

# Prospecting Report on Deloro Township

by L.B.L. Richgold Mines Incorporated

Lilianne Letourneau, President/Owner

July 8<sup>th</sup>, 2004

LBL Richgold Mines Incorporated

1

42A06NW2043 2.28084 OGDEN

010

This report covers the prospecting work carried out in the fall of 2003 on three block units in Ogden Township. The blocks are the following: block.claim 4 units 1238662, block claim 2 units 1238663, and block.claim 2 units 1238664. There was one occasion where work was done on leased property in Deloro Township. The work being reported was done from August 1-3rd/03 and from October 9<sup>th</sup> to November 2<sup>nd</sup> 2003.

### **Report for August 1st-3rd 2003**

August 1, 2003

Lilianne Letourneau, Joseph Letourneau and Jason Courville spent a full day starting at North end of claims ( 1238662) and walked south on an old overgrown road through claim (1238663) all the way to end of (1238664). They checked for outcrops but did not gather samples. North part of claims was very rocky with outcrops off and on and with swamp like areas. The outcrops were mainly formation of stringers of quartz. We were checking the stake lines to ensure the stakes were all visible in preparation for clearing of the lines.

August 2, 2003

Lilianne Letourneau, Joseph Letourneau, Jason Courville spent a day prospecting along line 22 from walking North to South (1238662 to 1238664) checking for outcrops. An old structure (shack) was found within the North claim 1238662. This area displayed evidence of previous prospecting work. The overgrowth of spruce trees, tag alters became so thick that two members of the party got lost for approximately 3-4 hours. They had lost the line markings and had strayed off. Eventually they found the end of the southern unit 1238664 and walked north rejoining the third member of the party on 1238662. During the time the two men were lost, Lilianne was searching near line 22 for evidence of outcrops and looking for potential samples and areas to strip. Lilianne obtained samples on 1238662. Once she realized her party was missing and lost, she searched the area and found the two men returning north along line 22.

Note: Lilianne Letourneau contacted CANMET Mining & Mineral Sciences

Laboratory in Ottawa ON August 11, 2003. She arranged a date to bring in samples as Marcim Pawlak was to be on vacation. She gave her samples to Glen Poirrier (613-947-9833) from that lab during the week that Ottawa experienced its great blackout. LBL Richgold Mines Inc. is not submitting a claim for the samples as the sample results are yet to be received.

August 3<sup>rd</sup>, 2003

Work party consisted of Joseph Letourneau, Jason Courville, Lilianne Letourneau and Bryan McKay Geologist. The work party began with a search of the extreme north end of claim unit 1238662 searching for the corner post so that the work party could identify where claims ended. We were unsuccessful in finding corner post. Bryan McKay Geologist showed work party where to begin cutting lines. This work day was to help orient everyone on where they will be working for cutting of the lines.

### **Report for October 9<sup>th</sup> to November 2<sup>nd</sup> 2003**

October 16<sup>th</sup>, 2003

Work party consisted of Joseph Letourneau, Jason Courville and Lilianne Letourneau. They went to Northern end of claim 1238662 with Mr. Fournier who had been hired originally to stake these claims for LBL Richgold Mines Inc.. The purpose of this work day was to find the corner post showing the end of the Northern part of claims. Mr. Fournier had a GPS with him and it took several hours to locate the corner post. The post was found on the ground and covered with much debris. There was evidence of snowmobiling in this area and it is believed that some of the stake markers were knocked down by snow and by snowmachines. We spent time ensuring our stake posts were all in line and standing up. We were working the north claim 1238662 moving from east to west. Some of the area was cleared of debris.

October 17<sup>th</sup>, 2003

Joseph Letourneau, Jason Courville and Lilianne Letourneau entered claims from north end of unit 1238662 looking for line 23 to begin cutting line. Lilianne

spent time prospecting looking for samples, outcrops but no samples were gathered. Picket markings for line 23 were eventually found in a thick area of spruce trees and tag alters.

October 18<sup>th</sup> and 19<sup>th</sup>, 2003

Working party was Joseph Letourneau, Jason Courville and Lilianne Letourneau. The two days were spent clearing and cutting the length of line 23. Work started at North end of 1238662 and ended at south end of 1238664. The terrain along line 23 began in north end with spruce trees, then cedars with many tag alters and units 1238663, 1238664 were mostly covered by tag alters, spruce with swampy areas. The swamp areas got larger as we got closer to Paradise Creek.

October 25, 2003

The work party consisted of Joseph Letourneau, Val Toner and Lilianne Letourneau. We entered claims from south west and traveled to North end of claims along line 23. A shaft was found on 1238662 as well as a large trench. The ground around was rough with quartz outcrops and covered by thick vegetation. We spent time familiarizing ourselves with this area for safety reasons and for planning of future prospecting work.

October 29<sup>th</sup>, 2003

Brian Atkinson, Resident Geologist for Ministry of Northern Development and Mines went out with Lilianne Letourneau and Joseph Letourneau. We walked line 23 from southwest end of claim 1238664 to 1238662 to show Mr. Atkinson the shaft and trench. Samples were taken by Mr. Atkinson and pictures were taken for recording purposes. Copies of the pictures have been included with this report. The party returned south and then turned east to enter leased property on Deloro Township to view B.Q. Drill holes at two separate sites. The party surveyed the veins at these drill sites.

Dear Sir or Madam

**Subject: Approval of Assessment Work**

We have approved your Assessment Work Submission with the above noted Transaction Number(s). The attached Work Report Summary indicates the results of the approval.

At the discretion of the Ministry, the assessment work performed on the mining lands noted in this work report may be subject to inspection and/or investigation at any time.

If you have any question regarding this correspondence, please contact STEVEN BENETEAU by email at [steve.beneteau@ndm.gov.on.ca](mailto:steve.beneteau@ndm.gov.on.ca) or by phone at (705) 670-5855.

Yours Sincerely,

Ron.C. Gashinski  
Senior Manager, Mining Lands Section
