Shoreacres Explorations Limited MEAP Submission

Contract #KL 144 First Submission

September 22, 1980 to December 31, 1980

Bulk Sampling costs 1,961.9 dry tons extracted from four zones ^{SOTHMAN} ~~Southman~~
Twp. property Clm 114.

Pamour Porcupine Mines Limited performed belt sampling and milling of selected bulk samples from four different exploration zones. A detailed report is being prepared and will be submitted in due course. Average Au Grade (after head assay cuts and recovery losses) was 0.0785 oz/ton. This, because of high cost accumulated over a two year exploration period, did not prove to be ore. The exploration venture did, however, meet the original objectives i.e. it established that:

- (A) metalurgically, the material is mill acceptable
- (B) rock extraction and moving techniques are feasible
- (C) custom milling is feasible but expensive
- (D) with further exploration work to establish tonnage a viable mining operation may take shape.

Our intention is, with the help of additional private financing and assistance from OMEP, to continue exploration during 1981.
