## 1.0 INTRODUCTION

The Kabi Lake property, comprising 212 contiguous claims surrounding the old Hiawatha gold mine on the western shore of Kabinakagami Lake (Figure 1), was optioned from River Oaks Gold Corporation by Noranda Exploration Company, Limited in May, 1987. In August, 1987, four additional claims in the centre of the optioned block of claims were staked by Noranda in the immediate vicinity of the old mine.

## 2.0 LOCATION AND ACCESS

The Kabi Lake property is situated approximately 35 km southwest from the junction of the CNR and ACR at Oba, Ontario (Figure 2). The claims are shown on Ontario MNR plan M1299 (Lizar Township), which straddles the boundary between NTS sheets 42 C/15 and 16.

Access is generally by float plane from White River (60 km) or Wawa (100 km), although a navigable river/lake route from Oba is also possible. A third access route is provided by the Larkin Lake road, a timbering road used by the Quebec and Ontario Paper Company. The Larkin Lake road starts approximately 13 km south of Hornepayne on the east side of Hwy. 631, and winds for approximately 45 km to the south-southeast to the western boundary of the Kabi Lake claims.

KABI LAKE

# CLAIM DISPOSITION MAP

3.0 PREVIOUS EXPLORATION (From D. MacInnis, 1983)

1926 An indian named Peter Louttit locates and open pits gold showing. Sells 3 1/4 tons "ore" for \$1,000.

1936 Hiawatha Gold Mines was formed (H.G.M.)

1936-39 H.G.M. spent \$1,000,000 for 16,508 ft. of diamond drilling, 325 ft of shaft, 6,361 ft. of development, plus purchase of 20 t.p.d. mill.

1939 H.G.M. installed mill and processed 2,000 tons with little gold recovered. This recorded production averaged 0.074 opt. Mine closed end of 1939.

1966 Property reverts to crown on death of the principals and company's charter cancelled. Subsequently staked by R.W. McCarthy.

1969 Primrock Mining and Exploration Incorporated:  
Dewatered shaft.

South Zone: Quartz veins 1" - 6" to 3' with disseminated pyrite. Minor chalcopyrite and galena. Visible gold has been reported. Chip sampling by Primrock appears to have been selective, nevertheless data suggests gold mineralization occurs.

North Zone: Gold mineralization in a quartz eye porphyry varying in width from 2' to 10'. Narrow non-continuous quartz veins occur within and at the contacts. These veins contain variable amounts of cp and po. The gold appears to be associated with the quartz vein portions. Sampling by Primrock over 50' of drift on the 150 level located 0.17/3.5', 2.78/3.0' and 1.87/2.9'.

West Zone: Similar quartz porphyry sill occurs 1/2 mile S.W. of the shaft. Four diamond drill holes in 1937 assayed 1.3 oz over 3.5'. Primrock drilled two holes, 0.27/2.1 and 0.40 over 2.2 (true widths). Trial shipment of one ton gave 57 oz Au.

Bear Creek Zone: 8' quartz vein with no assays in a flat drill hole.

1971 Primrock carried out surface mapping and geophysics.

1974 Keltic Mining Corp. Ltd.: Optioned property and pumped out and re-sampled workings. Later dropped option.

1978-80 Nickel Rim Mines Ltd. (Dickenson Group): Drilled four DDH (2700') surface mapping and magnetometer survey. Three VG occurrences in drilling and one assay of 1.21 oz over 0.8'.

1980-81 Sveinson Way Mineral Services Ltd.: Staked additional 163 claims and optioned property. Drilled twenty holes totalling 4265' (AQ).

North Zone: (Porphyry)

Twenty holes intersected porphyry. Only one hole assayed 0.12/0.8m. A surface grab nearby assayed 0.19 oz. These results do not correspond to those by Hiawatha. Drifting on the 150 and 275 levels indicated that Hiawatha met with discouraging grades as well.

South Zone: (Quartz vein, main zone)

Six holes drilled into area above 275 level and were also above holes by Nickel Rim. No VG noted. Only one assay of 0.08/0.7m.

Bear Creek Zone: (Porphyry and Shear)

Drilled two holes under Kabi Lake, shear zone intersected is broad with infrequent veins, and minor amounts of sulphides. Most likely this is a contact zone of alteration with a nearby granodiorite. No values reported.

Also in 1980, 15,000' of control line was cut and mapping and geochemical surveys were carried out. Analyses for Cu, Pb, Au, no values reported.

4.0 REGIONAL GEOLOGY (From D. MacInnis, 1983)

Property is centrally located within the Kabinakagami Lake Greenstone Belt believed to be the eastern continuation of the Hemlo Belt.

Gold mineralization in the belt occurs within quartz stringer systems cutting sheared felsic volcanics and intrusives. The felsic rocks are localized along a major mafic volcanic - sedimentary contact and several showings are known along a 10 km strike length. The old Hiawatha Mine (6286 tons produced at 0.10 oz/ton), currently held by others, occurs along strike to the northeast. Much of the claim group is drift covered.

Work by previous operators outlined a broad area of anomalous soil geochemistry localized around the volcanic-sedimentary contact, which has not been tested.

## 5.0 WORK PERFORMED

During the summers of 1987 and 1988 a total of 166 grab samples of rock were collected from the Kabi Lake property for lithogeochemical studies. Of the total, 128 samples were analysed for Au and other trace elements. Major element determinations were made for 97 of the samples.

### 5.1 Minor Element Lithogeochemistry

Minor element lithogeochemical analyses were performed by Technical Service Labs of Mississauga, Ontario and by Warnock Hersey of Winnipeg, Manitoba. Results were determined by fire assay with an atomic absorption finish.

Approximately one in every six samples analysed for Au, returned an anomalous geochemical value of >100 ppb. Four samples, which returned geochemical levels greater than 1000 ppb were reanalysed by fire assay, returning a high assay of 0.065 opt.

### 5.2 Major Element Lithogeochemistry

Major element lithogeochem determinations were performed by Technical Service Labs of Mississauga, Ontario using ICAP.

Results were examined in an attempt to define depletion and enrichment trends with respect to specific elements. Due to the small population of samples taken, no specific trends were defined. However, in general many of the auriferous samples are associated with zones of sodium depletion.

I, Douglas McIlveen, hereby certify that:

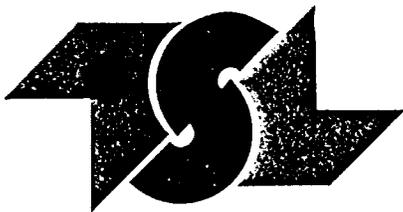

1. I am a practicing geologist with Noranda Exploration Company, Limited in Thunder Bay, Ontario, and reside at 10 La Verendrye, Marathon, Ontario.
2. I am a graduate of McMASTER UNIVERSITY, HAMILTON, ONT., 1983, with the degree of B.Sc. GEOLOGY.
3. I am a Canadian Citizen.
4. I have practiced my profession for approximately Six years since graduation.
5. I do not have, nor do I expect to receive, directly or indirectly, any interest in the properties of Noranda Exploration Company, Limited.

Douglas McIlveen

Geologist  
Northwestern Ontario Division

Dated at Marathon, Ontario  
this 15<sup>th</sup> day of May, 1989.

|              | 934262 |                  |              |        |                  |

Expenditures (excludes power stripping)

Type of Work Performed **Major/Minor Element Lithogeochem**

Performed on Claim(s) **Appended**

Calculation of Expenditure Days Credits

Total Expenditures **\$ 3,026.90** + **15** = **201** Total Days Credits

Instructions: Total Days Credits may be apportioned at the claim holder's choice. Enter number of days credits per claim selected in columns at right.

Total number of mining claims covered by this report of work. **43**

For Office Use Only

Total Days Cr. Recorded **846** Date Recorded **May 24/89** Mining Recorder **Blair Ink**

Date Approved as Recorded **May 24/89** Branch Director **Blair Ink**

*See mineral statement!*

Date **May 17, 1989** Recorded Holder or Agent (Signature) **Ronna F. Tergie**

I hereby certify that I have a personal and intimate knowledge of the facts set forth in the Report of Work annexed hereto, having performed the work or witnessed same during and/or after its completion and the annexed report is true.

Name and Postal Address of Person Certifying **Ronna F. Tergie, P.O. Box 2656, Thunder Bay, Ontario P7B 5G2**

Dear Madam:

Re: Notice of Intent dated July 5, 1989 for Geochemical Survey  
and Assaying submitted on Mining Claims P 923803 et al in  
Lizar Township.

The assessment work credits, as listed with the above-mentioned Notice of Intent,  
have been approved as of the above date.

Please inform the recorded holder of these mining claims and so indicate on your  
records.

Yours sincerely,

W.R. Cowan
