Claim number: L 1222292

Claim Holder: Glenn Edward Kafka (Client Number 150402)
Kafka Granite
101 S. Weber Ave.
Stratford, Wisconsin, USA 54484

Claim Location: Highway 66 west of Kirkland Lake, to Swastika Tree Nursery Road. North to Pennfound Trail, turn east and veer right at all intersections to claim (see attached maps).

Onsite work supervised by Glenn Kafka, the claimholder (address listed above)

Date of work: 10-22-1997 to 10-26-1997

Type of equipment used: Portable rock drill, front end loader, and dump truck.

Summary of exploration work and development on claim:

Prospect was drilled and blasted for bulk sample collection. Approximately 900 tons of material were removed by truck and shipped by train car for testing. Material tested for uniformity of color and purity for decorative crushed aggregate use only.

Regional Geology: The claim lies within a large body of massive pink granite, as observed during prospecting and shown on map listed as reference.

Site Geology: Most of the claim, based on exposed rock, consists of massive pink granite. A variably thick quartz vein, dimensions approximately 7 m thick by 40 meters strike length, trending roughly 270 degrees, is exposed within the claim. This quartz vein had been stripped of overburden by prior claimholders. The granite is weakly sheared along the margins of the vein.

Rock type descriptions: Massive pink granite and white bull quartz (see above).

Drill Holes: No exploratory drilling was done as part of this study, and it is not known to the claimholder what types of rocks were intersected by the old drilling, although presumably this hole would have intersected only the pink granite and the quartz vein.

Assays: None

Dimensions of deposit: Quartz vein approximately 7m or less in width over 40 meter strike length. Estimated reserves of 2,100 tons.

Amount of material extracted: 900 tons.

Amount of material stockpiled: none

Method of processing sample: crushing

Proposed uses of sample: decorative stone for exposed aggregate building facing material

Samples were not tested for strength or fracture density, only for final color and purity of crushed product. Testing was done by Kafka Granite Company from Stratford, Wisconsin, USA. The results of this testing showed that the sample is suitable for the above purpose, despite the small size of the deposit. The product will be most likely be mixed with crushed quartz from other locations, and hence has a limited market.

This material is suitable for the use described above because of its relative purity, i.e. it is very white in color and lack of fragments of country rock or other dark minerals.

This report prepared by:

Terrence J. Boerboom
7704 269th Street
Chisago City, MN 55013
Client Number K23058

Qualifications of and experience of preparer of this report:

Licensed professional geologist in state of Minnesota (USA), license no. 30210

15 years practicing geologist , Minnesota Geological Survey and Noranda Exploration, Inc. Mainly field mapping and preparation of associated geologic maps for publication, and ancillary published reports and articles. Includes basic surveying problems such as measuring elevations, placing unmarked roads and trails on maps, cutting geophysical grid lines. Also includes monitoring scientific and exploratory drill holes, interpreting cores and cuttings, establishing groundwater levels, and dealing with groundwater-induced drilling problems such as flowing wells.

6. Instruction for cutting back credits that are not approved.

Some of the credits claimed in this declaration may be cut back. Please check (u) in the boxes below to show how you wish to prioritize the deletion of credits:

- 1. Credits are to be cut back from the Bank first, followed by option 2 or 3 or 4 as indicated.
- 2. Credits are to be cut back starting with the claims listed last, working backwards; or
- 3. Credits are to be cut back equally over all claims listed in this declaration; or
- 4. Credits are to be cut back as prioritized on the attached appendix or as follows (describe):

Note: If you have not indicated how your credits are to be deleted, credits will be cut back from the Bank first followed by option number 2 if necessary.

Dear Sir or Madam:

Submission Number: 2.19590

Status

Subject: Transaction Number(s): W9980.00426 Approval After Notice

We have reviewed your Assessment Work submission with the above noted Transaction Number(s). The attached summary page(s) indicate the results of the review. WE RECOMMEND YOU READ THIS SUMMARY FOR THE DETAILS PERTAINING TO YOUR ASSESSMENT WORK.

If the status for a transaction is a 45 Day Notice, the summary will outline the reasons for the notice, and any steps you can take to remedy deficiencies. The 90-day deemed approval provision, subsection 6(7) of the Assessment Work Regulation, will no longer be in effect for assessment work which has received a 45 Day Notice. Allowable changes to your credit distribution can be made by contacting the Geoscience Assessment Office within this 45 Day period, otherwise assessment credit will be cut back and distributed as outlined in Section #6 of the Declaration of Assessment work form.

Please note any revisions must be submitted in DUPLICATE to the Geoscience Assessment Office, by the response date on the summary.

If you have any questions regarding this correspondence, please contact BRUCE GATES by e-mail at bruce.gates@ndm.gov.on.ca or by telephone at (705) 670-5856.

Yours sincerely,

Work Report Assessment Results

Submission Number: 2.19590

Date Correspondence Sent: November 24, 1999

Assessor: BRUCE GATES

Transaction Number	First Claim Number	Township(s) / Area(s)	Status	Approval Date
W9980.00426	1222292	TERRY, DUNMORE	Approval After Notice	November 18, 1999

Section:

18 Other BULK

The requested revisions for this submission, as outlined in the 45 Day Notification dated October 4, 1999, have not been received within the time period specified.

Accordingly, assessment work credit for this submission has been reduced to 50% of the amount eligible. We have allowed for the removal of 10 tonnes, as a bulk sample, which is the maximum amount of material allowed without obtaining a bulk sampling permit. The following costs have been allowed:

1 day of equipment, labour, materials = \$3,240
loading into rail cars = \$150
report = \$250

Total = \$3,640 x 50%(lacking a detailed map and results of testing) = \$1,820

The assessment credit is being reduced by \$10,227.00. The TOTAL VALUE of assessment credit that will be allowed, based on the information provided in this submission, is \$1,820.00.
