

**WORK REPORT on the PICHETTE PROPERTY**

This property consists of fourteen claims (four leased, ten not leased) and are located in Vincent Township, Claim Map #G613 in the Thunder Bay Mining Division.

A total of 70 work days were spent on the property, dating between June 30, 1997, and August 30, 1997.

Work was conducted by the owner, Val Pichette, with assistance from prospectors James Hamel and George Daniels, with Gordon Brinkman supplying and operating backhoe to assist in the trenching and stripping.

Work consisted of:

- a) Removing windfall to allow access tot he main showing and Dougall pits
- b) flagging a grid over the leased claims
- c) examining all outcrops
- d) prospecting and sampling
- e) cleaning out old trenches with backhoe
- f) cleaning out old pits with grub hoes
- g) opening up new pits with explosives
- h) cutting trails into new outcrops to allow access with quad, and to move equipment in for exploration program in 1998.

Signature: Valerie Pichette

Date: January 26, 1998

# REGIONAL GEOLOGY RECEIVED

JAN 28 1996

The Pichette Occurrence is located in the Wabigoon Subprovince, a portion of the Superior Structure Province of the Precambrian Shield. The property is located in the Southern Metavolcanic Belt at the main Beardmore Geraldton Belt. The Southern Metavolcanic Belt is an east trending lenticular belt up to 3 km wide. The Belt consists of massive pillowed and amygdaloidal mafic (iron tholeiitic) flows. Banded oxide iron formation, interflow metasedimentary rocks, and minor mafic/felsic intrusions also occur (Carter, 1985). Foliation strikes 75° - 95° and dips 70° - 80° to the south.

Property geology mineralization consists of (1) the Main Zone, (2) Arsenopyrite North Zone, and (3) Dougall East Pits.

(1) Main Zone: The Main Zone is a broad shear zone up to 30 m wide striking 80° - 90° and dipping 65° S. Basalts are strongly sheared. Gold is associated with iron carbonate, calcite, pyrrhotite, pyrite and minor chalcopyrite. Highly cartoidal, saccharoidal, quartz veins occur mainly discordant to shearing within the zone.

(2) The Arsenopyrite North Zone consists of banded recrystallized chert-magnetite iron formation striking 90°. Quartz veins have intruded conformably with the metavolcanics and iron formation contact. Minor quartz stringers crosscut the BIF. Gold mineralization is associated with arsenopyrite and pyrrhotite.

(3) The Dougall East Pits consist of a series of banded chert-magnetite iron formations hosting gold mineralization associated with disseminated pyrite and arsenopyrite. Sulphide are secondary replacement minerals related to hydrothermal fluids and late quartz veining. Preliminary 1996 exploration identified gold values up to 0.163 ounces per ton gold in recrystallized sheared cherty iron formation associated with pyrite. Samples taken in 1996 identified 1 metre of 0.126 ounces per ton gold values (chip sample).

# RESULTS

Assay results ranging from 0.001 to 0.480 ounces per ton gold were returned from chip samples. Assay results ranging from 0.001 to 0.391 ounces per ton were returned from soil samples.

Results as high as 4237 ppm copper were returned from assays.

Specific assay results are detailed.

Work Report

Additional Information  
Provided June 1, 1998

42E12NE2002 2.18177 VINCENT

020

During the 1997 prospecting season a work program was completed on the "Pichette Mining Explorations" claims. These are shown on claim map G613 of Vincent Township in the Thunder Bay Mining District.

A base line was cut and grid lines flagged over four leased claims numbered as follows:

Claim # 519316

Claim # 519428

Claim # 614162

Claim # 614163

A backhoe was used to repair a culvert and washout on the road to permit access to the east end of Claim # 614163. The Dougall trench 30 m X 5 m X 1 m was cleaned out and stripped with a backhoe. Several old pits and two old trenches were rediscovered and cleaned out.

Three old trenches were discovered on Claim # 614162. These trenches were in mafic volcanics and they were cleaned out in the 1997 program. They had five narrow quartz veins mineralized with finely disseminated pyrite, chalcopyrite, with a little malachite staining.

On Claim # 519428 a stripped area was relocated. There is an old pit on the north side and eight metres to the south is a trench approximately ten metres long and about one metre deep. Both the pit and the trench were cleaned out and well mineralized quartz and arsenopyrite veins were uncovered. The quartz is mineralized with pyrite, chalcopyrite and arsenopyrite. The arsenopyrite veins pinches and swells but would average about twenty centimetres in width. In some spots it is massive.

The main zones on Claim # 519428 was also cleaned out (moss, brush and windfall). A quartz vein on the south side was opened up (drill and blasting). Sample #25 was taken here and the assay yielded a result of 0.227 ounces per ton gold. More prospecting, stripping and trenching are required to follow up on this find.

Traverses were done over Claims # 614166, #1204934, and the western half of #535205. Outcrops are quite numerous but are covered with very heavy overburden. They are covered with spruce, jackpine and some poplar. Between the outcrops the low lying ground is swampy.

Traverses were also done on the two most northern claims, # 614168 and #614167. They are covered with mature pine trees. There are only a few outcrops on these two claims and the ground has a thick layer of sand and in some places very fine gravel.

All traverses were marked on the large map with the symbol \_ . . . \_ .

Pichette 4

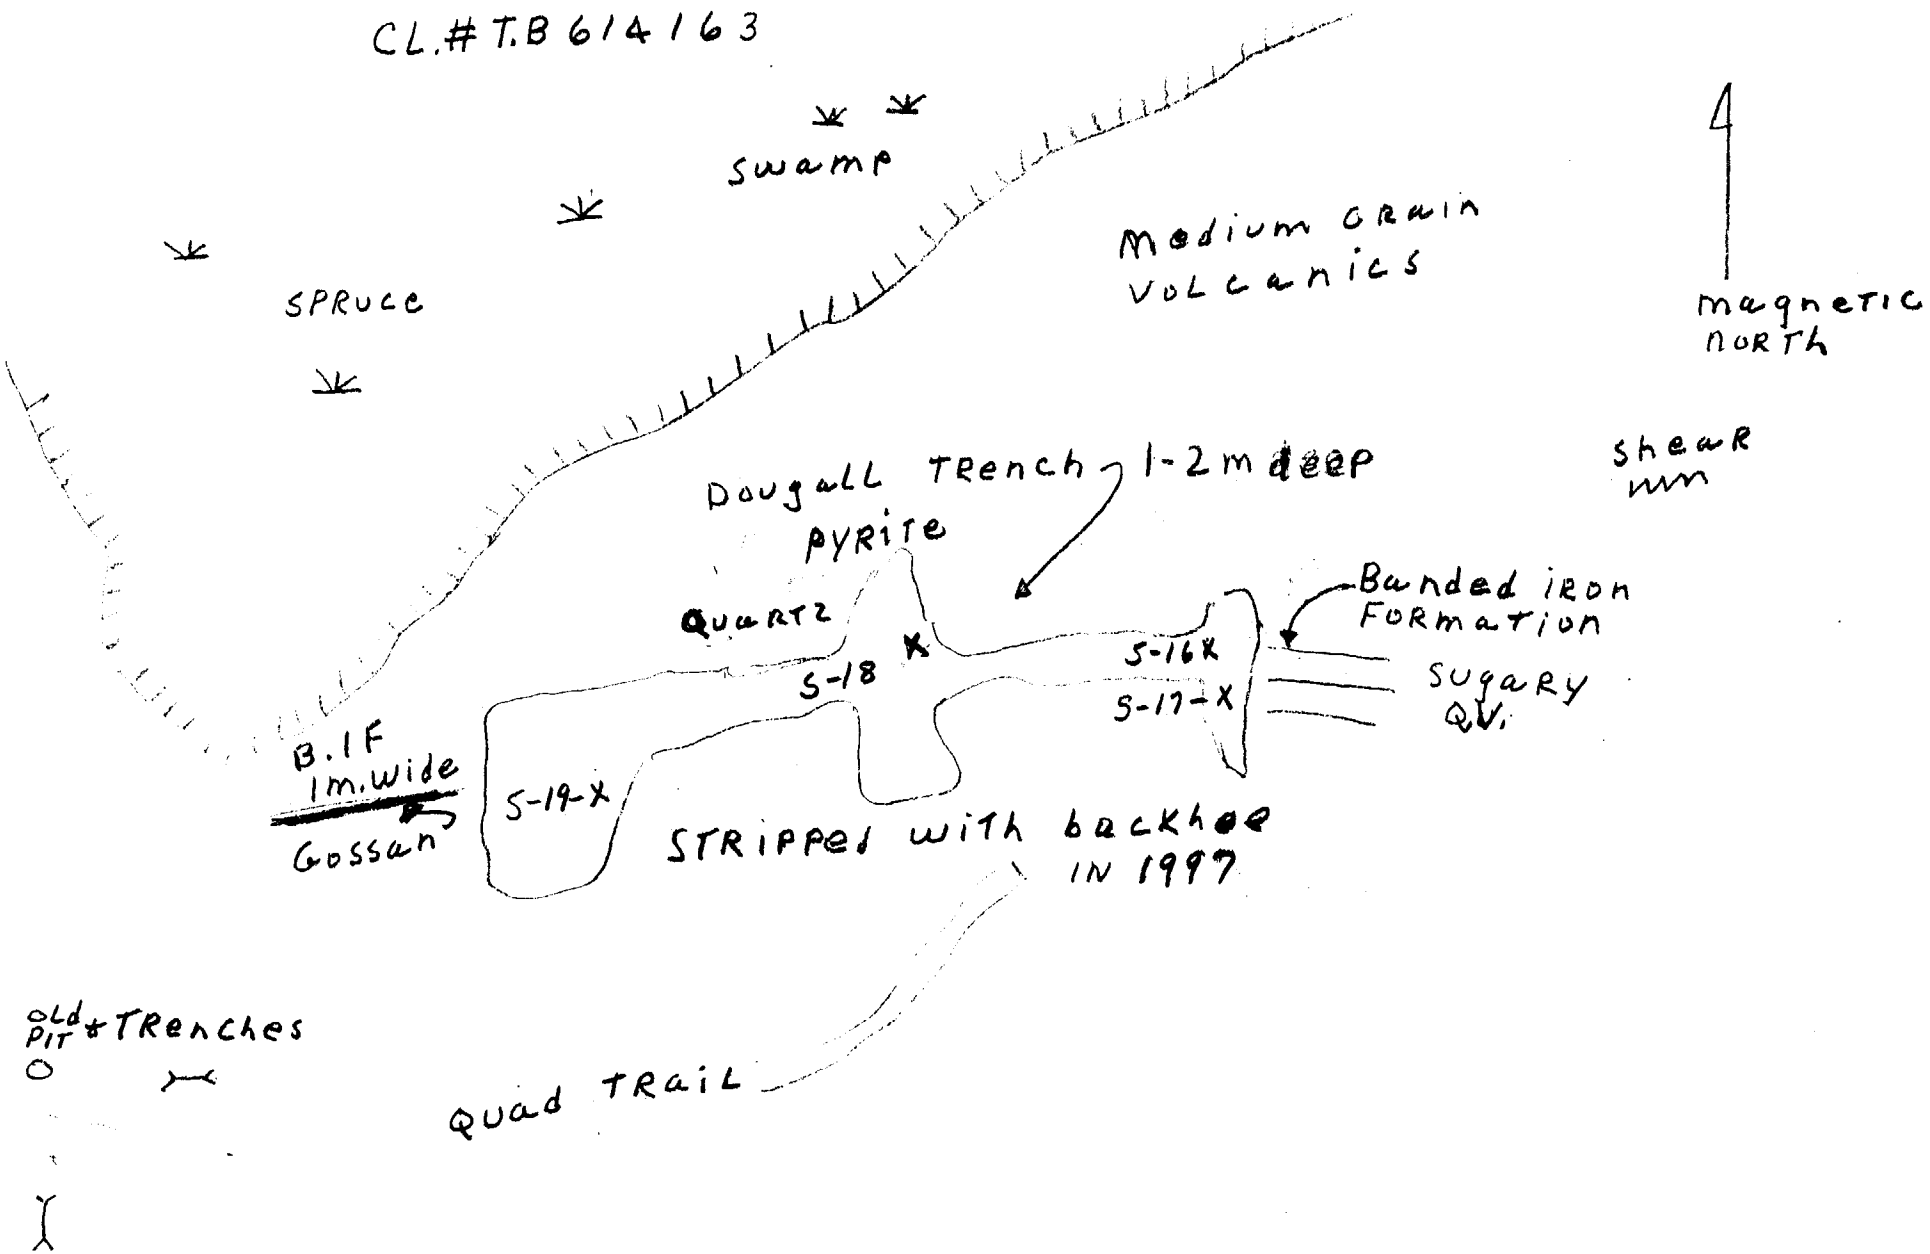

Mechanical stripping was done with a John Deere backhoe owned and operated by Gordon Brinkman, prospector licensed #E33612 as indicated in the following table:

Date	Hours	Hourly Rate	Total for Day
July 24	3	\$45.00	\$135.00
July 25	3	\$45.00	\$135.00
July 29	3	\$45.00	\$135.00
July 30	3	\$45.00	\$135.00
July 31	4	\$45.00	\$180.00
<hr/>			
5 days	16		\$720.00
		GST, PST	<u>108.00</u>
		TOTAL	\$828.00

Prospector's assistants were George Daniels, license # E31831, and James Hamel, license # E30488. These assistants worked on the base line, grid lines, mechanical stripping and blasting.  
Owner's licence - # E 31431.

Revised Copy

Ministry of sub-sections 65(2) and 66(3) of the Mining Act. Under section 8 of the Act, you are invited to review the assessment work and correspond with the mining land holder. Mining Recorder, Ministry of Northern Development and Mines, 6th Floor,

Instructions: - For work performed on Crown Lands before recording a claim, use form 0240. - Please type or print in ink. 2.18177

1. Recorded holder(s) (Attach a list if necessary)

Form with fields for Name, Address, Client Number, Telephone Number, and Fax Number. Includes handwritten entry for Valerie Pichette and a large 'REMOVED' stamp.

2. Type of work performed: Check (✓) and report on only ONE of the following groups for this declaration.

- Geotechnical: prospecting, surveys, assays and work under section 18 (regs)
Physical: drilling, stripping, trenching and associated assays
Rehabilitation

Work Type: Flagged grid over 4 claims, mechanical stripping, cleaned out old trenches, prospecting and sampling. Office Use: Commodity, Total \$ Value of Work Claimed (11,794.00), NTS Reference, Mining Division (Thunder Bay), Resident Geologist District (Thunder Bay).

- Please remember to: - obtain a work permit from the Ministry of Natural Resources as required; - provide proper notice to surface rights holders before starting work; - complete and attach a Statement of Costs, form 0212; - provide a map showing contiguous mining lands that are linked for assigning work; - include two copies of your technical report.

3. Person or companies who prepared the technical report (Attach a list if necessary)

Form with fields for Name, Address, Telephone Number, and Fax Number. Includes handwritten entry for V. Pichette and a 'RECEIVED' stamp dated JAN 28 1998.

4. Certification by Recorded Holder or Agent

I, Valerie Pichette, do hereby certify that I have personal knowledge of the facts set forth in this Declaration of Assessment Work having caused the work to be performed or witnessed the same during or after its completion and, to the best of my knowledge, the annexed report is true.

Signature of Recorded Holder or Agent: Valerie Pichette, Date: January 21, 1998, Agent's Address: Doomed, Telephone Number: April 28/98

AMENDED

5. Work to be recorded and distributed. Work can only be assigned to claims that are contiguous (adjoining) to the mining land where work was performed, at the time work was performed. A map showing the contiguous link must accompany this form.

*FINAL Revised Copy*

GEOSCIENCE ASSESSMENT OFFICE

I, Valerie Pichette, do hereby certify that the above work credits are eligible under subsection 7 (1) of the Assessment Work Regulation 6/96 for assignment to contiguous claims or for application to the claim where the work was done.

Signature of Recorded Holder or Agent Authorized in Writing: Valerie Pichette Date: June 1, 1998

6. Instructions for cutting back credits that are not approved.

Some of the credits claimed in this declaration may be cut back. Please check (✓) in the boxes below to show how you wish to prioritize the deletion of credits:

- 1. Credits are to be cut back from the Bank first, followed by option 2 or 3 or 4 as indicated.
- 2. Credits are to be cut back starting with the claims listed last, working backwards; or
- 3. Credits are to be cut back equally over all claims listed in this declaration; or
- 4. Credits are to be cut back as prioritized on the attached appendix or as follows (describe):

Note: If you have not indicated how your credits are to be deleted, credits will be cut back from the Bank first, followed by option number 2 if necessary.

## Calculations of Filing Discounts:

1. Work filed within two years of performance is claimed at 100% of the above Total Value of Assessment Work. The Minister may reject all or part of the assessment work submitted.

## Certification verifying costs:

I, VALERIE PICHETTE (please print full name), do hereby certify, that the amounts shown are as accurate as may reasonably be determined and the costs were incurred while conducting assessment work on the lands indicated on the accompanying Declaration of Work form as RECORDED HOLDER (recorded holder, agent, or state company position with signing authority) I am authorized to make this certification.

Dear Sir or Madam:

**Submission Number: 2.18177**

**Status**

**Subject: Transaction Number(s):** W9840.00034 Approval After Notice

---

We have reviewed your Assessment Work submission with the above noted Transaction Number(s). The attached summary page(s) indicate the results of the review. **WE RECOMMEND YOU READ THIS SUMMARY FOR THE DETAILS PERTAINING TO YOUR ASSESSMENT WORK.**

If the status for a transaction is a 45 Day Notice, the summary will outline the reasons for the notice, and any steps you can take to remedy deficiencies. The 90-day deemed approval provision, subsection 6(7) of the Assessment Work Regulation, will no longer be in effect for assessment work which has received a 45 Day Notice. Allowable changes to your credit distribution can be made by contacting the Geoscience Assessment Office within this 45 Day period, otherwise assessment credit will be cut back and distributed as outlined in Section #6 of the Declaration of Assessment work form.

Please note any revisions must be submitted in DUPLICATE to the Geoscience Assessment Office, by the response date on the summary.

If you have any questions regarding this correspondence, please contact Bruce Gates by e-mail at [gatesb2@epo.gov.on.ca](mailto:gatesb2@epo.gov.on.ca) or by telephone at (705) 670-5856.

Yours sincerely,
