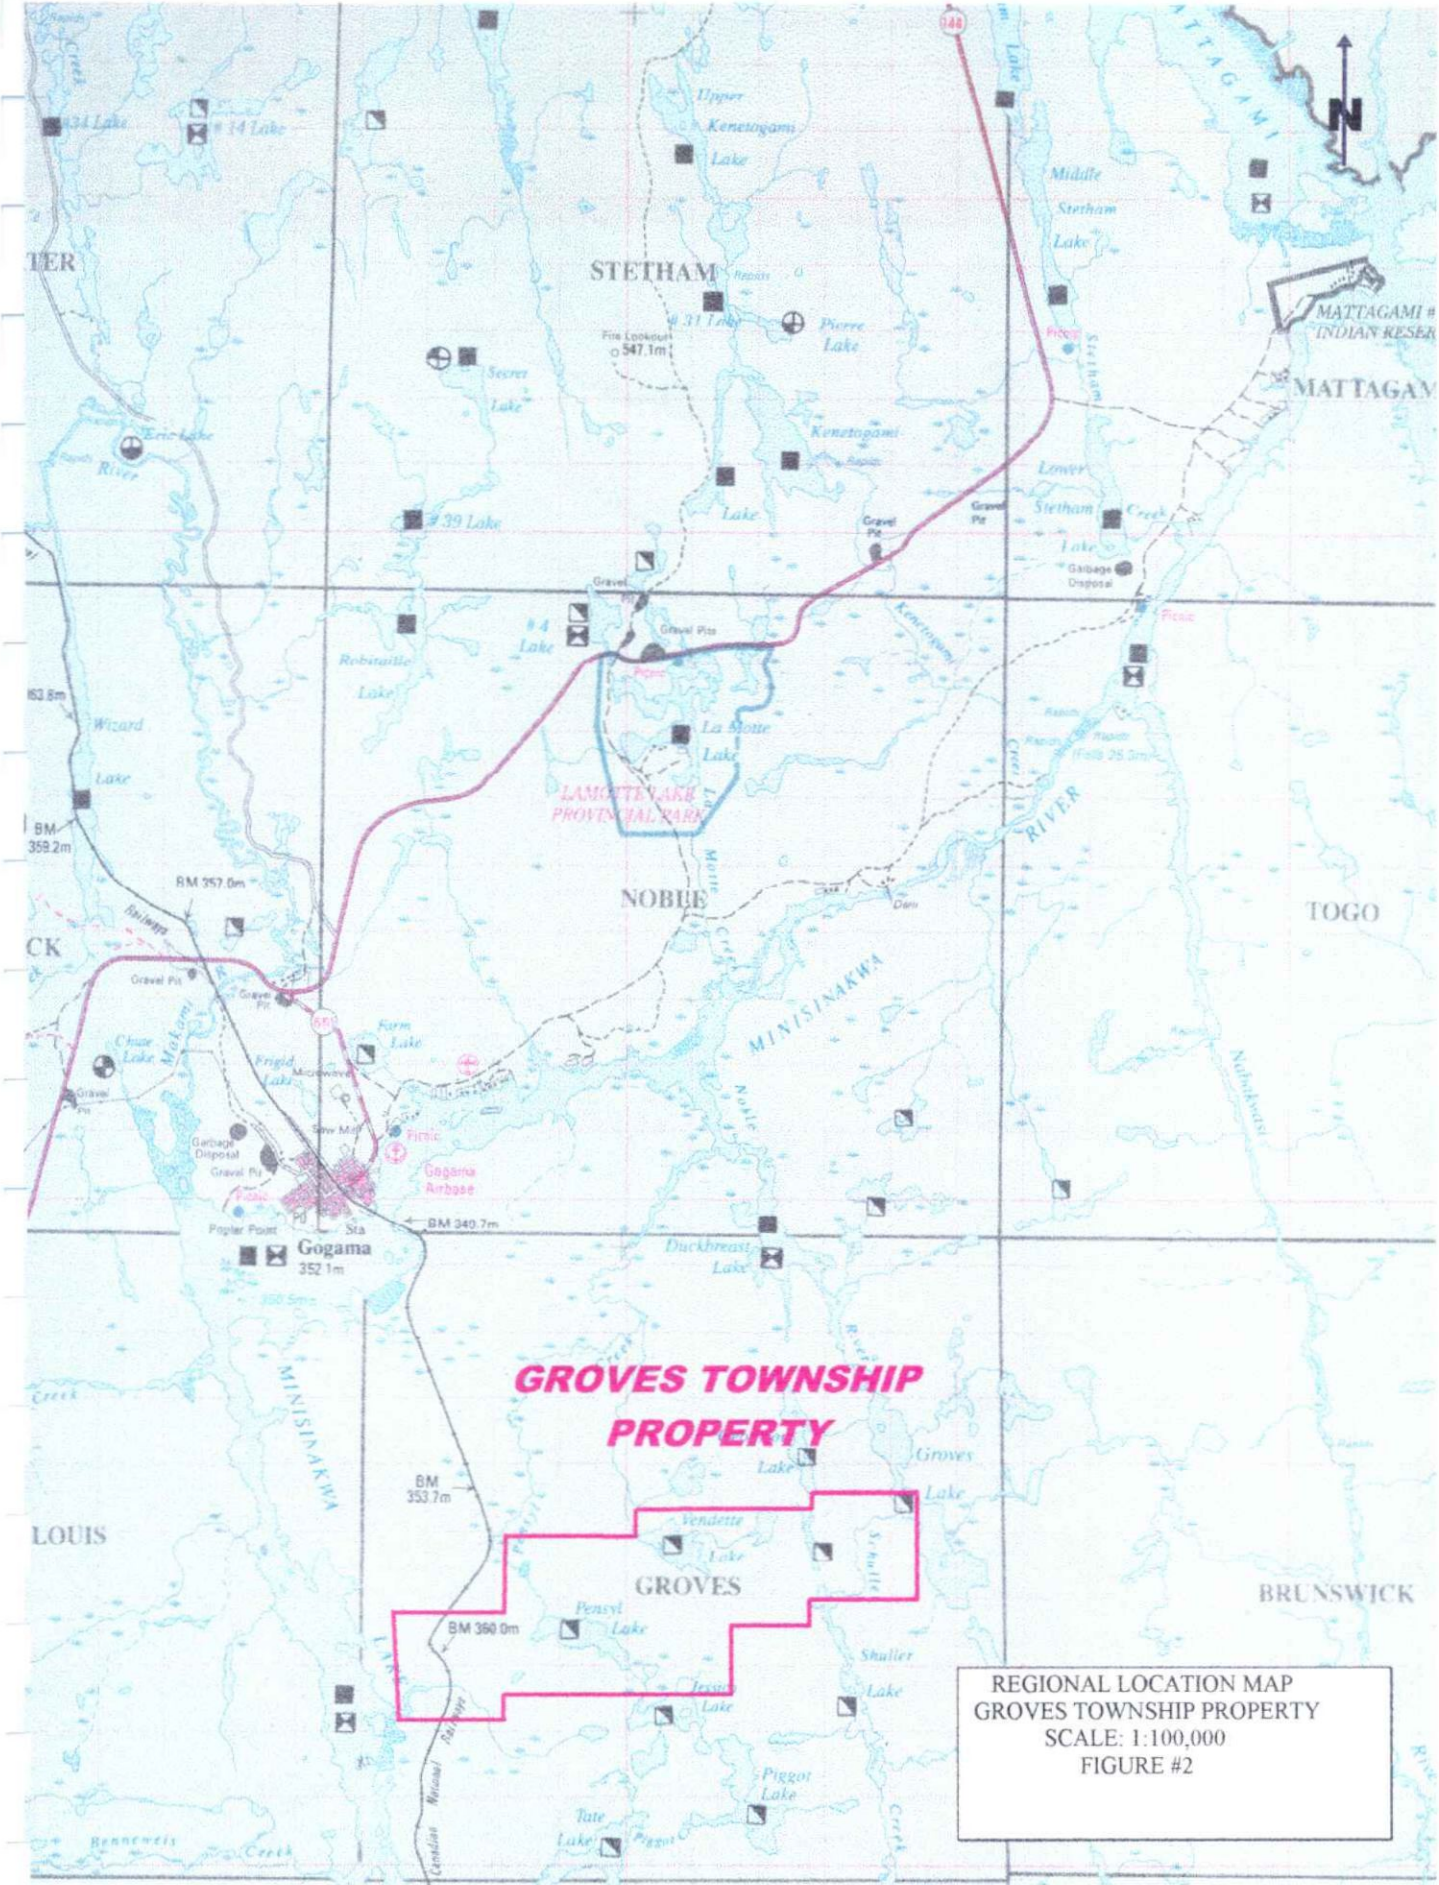

Access to the property was gained by floatplane (Beaver) from the Village of Connaught, Ontario. For both phases of the work program a field camp was set up on the west shore of Pensyl Lake of the property was worked from here.

PERSONNEL

The people directly involved with the prospecting programs carried out on the Groves Township properties are follows:

Steve Anderson.....	Timmins, Ontario
Donny McKinnon.....	Timmins, Ontario
Raymond Meikle.....	Timmins, Ontario

Steve Anderson and Donny McKinnon supervised all work.

PREVIOUS WORK

The current claim holder has not conducted any previous work on the properties. However, the property does have a history of work that was carried out by past claim holders. This includes reported reserves of 500,000 tons of 1.5% Cu,Ni combined. Within these Cu, Ni reserves, anomalous values of platinum were also reported.

CLAIMS

The claims that make up the Groves Township Property are held by Steve Anderson and are located in Groves Township, Porcupine Mining Division. The following is a list of the claims.

WORK PROGRAM

The work program carried out on the Groves Township property took the form of reconnaissance prospecting. The property was visited on two separate occasions, focusing first of gold deposition and then on copper, nickel and platinum deposition. A fixed wing aircraft from Connaught Ontario was used to access the property on both occasions. The prospecting was conducted from field camps set up on Pensyl Lake. On both occasions three men spent three days on the property. A total of 47 samples in all were collected in all. Only the samples sent for gold assays were available at the time of writing.

SURVEY RESULTS

As mentioned above, only the results from the 24 samples sent to be assayed for gold were available. Several samples from the second phase of prospecting have been sent for assay but the results have yet to be returned. Although a favourable geological environment was observed the samples tested showed only minor values in gold. The assay certificate can be found under appendix "A" of this report.

RECOMMENDATIONS AND CONCLUSIONS

As described under results, the prospecting program returned only one weakly anomalous Au value. Despite these poor results, additional work may be warranted due to the size of the property and the limited amount of time spent on the property.

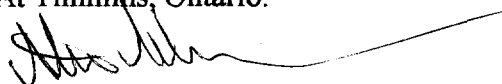

The second phase of the program focused on base metal and platinum deposition. Some of the samples taken show the presence of a favourable geological environment in the area. Although these assay results are pending, it would appear additional work is warranted. .

CERTIFICATION

I, Steve Anderson of Timmins, Ontario hereby certify that:

1. I hold a three-year Technologist Diploma from Sir Sandford College, Lindsay, Ontario, obtained in May 1981.
2. I have been practising my profession since 1979 in Ontario, Quebec, Nova Scotia, New Brunswick, Newfoundland, NWT, Manitoba Saskatchewan and Greenland.
3. I have been employed directly with Asamera Oil Inc., Urangellschaft Canada Ltd., Nanisivik Mines Ltd., R.S. Middleton Exploration Services Ltd., Rayan Exploration Ltd and am currently an owner of Vision Exploration.
4. I have based conclusions and recommendations contained in this report on knowledge of the area, my previous experience and on the results of the fieldwork conducted on the property during September, 1997 and August, 1999.

Dated this 17th day of September, 1999
At Timmins, Ontario.

INTRODUCTION

The following report will deal with the results of a reconnaissance prospecting and sampling program carried out on the Groves Township Property. The property is made up of eight, unpatented block and single unit (95 units) mining claims, located in Groves Township, Porcupine Mining Division, Ontario. This work was carried out over a two-phase work program. The first phase focused on the gold potential of the area. A total of 24 rock samples were taken over a two-day period during the month of September 1997. Phase two focuses on the areas potential to host a copper-nickel, platinum deposit. Here, 23 rock samples were taken over a three-day period during the month of August 1999.

The purpose of this program was to provide reconnaissance geological data that may reflect the gold, copper, nickel and platinum content of the underlying geology.

WORK PROGRAM

The work program carried out on the Groves Township property took the form of reconnaissance prospecting. The property was visited on two separate occasions, focusing first of gold deposition and then on copper, nickel and platinum deposition. A fixed wing aircraft from Connaught Ontario was used to access the property on both occasions. The prospecting was conducted from field camps set up on Pensyl Lake. On both occasions three men spent three days on the property. A total of 47 samples in all were collected in all. Only the samples sent for gold assays were available at the time of writing.

SURVEY RESULTS

As mentioned above, only the results from the 24 samples sent to be assayed for gold were available. Several samples from the second phase of prospecting have been sent for assay but the results have yet to be returned. Although a favourable geological environment was observed the samples tested showed only minor values in gold. The assay certificate can be found under appendix "A" of this report.

RECOMMENDATIONS AND CONCLUSIONS

As described under results, the prospecting program returned only one weakly anomalous Au value. Despite these poor results, additional work may be warranted due to the size of the property and the limited amount of time spent on the property.

The second phase of the program focused on base metal and platinum deposition. The diorite that hosts the Cu-Ni deposit has also been reported to contain up to .1oz/ton Pt. As a result, additional work in the area would be warranted, focusing on any other diorite units located in the area. A magnetometer survey may help outline any of these units that may not be exposed. The next phase of work will involve establishing a grid over the main area of interest as well as additional more detailed geological mapping of the area.

Signature of Recorded Holder or Agent Authorized in Writing: [Signature] Date: Sept 20 1999

8. Instructions for cutting back credits that are not approved.

Some of the credits claimed in this declaration may be cut back. Please check (✓) in the boxes below to show how you wish to prioritize the deletion of credits:

- 1. Credits are to be cut back from the Bank first, followed by option 2 or 3 or 4 as indicated.
- 2. Credits are to be cut back starting with the claims listed last, working backwards; or
- 3. Credits are to be cut back equally over all claims listed in this declaration; or
- 4. Credits are to be cut back as prioritized on the attached appendix or as follows (describe):

Note: If you have not indicated how your credits are to be deleted, credits will be cut back from the Bank first, followed by option number 2 if necessary.

For Office Use Only Received Stamp	Deemed Approved Date	Date Notification Sent
	Date Approved	Total Value of Credit Approved
	Approved for Recording by Mining Recorder (Signature)	

Personal information collected on this form is obtained under the authority of subsection 6 (1) of the Assessment Work Regulation 6/96. Under section 8 of the Mining Act, this information is a public record. This information will be used to review the assessment work and correspond with the mining land holder. Questions about this collection should be directed to a Provincial Mining Recorder, Ministry of Northern Development and Mines, 3rd Floor, 933 Ramsey Lake Road, Sudbury, Ontario, P3E 8S5.

Work Type	Units of work Depending on the type of work, list the number of hours/days worked, metres of drilling, kilometres of grid line, number of samples, etc.	Cost Per Unit of work	Total Cost
Aircraft	770 miles	\$4 / mile	2880
Assays			250
Report			600
Wages	3 men x 6 days	\$200 / day	3600
Associated Costs (e.g. supplies, mobilization and demobilization).			
Transportation Costs			
Food and Lodging Costs			
Total Value of Assessment Work			7731

Calculations of Filing Discounts:

1. Work filed within two years of performance is claimed at 100% of the above Total Value of Assessment Work.
2. If work is filed after two years and up to five years after performance, it can only be claimed at 50% of the Total Value of Assessment Work. If this situation applies to your claims, use the calculation below:

TOTAL VALUE OF ASSESSMENT WORK $\times 0.50 =$ Total \$ value of worked claimed.

Note:

- Work older than 5 years is not eligible for credit.
- A recorded holder may be required to verify expenditures claimed in this statement of costs within 45 days of a request for verification and/or correction/clarification. If verification and/or correction/clarification is not made, the Minister may reject all or part of the assessment work submitted.

Certification verifying costs:

Steve Anderson (please print full name) do hereby certify, that the amounts shown are as accurate as may reasonably be determined and the costs were incurred while conducting assessment work on the lands indicated on the accompanying

Declaration of Work form as [Signature] I am authorized to make this certification.
(recorded holder, agent, or state company position with signing authority)

Dear Sir or Madam:

Submission Number: 2.19724

Status

Subject: Transaction Number(s): W9960.00373 Approval After Notice

We have reviewed your Assessment Work submission with the above noted Transaction Number(s). The attached summary page(s) indicate the results of the review. **WE RECOMMEND YOU READ THIS SUMMARY FOR THE DETAILS PERTAINING TO YOUR ASSESSMENT WORK.**

If the status for a transaction is a 45 Day Notice, the summary will outline the reasons for the notice, and any steps you can take to remedy deficiencies. The 90-day deemed approval provision, subsection 6(7) of the Assessment Work Regulation, will no longer be in effect for assessment work which has received a 45 Day Notice. Allowable changes to your credit distribution can be made by contacting the Geoscience Assessment Office within this 45 Day period, otherwise assessment credit will be cut back and distributed as outlined in Section #6 of the Declaration of Assessment work form.

Please note any revisions must be submitted in DUPLICATE to the Geoscience Assessment Office, by the response date on the summary.

If you have any questions regarding this correspondence, please contact BRUCE GATES by e-mail at bruce.gates@ndm.gov.on.ca or by telephone at (705) 670-5856.

Yours sincerely,

Work Report Assessment Results

Submission Number: 2.19724

Date Correspondence Sent: February 01, 2000

Assessor: BRUCE GATES

Transaction Number	First Claim Number	Township(s) / Area(s)	Status	Approval Date
W9960.00373	1236583	GROVES	Approval After Notice	January 09, 2000

Section:

9 Prospecting PROSP

The 45 days outlined in the Notice dated November 25, 1999 have passed. Assessment work credit has been approved as outlined below:

1997

Although the technical report refers to both 2 and 3 days worked we have allowed for 3 days.

3men x 3 days x \$200 = \$1,800

Report = \$600

Assays = \$251

Airfare (1/2) = \$1,440

Total = \$4091.00

1999

There is a question as to the eligibility of the work being performed in relation to the recording of claims 1236583 and 1236585. As the specific dates worked were not provided in the report and the expenditure verification was not supplied for the airfare no assessment credit is being allowed for the 1999 work. This work can be resubmitted at a later date if it meets the requirements of the assessment work regulations.

The following information was deficient with respect to the requirements for prospecting:

In the report,

- (i) describing in detail the nature and content of the work and the observations made during performance of the work,
- (ii) stating the dates on which the work was performed,
- (iii) stating the licence numbers ...of the persons who performed the work, and
- (iv) signed by the persons who performed the work (only 1 of 3);

Work Report Assessment Results

Submission Number: 2.19724

(b) a plan of the mining claim drawn in ink on durable paper at a scale of between 1:100 and 1:5,000 showing, (plan at 1:10,000)

- (i) the location of all traverses,
- (vii) the character of the overburden including boulders, clay, gravel, sand, and
- (viii) the distribution of swamp, muskeg and forest cover areas along all lines traversed; and

(c) within 60 days after the submission of the report referred to in clause (a), the location, sample numbers and results of all sampling and assays performed with appropriate certificates.

The assessment credit is being reduced by \$3,637.00. The TOTAL VALUE of assessment credit that will be allowed, based on the information provided in this submission, is \$4,091.00.

Allowable changes to your credit distribution can be made by contacting the Geoscience Assessment Office by February 15, 2000, otherwise assessment credit will be cut-back and distributed as outlined in Section #6 of the Declaration of Assessment Work form.
