2004 Exploration Program

1.1 Summary of Program

A total of 699.65 meters in three holes were drilled on this project during 2004. Two of the holes CP04-01 and CP04-02 are currently being submitted for assessment credit.

1.2 Mining Land, Location and Access

The project area is located about 21 km west-southwest of the Dome Mine, South Porcupine, Ontario.

The area is accessible using paved city streets and gravel roads (Dalton and Wawaitin Roads) connecting Highway 101 and Kenogamissi Lake.

The holes were drilled on mining claims P1204119 and P1189258.

These claims are under an option agreement with Comaplex Minerals and are jointly held by Placer Dome (CLA) Ltd (51%) and Kinross Gold Corporation (49%) under the terms of the Porcupine Joint Venture.

1.5 Previous Work

1916 J. Thibault The earliest exploration work recorded in the area occurred just west of Wawaytan block on a 10 claim group acquired by J. Thibault. The property was worked intermittently for the next 20 years. Two shallow shafts were sunk (35m, 8.5m) and a very limited amount of gold was produced.

1933 Hollinger Consolidated Gold Mines Limited optioned the Thibault claim group and drilled a total of 14 holes for 914 metres. No significant results were reported.

1937 Darby Development Corporation optioned the Thibault property and in 1939 drilled 8 holes in the southern part of the property. No significant results were reported.

1940 Maryland Porcupine Mines Limited optioned the Thibault property, and between 1945-46 by Conigas Exploration Limited. Between the two companies a total of 10 drill holes was completed for a total of 1677 metres. One of the Maryland holes returned a value of 5.13 g/t in a 1.2 metres wide quartz vein.

1946 O. F. Carter resampled Conigas core, no significant results were reported.

1916-1950 At unspecified times exploration work occurred outside of the Thibault property. The most significant was the sinking of a shallow shaft on the east side of the Mattagami River, known as the Schnubb Shaft. Unsubstantiated reports indicated that significant gold values were returned from quartz veins in the shaft.

1962 Paymaster Porcupine Mines tested an EM conductor at the north end of Kenogamissi Lake with two drill holes totalling 152 metres.

1965 Jacomo Mines Limited conducted a magnetometer survey over an 8 unit property just north of the lake. One hole totalling 193 metres was completed.

1980 Comstate Minerals staked a number of claims both east and west of the Mattagami River north of Kenogamissi Lake. Comstate completed a surface geochemical survey and followed-up in 1981 with an overburden sampling program. No significant gold assays were returned from the till sampling program.

1983 Kerr-Addison Mines optioned the property and drilled two holes, which returned no significant gold assays.

1986 Falconbridge Exploration optioned the Comstate property. Ground geophysical surveys were completed as well as limited trenching. Later that year 3 drill holes were completed, none of which returned significant gold assays.

1996 Comstate transferred the property to a related company Comaplex Minerals Inc. Comaplex optioned the ground to Black Pearl minerals. At this time Band-Ore Resources discovered the Golden River East Zone on an adjacent property to the west. Black Pearl felt that there ground felt the eastern extension of favourable geology, which hosted the Golden River East Zone. Between 1996 and 1997 Black Pearl completed ground geophysical surveys, grid geological mapping and 10,221 metres of drilling in 36 diamond drill holes. One highly anomalous assay was returned (154 g/t/0.40m), which could not be duplicated in numerous adjacent holes.

FROM	TO	ROCK-TYPE	C.A.	RQD	REMARKS	FROM	TO	WIDTH	SAMPLE #	QC?	AU G/T	% QTZ	% QS	% Py	% Po	% Aspy	Remarks
168.85	170.67	SS7,CL	50	100	Chloritic m/g greywacke. Two 5 mm py cubes at 169.15 m in greywacke.	71.00	72.00	1.00	E375421	Y	0.067						Lapilli tuff, trace disseminated pyrite.
170.67	173.35	FP11,M,SE	60	100	M/g, dark grey, foliated, Quartz Feldspar Porphyry. Trace veining noted in dyke. Contacts sharp parallel to foliation at 60 dca. No sulphides noted.	72.00	72.50	0.50	E375422	Y	0.012		10	0.01		5 cm qz-ak vein parallel to foliation trace py in vein selvage	
173.35	186.22	SS7,cl	65	95	M/g, medium green, chloritic moderately sheared, non magnetic greywacke. Less than 1 cm qz-ak per m, trace py associated.	72.50	73.00	0.50	E375423	Y	0.074			0.01		5 mm f/g py cube in 1 lapilli tuff.	
186.22	186.52	FP12,SS7,M	65	100	Massive drk grey feldspar porphyry. Contacts sharp and parallel to foliation. Inclusions of SS7 in porphyry. No sulphides or veining.	82.40	83.00	0.60	E375424	Y	0.093		20	0.01		12 cm irregular qz-ak veining, trace py in vein selvage.	
186.52	188.66	VM,CL	65	95	Medium green, chloritic, medium grained to lapilli size clast in a mafic to intermediate volc? Unit is similar to immediately above but has 2 to 5 cm lapilli size clasts. Trace qz-ak veining and pyrite noted in tuff.	89.00	90.00	1.00	E375426	Y	0.001					Hematite altered mafic tuff, disseminated f/g specularite.	
188.66	188.96	FP12	65	60	Dark grey medium grained feldspar porphyry dyke. Contacts are parallel to foliation. No veining or sulphides in dyke.	90.00	91.00	1.00	E375427	Y	0.005					Hematite altered mafic tuff, trace disseminated specularite.	
188.96	203.55	SS7,CL	65	95	M/g ,chl, medium green, non magnetic greywacke to mafic tuff. Well foliated at 65dca. No significant veining or sulphides present in unit. No significant alt associated with veins present.	91.00	92.00	1.00	E375429	Y	0.002					Hematite altered mafic tuff, trace disseminated specularite.	
203.55	208.85	VM,FP12,CL	60	95	Mixed chloritic mafic to intermediate lapilli tuff and m/g tuff to greywacke. Mod chl alt. No significant veins or sulphides. Fol well developed 60dca.	105.70	106.75	1.05	E375430	Y	0.023					QFP, no sulphides.	
208.85	209.80	FP12	60	100	M/g, dark grey, QFP. Upper and lower contacts parallel to foliation at 60dca. Minor Greywacke inclusions, no veining and only trace pyrite notes. No significant alteration present.	111.75	112.75	1.00	E375431	Y	0.002		10			Qz-ak vein filling a brittle fault. no sulphides noted.	
209.80	216.30	SS7,CL	65	95	Medium green, medium grained chloritic greywacke to tuff. Minor qz-ak veins with trace pyrite. Veins usually parallel to foliation.	112.75	114.00	1.25	E375432	Y	0.0005		5	0.01		Several qz-ak stringers a low angle to ca. Trace py noted in veins.	
216.30	225.20	VM,SS7,CL	65	90	Medium grained, pale to medium green, chloritic mafic to intermediate tuff to greywacke. Unit is coarser than above and appears to have 1 to 3 mm feldspar crystals in a f.g chl matrix. No significant veining or sulphides in tuff.	127.30	128.30	1.00	E375433	Y	0.0005		5			1 cm qz-ca vein 0 dca fo 2.7 m, no sulphides in vein.	
208.85	209.80	FP12	60	100	M/g, dark grey, QFP. Upper and lower contacts parallel to foliation at 60dca. Minor Greywacke inclusions, no veining and only trace pyrite notes. No significant alteration present.	128.30	129.30	1.00	E375434	Y	0.016		5			1 cm qz-ca vein 0 dca, no sulphides noted.	
209.80	216.30	SS7,CL	65	95	Medium green, medium grained chloritic greywacke to tuff. Minor qz-ak veins with trace pyrite. Veins usually parallel to foliation.	141.00	141.50	0.50	E375436	Y	0.003		10			5 cm cz-ca vein in greywacke. No sulphides noted. Vein at 60-80 dca uc and lc.	
216.30	225.20	VM,SS7,CL	65	90	Medium grained, pale to medium green, chloritic mafic to intermediate tuff to greywacke. Unit is coarser than above and appears to have 1 to 3 mm feldspar crystals in a f.g chl matrix. No significant veining or sulphides in tuff.	154.50	155.00	0.50	E375437	Y	0.002		5			1 to 3cm qz-ca vein, No sulphides	
						156.00	157.00	1.00	E375438	Y	0.002					Greywacke with trace disseminated pyrite.	

FROM	TO	ROCK-TYPE	C.A.	RQD	REMARKS	FROM	TO	WIDTH	SAMPLE #	QC?	AU G/T	% QTZ	% QS	% Py	% Po	% Aspy	Remarks
225.20	226.05	FP11	65	100	Foliated, pale pinkish grey QFP. Contacts parallel to foliation at 60 to 65 dca. Minor qz stringer noted in QFP, no significant sulphides.	162.00	163.00	1.00	E375439	Y	0.003						Greywacke with possible 1mm tourmaline vein. No sulphides.
226.05	236.06	VM,SS7,CL	60	95	Medium grained, chloritic, medium green intermediate to mafic tuff to greywacke. Foliation/layering moderate at 60dca. No significant veins or sulphides noted.	163.00	164.00	1.00	E375440	Y	0.0005						Greywacke with minor qz-ca stringers. No sulphide noted.
236.06	237.21	FP11	55	100	Medium grained, dark grey foliated QFP. Upper and lower contacts parallel to foliation at 55 dca. Minor qz veining and no significant sulphides noted in dyke.	166.75	167.25	0.50	E375441	Y	0.002		20				10 cm qz-ca vein in greywacke, no sulphides
237.21	246.95	VM,SS7,CL	55	90	Medium grained, medium green, chloritic, non magnetic intermediate to mafic tuff. Lower contact gradational into a seritic greywacke for 2 to 3 metres. minor qz-ca veining, no significant sulphides.	168.85	169.35	0.50	E375442	Y	0.002						Greywacke with two 5 mm py cubes.
246.95	251.00	SS7,CL,SE	55	50	F/g, pale green to cream coloured greywacke to argillite. Weak chl alt and mod sericite alt. No significant veining and trace disseminated pyrite. 251m EOH.	172.00	173.00	1.00	E375443	Y	0.002						Quartz Feldspar Porphyry. No veining or sulphides.
						173.00	173.35	0.35	E375444	Y	0.0005						Quartz Feldspar Porphyry
						177.25	177.75	0.50	E375445	Y	0.003		5	0.01			Two 1 to 1.5 cm qz-ak veins parallel to foliation trace py and possibly cp.
						182.50	183.00	0.50	E375447	Y	0.005		12	0.01			6 cm qz-ak vein in greywacke. Vein parallel to foliation. Trace py in vein selvage.
						184.00	184.50	0.50	E375448	Y	0.004		3	0.01			Two qz-ak stringers in greywacke, trace pyrite.
						184.50	185.00	0.50	E375450	Y	0.002		10				5 cm qz-ak vein parallel to foliation, trace py in vein. weak 1 cm epidote selvages.
						185.00	185.50	0.50	E370001	Y	0.002		3				An irregular 1 cm qz-ak vein at high angle to foliation. No sulphides in vein.
						188.96	189.46	0.50	E370002	Y	0.002		35	0.01			Two qz-ak veins in SS7, trace pyrite and maybe c associated with veins.
						190.50	191.00	0.50	E370003	Y	0.007		5				A 2.5 cm qz-ak vein in chloritic greywacke. No significant pyrite noted.

FROM	TO	ROCK-TYPE	C.A.	RQD	REMARKS	FROM	TO	WIDTH	SAMPLE #	QC?	AU G/T	% QTZ	% QS	% Py	% Po	% Aspy	Remarks
						199.60	200.40	0.80	E370005	Y	0.003						Four 1 to 1.5 cm qz-ak veins in greywacke. No significant sulphides associated, one speck of cp noted in one vein.
						211.00	212.00	1.00	E370006	Y	0.001						Chloritic greywacke with 1 cm qz-ak vein parallel to foliation, trace pyrite in vein.
						212.00	213.00	1.00	E370007	Y	0.002						Chloritic greywacke with 0.8 cm qz-ak vein parallel to foliation, trace pyrite in vein.
						213.00	213.75	0.75	E370008	Y	0.001						Chloritic greywacke.
						213.75	214.25	0.50	E370009	Y	0.002		0.5				Chloritic greywacke with 0.5 cm qz-ak vein parallel to foliation, trace pyrite in vein.
						214.25	215.30	1.05	E370010	Y	0.001						Chloritic Greywacke.
						215.30	216.30	1.00	E370011	Y	0.002		5				Chloritic greywacke with 3cm pink irregular qz-ca vein, no sulphides in vein
						217.50	218.00	0.50	E370012	Y	0.002		10				5 cm qz-ca vein sub parallel to foliation. No sulphides associated.
						244.50	245.00	0.50	E370013	Y	0.0005		5				Qz-ca stringers in mafic to intermediate tuff, no sulphides.

Dear Sir or Madam

Submission Number: 2.29142
Transaction Number(s): W0560.00135

Subject: Approval of Assessment Work

We have approved your Assessment Work Submission with the above noted Transaction Number(s). The attached Work Report Summary indicates the results of the approval.

At the discretion of the Ministry, the assessment work performed on the mining lands noted in this work report may be subject to inspection and/or investigation at any time.

If you have any question regarding this correspondence, please contact BRUCE GATES by email at bruce.gates@ndm.gov.on.ca or by phone at (705) 670-5856.

Yours Sincerely,

A handwritten signature in black ink that reads "Ron C. Gashinski".

**General Information and Limitations**

Those wishing to stake mining claims should consult with the Provincial Mining Recorder's Office or the Ministry of Northern Development and Mines for additional information on the status of the lands shown herein. This map is not intended for navigational survey, or any other determination purposes as the information shown on this map is compiled from various sources. Completeness and accuracy are not guaranteed. Additional information may also be obtained through the local Land Titles or Registry Office, or the Ministry of Natural Resources.
