Robillard Lake Project 1999-00 By Garfield Pinkerton & Jkate Exploration Inc.

Location:

Robillard Twp. Lot 7,8 & 9 Con II Temiskaming Dist. larder Lake Div. O G S Map 2501 Hills Lake Long 80\*.07' Lat 47\*47' See photo of claim map attached.

2.20272

41P16SE2002

010

Access:

Access to the property is directly off Hwy 560 at the edge of Robillard lake or Via the dump access road that exits Hwy 560 on pat claim #24046. This road is South off Hwy 560 200 m west of boat launch site. See road marked on photo of claim map.

### Geology:

The area is underlain by massive amphibolite & amphibolitic pillow Lavas, tonolite & contaminated diorite crosscuts the mafic metavolcanics.

On the eastern part of the claim block. Some small outcrops appear. These are of the granite round lake batholith stock.

Prospecting & Work (physical) Started May 1999.

May 1, 2 & 3 were spent prospecting the rock outcrops on claim #1217791. This was the area in the SW corner of claim block. Remainder of claim is either heavy overburden or under the lake, and the east portion of claim #1225519.

The trench was located on claim #1225519 & marked out. Also the quartz veining to the north & east were flagged. Close attention was paid to the rock face the edge of lake claim #1217791. A narrow quartz vein was found at the top. Close inspection at the bottom, broken mine rock was found. Clearing debris and rock away from the face. The top of a small indentation was visable.

Over the next couple of days the small adit was uncovered and cleaned out. A quartz vein in the face is approx. 12 to 20cm in width striking west approx. 270\* and dips north 75\*. A sample taken from the face assayed (R02) 5177PPB. R01 taken from wall rock. South side of adit. See attached assay sheet. Adit is 1.5m high 1.2m wide and 1.5m long.

In June the trench on claim #1225519 was cleaned out by hand, water was hauled from Robillard Lake by CO pickup and water tank mounted on trailer.. For washing a quartz vein from 3cm to 12cm in width runs full lenght of the trench approx 125m, pyrite and minor chalcois visible. Samples taken for assay show traces of au. ni. and zn. See attached assay sheet. See map #3 for samples from trench area.

#### **Reccomendations:**

In the spring of 2000 a stripping and trenching program should be anitiated on this property. On both sides of the present trench, also quartz veining identified now should be drilled and blasted to check for mineralization. This property should be sampled and tested for PG elements. If good results are found, then diamonddrilling should be recommended

### 6. Instruction for cutting back credits that are not approved.

Some of the credits claimed in this declaration may be cut back. Please check ( $\checkmark$ ) in the boxes below to show how you wish to prioritize the deletion of credits:

00

- 1. Credits are to be cut back from the Bank first, followed by option 2 or 3 or 4 as indicated.
- 2. Credits are to be cut back starting with the claims listed last, working backwards; or
- □ 3. Credits are to be cut back equally over all claims listed in this declaration; or
- **4**. Credits are to be cut back as prioritized on the attached appendix or as follows (describe):

Note: If you have not indicated how your credits are to be deleted, credits will be cut back from the Bank first, followed by option number 2 if necessary.

Dear Sir or Madam:		Submission Number: 2.20272
		Status
Subject: Transaction Number(	s): W0080.00186	Approval

We have reviewed your Assessment Work submission with the above noted Transaction Number(s). The attached summary page(s) indicate the results of the review. WE RECOMMEND YOU READ THIS SUMMARY FOR THE DETAILS PERTAINING TO YOUR ASSESSMENT WORK.

If the status for a transaction is a 45 Day Notice, the summary will outline the reasons for the notice, and any steps you can take to remedy deficiencies. The 90-day deemed approval provision, subsection 6(7) of the Assessment Work Regulation, will no longer be in effect for assessment work which has received a 45 Day Notice. Allowable changes to your credit distribution can be made by contacting the Geoscience Assessment Office within this 45 Day period, otherwise assessment credit will be cut back and distributed as outlined in Section #6 of the Declaration of Assessment work form.

Please note any revisions must be submitted in DUPLICATE to the Geoscience Assessment Office, by the response date on the summary.

If you have any questions regarding this correspondence, please contact JIM MCAULEY by e-mail at james.mcauley@ndm.gov.on.ca or by telephone at (705) 670-5880.

Yours sincerely,

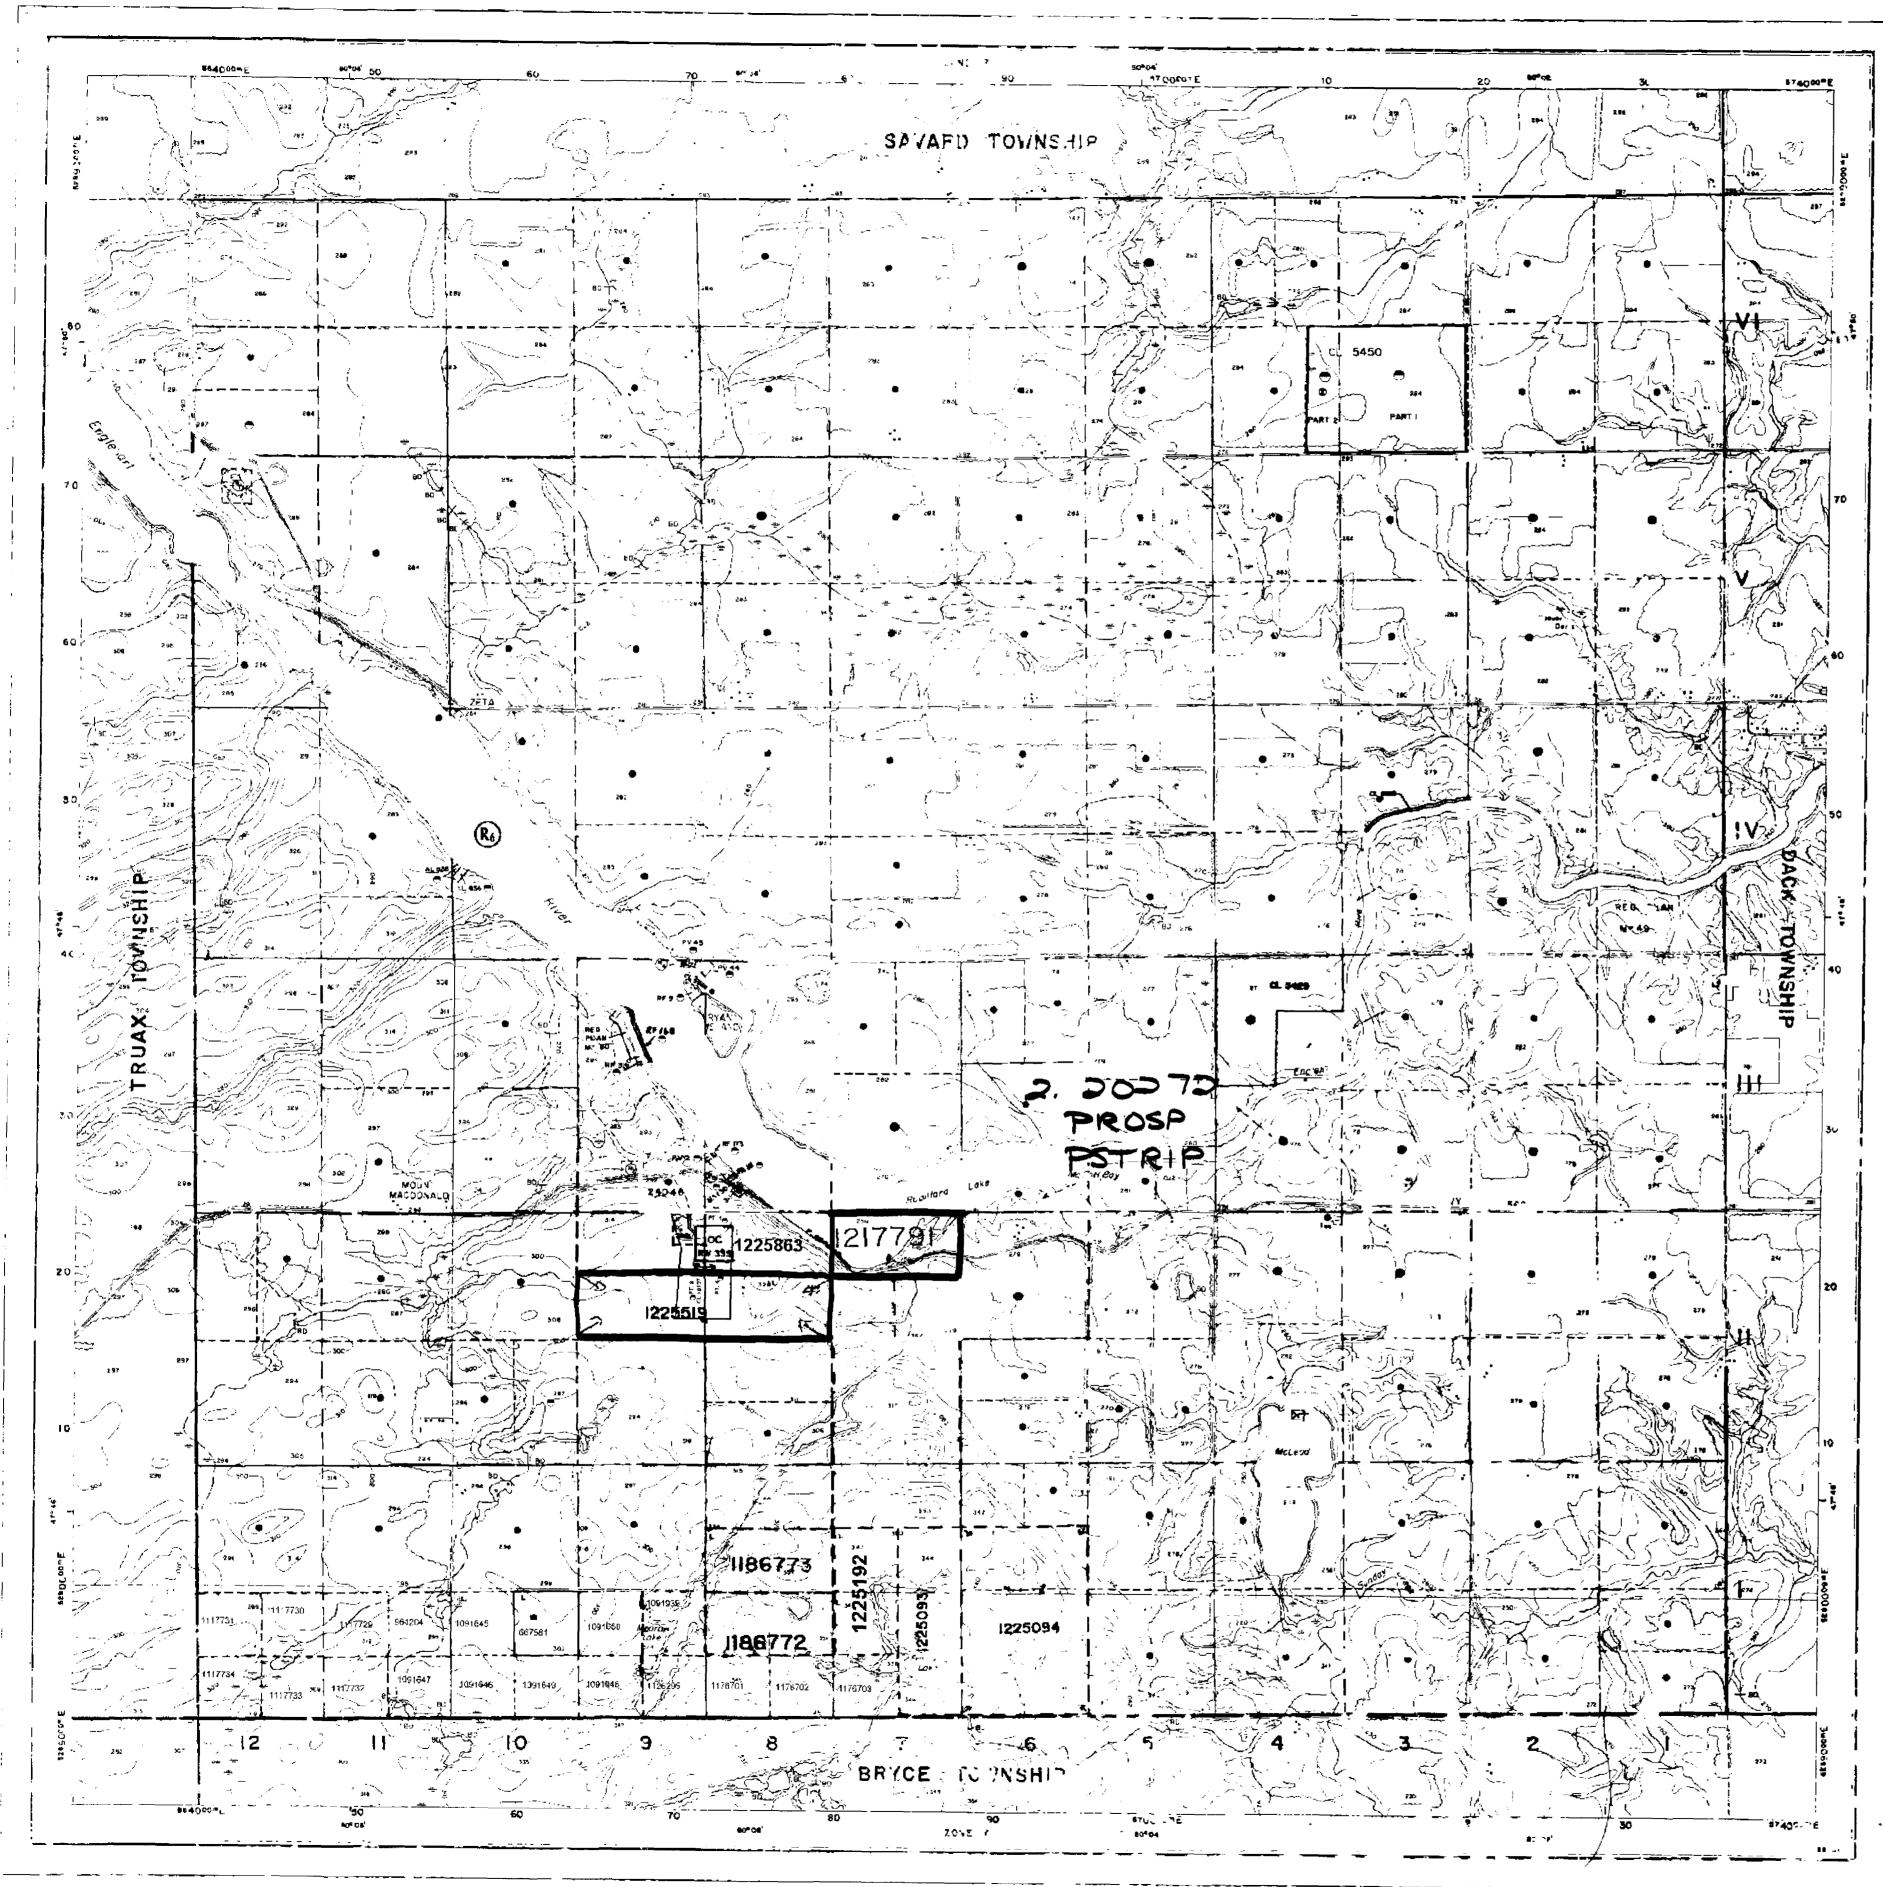

toven B. Beneteau
