Claim #406091

Prospecting Program on Claims #406090 and 406091 in Summers Twp. Claim Map G-165 N.T.S. Map sheet # 42 E/12 Latitude 49°35' - Longitude 87°59'

Prospecting traverses were done in a North South direction across the formation on strike to the west of the Main Au. Showing. A few traverses were also made across a shear zone on strike to the east of the Main Au showing. Drilling blasting and resampling was done on the Main showing. Gold on the main showing is confined to narrow seams of arsenopyrite striking across the Iron formation. The Iron formation was again located approx. 50 meters west on strike of the main showing. This was also drilled blasted and sampled. The Iron formation was again located approx. 75 meters west on strike of the main showing. An old trench was located approx. 320 meters west along strike of the main showing. This trench was cleaned out and blasting was done using Magne pak.

Panning was done with poor results - 11 samples were sent in for assay. The samples from the old trench had considerable fine pyrite and arsenopyrite. The mineralization in the old trench is somewhat different from that of the main zone.

Overburden in the area traversed consisted mainly of silt and sand. Bedrock outcropping is mainly covered with a 2"-4" blanket of moss. Vegetation is mainly spruce, balsam, and pine, and birch along the creek.

is recommended. For location and access see attached claim map.

Daily Log (Continued)

Friday 22/94	prospecting.
Saturday 23/94	prospecting.
Sunday 24/94	prospecting. All trench located
