

ONTARIO PROSPECTORS ASSISTANCE PROGRAM (OPAP) FINAL SUBMISSION FORM 1997

INSTRUCTIONS: Please read the guidebook before completing form. Please type or print.
Submit completed form and supporting documentation
by January 31, 1998 to:

OPAP, Mines Group
Ministry of Northern Development & Mines
4th Floor, 933 Ramsey Lake Rd., Sudbury, Ontario P3E 6B5

TO BE COMPLETED BY SUCCESSFUL GRANTEES AFTER PROJECT COMPLETION AND ACCOMPANIED BY WRITTEN REPORTS, MAPS, ETC.

2.18413

Applicant Herb. G. Goodman File Number OP97-085

Proposed project area(s) (Twp. or claim map name, latitude and longitude) Completed?

1. Morgan Extension Property, Summers Twp., Beardmore Area, Lat. 49°36' N Yes No
 2. _____ Long. 87°59' W Yes No

Changes to proposed project(s) (if any)
additional stripping locations.

List other co-owners of the property with OPAP grants that worked on project
None

I. WORK PERFORMED BY APPLICANT (Summary of Section IV)

1. Project #1 area/name	<u>Morgan Extension Property, South</u>	No. days worked by applicant (that's only you)	
Traditional prospecting	No. of samples <u>30</u>		<u>6</u>
Geological surveys	Scale _____		
Geophysical surveys	Type _____ Miles/km _____		
Geochemical surveys	Type _____ No. of samples _____		
Drilling	Type _____ Ft/m _____		
Stripping/Trenching	Method <u>manual</u>		<u>6</u>
Other	Type _____		
		TOTAL	<u>12</u>

Form filled out by Applicant Other (please specify) _____
 Report prepared by Applicant Other (please specify) _____
 Technical report Filed for Assessment Work Yes No

I. WORK PERFORMED BY APPLICANT (Continued)

2. Project #2 area/name _____		No. days worked by applicant _____

The Ministry of Northern Development and Mines may verify all statements related to and made herein this application.

- I am the person named in the Final Submission Form under the Ontario Prospectors Assistance Program.
- I am ordinarily a resident of Canada.
- I have complied with all the requirements of the said program.
- I understand that it is an offence under the Ontario Mineral Exploration Act, R.S.O. 1990, to make a false or misleading statement and that all statements and all other information submitted in support of the said application are true and correct.
- I was not employed by the Mines and Minerals Division of the Ministry while in receipt of the OPAP grant.
- I am aware that any other Provincial or Federal Government financial assistance received for said application will be deducted from the amount of incurred "Total Eligible Expenses".

It is an Offence under subsection 8(1)(A) of the Ontario Mineral Exploration Act, R.S.O. 1990 to knowingly furnish false or misleading information.

Personal information on this form is obtained under the authority of the Ontario Mineral Exploration Act, R.S.O. 1990, sections 2, 3 and 4 and the Ontario Prospectors Assistance Program Regulation, sections 4, 5 and 6. The financial and technical information will be used for the purpose of determining the eligibility of the applicant to

have a program designated for financial assistance and the amount of such assistance. Other information, such as statistical information about the individual projects will be used for the purpose of determining the overall effectiveness of the program. It may be disclosed for those purposes and I consent to its disclosure for such

purposes. Questions about this collection should be directed to Senior Manager, Mines Group, Ministry of Northern Development and Mines, 5th Floor, 933 Ramsey Lake Road, Sudbury, Ontario P3E 6B5, Toll free 1-800-265-0834.

FINAL SUBMISSION

**Morgan South Extension Project
Beardmore-Geraldton Area
Thunder Bay Mining Division
Summers Township
Claim Sheet G-165
N.T.S. Sheet 42 E34 D/4
49°36 N. Lat., 87°59 W. Long**

**Herb G. Goodman
Nov. 14, 1997**

LIST OF CLAIMS

Five mineral claims situated in Summers Township, Thunder Bay Mining Division, Ontario, described as follows:

<u>Claim #</u>	<u>Units</u>
1196695	2
1196696	1
1196697	3
1183727	1
1208939	1
1210729	4
1210730	3
7 claims	15 units

LOCATION, ACCESS AND CLAIM INFORMATION

The Morgan Extension property is located in the southwest section of Summers Township, approximately 2 km due west of Beardmore, Ontario. Beardmore is on Highway 11 some 200 km northeast of Thunder Bay. Summers Township appears on N.T.S. Sheet 42E/NW and the approximate centre of the property is the Princess Creek chain of Lakes just to the north. Access to the property is provided by a 4x4 trail that leaves Highway 11 at a point about 0.5 km north of Beardmore and extends across the north boundary of the claim block, and by another bush road that branches off the north road and traverses south through property, then west along the southern boundary of the property..

The property consists of 15 claim units with 7 mineral claims. The claims are in the Beardmore-Geraldton Resident Geologist's area of Thunder Bay Mining Division and appears on the M.N.R. claim sheet G-165. The claims are held 100% by myself, Herb G. Goodman Jr. of Beardmore, Ontario.

REGIONAL GEOLOGY

The property lies within the area of the Beardmore-Geraldton Greenstone Belt, a subdivision of the Precambrian Wabigoon Subprovince of the Canadian Shield. The belt is described as an east-trending, isoclinally folded sequence of mainly metasediments interlayered with mafic to intermediated metavolcanics. On its north boundary, the belt is separated from the Onaman-Tashota Metavolcanic Belt by the Paint Lake Fault system and on its south boundary by the Keewatin sequence of metasediments located south of the main Beardmore-Geraldton belt.

The property is situated along a major tectonic break, known as the Empire Fault, in the far southwest part of the Beardmore-Geraldton Greenstone Belt. The Empire Fault cuts through the property from the southwest to the northeast corner and separates a belt of metavolcanic rock to the south from a belt of metasedimentary rocks to the north.

On the property the metasediments consist of weakly to strongly foliated greywacke interbedded with mudstone. Reminent bedding, dipping 80 S, is observed locally and is parallel to the regional foliation, at 70 E azimuth. The unit generally lacks any significant alteration, sulphide mineralization or quartz-carbonate veining. Carbonate alteration associated with narrow quartz-carbonate stringers and minor (up to 1%) pyrite and arsenopyrite mineralization occurs locally. The metavolcanics consist predominantly of massive basaltic flows which strike a 065 azimuth and dip 80 S. In places the flows are sheared, silicified, carbonated and mineralized and commonly grade along strike into tuffaceous units.

SPECIFIC GEOLOGY

The geology from the work done for this project was comprised from three different stripping locations, termed areas A, B, and C. Area "A" revealed an exposed area of generally massive, siliceous metavolcanic flows containing minor sulphide mineralization. This area lacks any significant alteration, shearing or any deposit of any favourable gold bearing structure. The magnetic anomaly outlined in my proposal was not located and may exist deeper than expected.

Geology from the work done at the area "B" location was successful in locating a gold bearing structure. This structure which is a continuation of the work done along strike of past exploration work (OP-94). Stripping here revealed a quartz veined and lenses system hosted in moderately sheared, altered, siliceous, pillowed metavolcanics. The quartz vein and lenses matter is crack seal in character and blue-grey in colour, contained abundant arsenopyrite, pyrite and lesser chalcopyrite. The sulfides are disseminated throughout the quartz, but is more concentrated along the host metavolcanics contact. These contacts are highly sheared with mineralization and silicification found penetrating the metavolcanics up to a foot on either side. Alteration in the form of chlorite and sericite is found throughout the zone as well as in any metavolcanic seams found in the quartz.

Geology from the work done at the area "C" location, which also is an extension of previous work (OP-95), is relatively the same as the area "B" location. This parallel structure contains the similar altered, silicified metavolcanics but less quartz veining and lenses were uncovered. Veins uncovered were much narrower but still continuous and mineralized with pyrite and arsenopyrite. In the middle of exposure a outcrop of massive magnetite iron formation was exposed. This iron formation contains roughly 1% pyrite and is more massive rather than banded deposit.

WORK DONE

As mentioned three areas termed A' B' and C were stripped. A total area of 150,000 square feet was uncovered. Areas of outcrop exposure that warranted it were blasted and sampled. A total of 30 samples were taken.

RESULTS AND RECOMMENDATIONS

Results from the work done on The Morgan Extension Property (OP-97) can be termed as mildly encouraging. The work, from this OPAP and previous OPAP's (namely OP-95), has outlined that two parallel structures that have considerable length and contain areas of good gold deposition. Further mining companies will be made aware of this fact and hopefully now an option can be reached. I recommend no further OPAP funds be used for this property, as enough has been done from this and previous OPAP. Perhaps the high grade quartz veins can be mined on a smaller and personal level if no deal can be reached. I thank the OPAP for their funding help for this and other properties.

SAMPLES

SAMPLE #	TYPE	DESCRIPTION	ASSAY RESULTS Au (OZ./ TON)
1	rock	blue-grey quartz vein matter narrow seams of sericite-chlorite altered (metavolcanics within quartz, minor pyrite and arsenopyrite.)	0.001
2	rock	blue-grey quartz, pyrite in narrow seams and blotches, arsenopyrite blotches, sulphide content 2%.	0.084
3	rock	same as # 2 not in seams.	0.028
4	rock	dark greyish quartz, abundant arsenopyrite and pyrite with minor chalcopyrite, sulphide content 5%.	0.122
5	rock	whitish quartz with darker blue quartz with arsenopyrite rich seams, also abundant pyrite in both quartz types, 3-4 % sulphide.	0.153
6	rock	blue-grey quartz , disseminated arsenopyrite and pyrite, 3 % sulphide.	0.006
7	rock	same as # 6.	0.006
8	rock	blue-grey quartz with narrow seams of arsenopyrite, attached piece of dark grey quartz with mainly pyrite pyrrhite, 3 % sulphide.	0.037
9	rock	blue-grey quartz and darker grey quartz inclusions, mixture of pyrite, arsenopyrite and pyrite, 2-3 5 sulphide.	0.062
10	rock	dark greyish quartz, abundant pyrrhite with lesser arsenopyrite and pyrite, 3 % sulphide.	0.008
11	rock	sheared siliceous metavolcanics, minor pyrite and arsenopyrite.	0.001

12	rock	blue-grey quartz and highly siliceous, sheared metavolcanics, cross-cutting whitish quartz veinlets in volcanics, disseminated pyrite and pyrrhite, 1-2 % sulphide.	0.001
13	rock	same as # 12	0.001
14	rock	blue-grey quartz 1 % pyrrhite with minor arsenopyrite and pyrite.	0.001
15	rock	whitish, well fractured quartz, 1 % coarse pyrite.	0.001
16	rock	rusty, sheared metavolcanics, minor sulphide	0.001
17	rock	same as # 16.	0.001
18	rock	magnetite iron formation, massive magnetite, minor pyrite.	0.001
19	rock	same as # 18	0.001
20	rock	sheared, siliceous metavolcanics adjacent to iron formation, minor sulphide.	0.001
21	rock	sheared, gossaned, recrystallized quartz within mafic metavolcanics, narrow seams within quartz containing minor pyrite or possible magnetite.	0.003
22	rock	siliceous metavolcanics, minor sulphide.	0.001
23	rock	whitish well fractured quartz with minor chunks of adjacent wallrock, quartz rather barren, wallrock mineralized with pyrite and pyrrhite with minor chalcopyrite.	Lost sample
24	rock	banded, sugary, recrystallized quartz iron formation, 1 % magnetite, minor pyrite.	0.002
25	rock	same as # 24	0.006
26	rock	blue-grey quartz, disseminated pyrite and arsenopyrite, 2 % sulphide.	0.012
27	rock	same as # 26.	0.036
28	rock	whitish, well fractured quartz, minor pyrite and arsenopyrite.	0.001

29	rock	same as # 28	0.001
30	rock	highly gossaned, sheared, cooked metavolcanics.	0.001

6. Instructions for cutting back credits that are not approved.

Some of the credits claimed in this declaration may be cut back. Please check (✓) in the boxes below to show how you wish to prioritize the deletion of credits:

- 1. Credits are to be cut back from the Bank first, followed by option 2 or 3 or 4 as indicated.
- 2. Credits are to be cut back starting with the claims listed last, working backwards; or
- 3. Credits are to be cut back equally over all claims listed in this declaration; or
- 4. Credits are to be cut back as prioritized on the attached appendix or as follows (describe):

Dear Sir or Madam:

Submission Number: 2.18413

Status

Subject: Transaction Number(s): W9840.00403 Deemed Approval

We have reviewed your Assessment Work submission with the above noted Transaction Number(s). The attached summary page(s) indicate the results of the review. **WE RECOMMEND YOU READ THIS SUMMARY FOR THE DETAILS PERTAINING TO YOUR ASSESSMENT WORK.**

If the status for a transaction is a 45 Day Notice, the summary will outline the reasons for the notice, and any steps you can take to remedy deficiencies. The 90-day deemed approval provision, subsection 6(7) of the Assessment Work Regulation, will no longer be in effect for assessment work which has received a 45 Day Notice. Allowable changes to your credit distribution can be made by contacting the Geoscience Assessment Office within this 45 Day period, otherwise assessment credit will be cut back and distributed as outlined in Section #6 of the Declaration of Assessment work form.

Please note any revisions must be submitted in DUPLICATE to the Geoscience Assessment Office, by the response date on the summary.

If you have any questions regarding this correspondence, please contact Steve Beneteau by e-mail at benetest@epo.gov.on.ca or by telephone at (705) 670-5855.

Yours sincerely,
