Report on Work Performed on Claim L.420371
Midlothian Twp.

This property is located some five miles north and west of the United Asbestos Midlothian Mine. Access was gained via an old winter road running from the west side of the mine pit area to the old Staires Mine.

The drill used was a Longyear #38 mounted on a FN-160 Flextrac Nordwell Tractor. The overburden penetration was a combination of 3 ~~strings~~ of casing using a tricone bit.

The hole was abandoned at 230 feet due to over shooting of the conductor
