PROSPECTING WORK

(a) CLAIM LOCATION

Area: District of Cochrane, Timmins, Ontario

Township: Godfrey Township

Mining Division: Porcupine

Claim Map: MNDM Plan Map #G-3991

NTS #: 42A/SW, Provincial Series

(b) LOCATION MAPS

Refer to Figure 1 of this report for claim location.

(c) ACCESS

Access to claim is driveable by way of Highway #101 travelling west from Timmins, Ontario to logging road. Logging road is Malette haulage road which generally follows the township line between Godfrey and Bristol Townships. Travelling time to south end of claim - 35 minutes (40 km).

(d) CLAIM

Claim #1189769 1-Unit 40 Acres

(e) NATURE AND CONTENT

- (1) general prospecting of claim
- (2) map exposed outcrops
- (3) locate old trenches
- (4) grab sample where sulphides occur

(f) **OBSERVATION**

On June 25¹⁹⁹² General prospecting of Claim #1189769 in Godfrey Township was started. All exposed outcrops and old trenches were located and mapped. Outcrop areas were only noted in the central south west section of the claim. Old trenches from past programs were found on all outcrop areas (refer to claim map). Sand escars cover the north east corner, the rest is tagalder swamp.

On June 26¹⁹⁹² we started hand stripping old trenches and braking lose rocks which were scattered around the trenches. We noted that galenas, chalcopryite and pyrites were in great concentrations. One V.G. sample was found. In finding the V.G. we knew we must further investigate.

On 27/06/92 we made the decision to dig deeper down in quartz vein than what past performers did. With chisel and hammer we began to look in Trench A (refer to claim map). Six inches down we noted great concentrations of galenas and pyrites. In chipping at them, more V.G. was found. Four samples of the galenas and sulphides were taken and sent to be assayed.

On 28/06/92 we chiselled deeper down in Trench B (refer to claim map). Sizeable deposits of chalcopryite were found dispersed throughout the 2½ inch quartz vein. Also one V.G. sample found. V.G. was in white quartz by itself. Three samples were taken. Two of chalcopryite and one of wall rock. They are being sent out to be assayed.

On 26/07/92 further investigation of other quartz veins was carried out. Galenas chalcopryite and pyrites were also found in them. Three V.G. samples were found in Trench D (refer to claim map).

All sample assays are not in at this time. We will forward them as soon as they are received.

CONCLUSION

03/08/92

We have brought a geologist onto the property and he has recommended further investigation at depth.
