INTRODUCTION

A surface exploration program was conducted on the Moss Lake Property from July to November 1996. The program included prospecting, manual and mechanical stripping, trenching and sampling. The stripping and trenching was completed on favourable targets located during prospecting and in conjunction with previously reported mineral occurrences.

This program was financed by the approval of an OPAAP grant for 1996. A subsequent purchase agreement was made on the Moss Lake Project Property with PELE MOUNTAIN RESOURCES INC in the late fall of 1996.

LOCATION AND ACCESS

The Moss Lake Property consists of 60 contiguous mining claim units. The property covers approximately 2400 acres within the central part of Moss Township, Thunder Bay Mining Division, NTS sheet 52 B/10, latitude $48^{\circ}40'$ and longitude $90^{\circ}50'$.

Access to the property from Thunder Bay is west on highway 11/170 to Shabagag. Turn on Highway 91 west and proceed to Swamp Lake Road 15 km past Haskabawic. Secondary logging roads connecting to Swamp Lake Road provide access to the Property. The distance from Thunder Bay is 125 kms.

PREVIOUS WORK

Gold was first discovered in 1871 by a trapper near the property. Several Mining Companies subsequently acquired the property with production from the mine amounting to 143,724 tons of ore which yielded 29,678 ounces of gold and 172,617 ounces of silver.

In 1957. Horand Co. optioned the property from Kerry Gold Mines and conducted geological and electromagnetic surveys. Five drill holes were done to test the conductors.

In 1971 + 1972 Belore Mines conducted prospecting, geophysics and diamond drilling on the Ardern Mine Property. Two drill holes, 72-08 and 72-09 intersected 1.12 opt Au/12.5% Pt and 0.15 opt Au/15% Pt respectively.

Peme Explorations conducted prospecting and mag surveys followed by diamond drilling. Seventeen holes totalling 5567 ft were completed with a number of the holes intersecting economic gold mineralization within the iron formation.

In 1991 + 1992 Goldfields Canadian Mining and Akiko Gold Resources Ltd conducted a two phase exploration program of geological mapping and sampling followed by a diamond drilling program. Several high grade gold occurrences were obtained.

Costy Bumbay carried out stripping and trenching in 1994. Encouraging gold assays

were obtained in quartz veins associated with the iron formation originally mapped by Dome Exploration.

In 1995 Eino Ranta conducted an exploration project which included prospecting and trenching. Gold values of 2.90 opt Au were obtained in the southwestern portion of the claim block. The zone runs east-west parallel to another high grade gold structure 100 meters to the north. Further trenching and diamond drilling were recommended by Ovalbay Geological Services Inc.

PROPERTY GEOLOGY

TYPE OF DEPOSIT:

Mostly quartz veins with oxide iron formation in intermediate to mafic volcanic rocks. Veins are near the PRODUCTION VEIN at the AROREN MINE, a former gold producer.

GEOLOGY:-

Geology of the property has been described in Geological Report #85 by F.R. Harris for Ontario Department of Mines. The property is situated in the Shebandowan portion of the ABITIBI-WANAN Greenstone Belt. The claims are underlain

by a N.E. trending package of intermediate to mafic volcanic rocks in contact with Argillaceous sedimentary rocks to the north. To the east lies a large syenite stock (Moss Lake Intrusion)

Geological mapping by Dome Explorations (1973,74) outlined several gold-bearing structures associated with small iron formations. Stripping by Akiko Loxi Gold in 1993 revealed an iron formation cut by quartz veins. One assay was over 43 opt gold. Host rocks consist of intermediate to mafic volcanic flows and breccias, iron formation and quartz veins. Shearing and faulting of the host rocks have allowed the development of gold-bearing quartz vein systems.

OBJECTIVE OF 1996 PROGRAM

The Moss Lake Property is a good area for a potential high grade gold deposit. It is adjacent to the Arden Gold Mine (Moss) which was previously an active gold producer. The gold-bearing quartz veins need to be further evaluated and prospected. They are excellent targets being associated with iron formations. Additional shear zones running east off the

main ARDEN SHEAR are also good potential mineral targets.

The area is recommended for exploration by MNDM district geologists. The ultimate goal is to find a significant gold deposit leading to a viable GOLD MINE.

METHODS OF WORK

The initial phase of the project was done by prospecting the claims east and south of Moss Lake. Locating the Fisher Lake Zone to the north and south of Fisher Lake provided the best trenching targets. Previously stripped areas by Akiko-hori-Gold Ltd were also used. Heavy overburden requiring the need for mechanical stripping. Portions of the Fisher Lake Zone were uncovered 150m NNE of the Akiko-Gold showing which produced one assay of over 430pt Au.

A shear zone 200m north was also stripped indicating a zone running east off the main ARDEN SHEAR.

Manual trenching and blasting was done and produced 5 trenches. Trenches were mucked and washed out with a water pump. Samples were taken and assayed mostly for gold.

Additional prospecting was done extensively around the Fisher Lake Zone to the NE.

It was intended to more clearly define the location of the iron formation and locate additional gold bearing quartz veins and possible east-west shear zones intersecting this main zone.

RESULTS

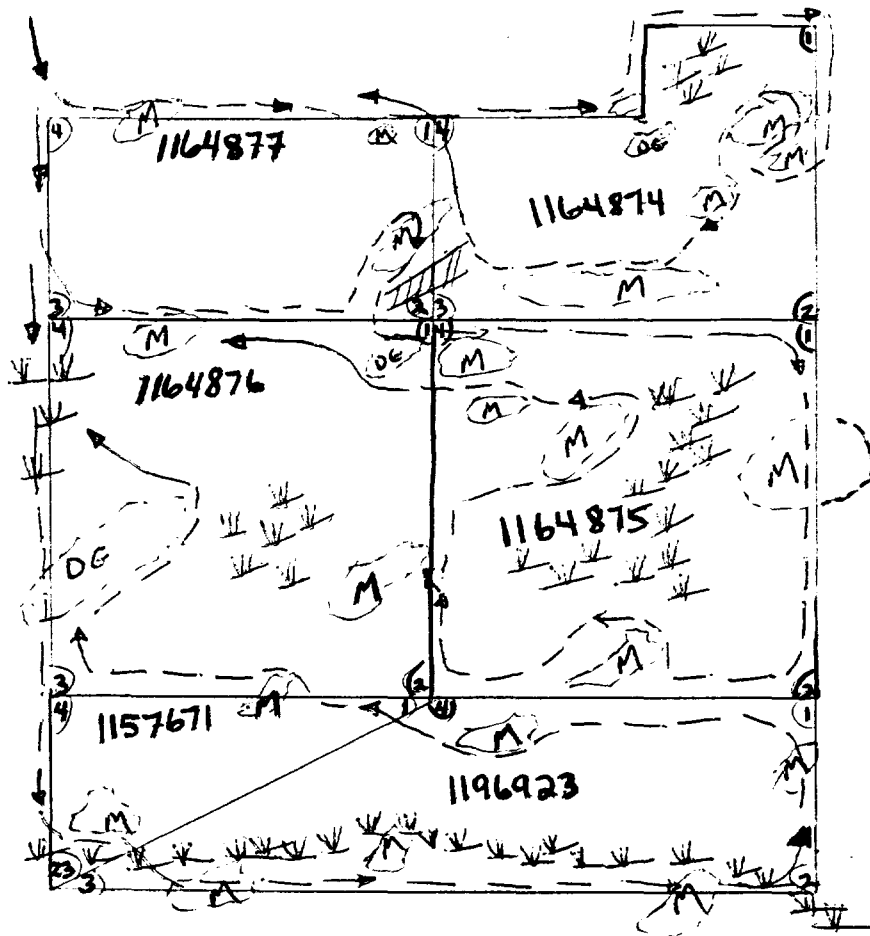

Assay results indicate the gold bearing quartz veins are excellent targets for continued exploration. Samples taken in the chert breccia zones also show relatively significant gold values and extend the area of exploration. The FISHER LAKE ZONE area is important to the overall potential of the area. However, a significant amount of attention is needed in locating east-west shear zones running off the BROKEN SHEAR, intersecting the FISHER LAKE ZONE and possibly extending further east.

The highest assay obtained was .240 opt Au (#34) located in Trench #2. A 10 ft chip sample in this trench assayed at .170 opt Au. Further sample results are listed in the following assay sheets.

RECOMMENDATIONS

The MOSS LAKE PROJECT area requires extensive geological mapping, prospecting and further sampling. Line cutting and ground surveys are needed to more clearly identify drilling targets. A significant drilling program must follow to test and locate the large number of zones that exist on the property.

PROSPECTING - SEPT. 20, 21, 22

- Prospecting done transversing east/west moving NNE at 50 to 100m intervals to try and better locate FISHER LAKE ZONE EXTENSION. Also to locate shear zones running east off the GREEN SHEAR. OVERBURDEN, SWAMP and limited significant outcrop makes zone location difficult. Geophysics ground testing is required.

The Ministry of Northern Development and Mines may verify all statements related to and made herein this application.

- I am the person named in the Final Submission Form under the Ontario Prospectors Assistance Program.
- I am ordinarily a resident of Canada.
- I have complied with all the requirements of the said program.
- I understand that it is an offence under the Ontario Mineral Exploration Act, R.S.O. 1990, to make a false or misleading statement and that all statements and all other information submitted in support of the said application are true and correct.
- I was not employed by the Mines and Minerals Division of the Ministry while in receipt of the OPAP grant.
- I am aware that any other Provincial or Federal Government financial assistance received for said application will be deducted from the amount of incurred "Total Eligible Expenses".

It is an Offence under subsection 8(1)(A) of the Ontario Mineral Exploration Act, R.S.O. 1990 to knowingly furnish false or misleading information.

Personal information on this form is obtained under the authority of the Ontario Mineral Exploration Act, R.S.O. 1990, sections 2, 3 and 4 and the Ontario Prospectors Assistance Program Regulation, sections 4, 5 and 6. The financial and technical information will be used for the purpose of determining the eligibility of the applicant to

have a program designated for financial assistance and the amount of such assistance. Other information, such as statistical information about the individual projects will be used for the purpose of determining the overall effectiveness of the program. It may be disclosed for those purposes and I consent to its disclosure for such

purposes. Questions about this collection should be directed to Supervisor, Incentives Office, Mining and Land Management Branch, Ministry of Northern Development and Mines, 5th Floor, 933 Ramsey Lake Road, Sudbury, Ontario P3E 6B5, Toll free 1-800-265-0834.

I, COSTY BUMBU (Print Full Name), do hereby certify that the above work credits are eligible under subsection 7 (1) of the Assessment Work Regulation 6/96 for assignment to contiguous claims or for application to the claim where the work was done.

Signature of Recorded Holder or Agent Authorized in Writing: C. Bumbu Date: May 7 1997

6. Instructions for cutting back credits that are not approved.

Some of the credits claimed in this declaration may be cut back. Please check (✓) in the boxes below to show how you wish to prioritize the deletion of credits:

- 1. Credits are to be cut back from the Bank first, followed by option 2 or 3 or 4 as indicated.
- 2. Credits are to be cut back starting with the claims listed last, working backwards; or
- 3. Credits are to be cut back equally over all claims listed in this declaration; or
- 4. Credits are to be cut back as prioritized on the attached appendix or as follows (describe):

1. 1196921
 2. 1202302
 * PLEASE CALL ME IF THERE IS A PROBLEM BEYOND THESE TWO.

Note: If you have not indicated how your credits are to be deleted, credits will be cut back from the Bank first, followed by option number 2 if necessary.

Personal information collected on this form is obtained under the authority of subsection 6(1) of the Assessment Work Regulation 6/86. Under section 8 of the Mining Act, the information is a public record. This information will be used to review the assessment work and correspond with the mining land holder. Questions about this collection should be directed to the Chief Mining Recorder, Ministry of Northern Development and Mines, 6th Floor, 933 Ramsey Lake Road, Sudbury, Ontario, P3E 6B5.

2.17383

Work Type	Units of Work <small>Depending on the type of work, list the number of hours/days worked, metres of drilling, kilometres of grid line, number of samples, etc.</small>	Cost Per Unit	Total Cost
Prospecting: <i>Manual Labour</i>	45 days	\$100.00	4,500.00
Technical Report Writing	3 days	100.00	300.00
Assays	65 Assays		782.28
Mechanical stripping with D-6 Tractor and one man	20 hrs.	\$100./hr.	2,000.00
Associated Costs (e.g. supplies, mobilization and demobilization).			
Courier (re. samples)			24.00
Photocopies			11.00
Dynamite, caps, fuse (B-Line)			230.00
Pluggers rental			200.00
water pump rental			75.00
Transportation Costs			
Personal vehicle: distance to site is 300km ^{round-trip}		.30/km.	2160
24 trips @ 300 km = 7200 km			
Food and Lodging Costs			
meal costs			288.67
Total Value of Assessment Work			10,570.95

Calculations of Filing Discounts:

1. Work filed within two years of performance is claimed at 100% of the above Total Value of Assessment Work.
2. If work is filed after two years and up to five years after performance, it can only be claimed at 50% of the Total Value of Assessment Work. If this situation applies to your claims, use the calculation below:

TOTAL VALUE OF ASSESSMENT WORK x 0.50 = Total \$ value of worked claimed.

Note:

- Work older than 5 years is not eligible for credit.
- A recorded holder may be required to verify expenditures claimed in this statement of costs within 45 days of a request for verification and/or correction/clarification. If verification and/or correction/clarification is not made, the Minister may reject all or part of the assessment work submitted.

Certification verifying costs:

I, JAMES P. [Signature] (please print full name), do hereby certify, that the amounts shown are as accurate as may reasonably be determined and the costs were incurred while conducting assessment work on the lands indicated on the accompanying Declaration of Work form as _____ I am authorized (recorded holder, agent, or state company position with signing authority) to make this certification.

Dear Sir or Madam:

Submission Number: 2.17383

Status

Subject: Transaction Number(s): W9740.00252 Approval

We have reviewed your Assessment Work submission with the above noted Transaction Number(s). The attached summary page(s) indicate the results of the review. **WE RECOMMEND YOU READ THIS SUMMARY FOR THE DETAILS PERTAINING TO YOUR ASSESSMENT WORK.**

If the status for a transaction is a 45 Day Notice, the summary will outline the reasons for the notice, and any steps you can take to remedy deficiencies. The 90-day deemed approval provision, subsection 6(7) of the Assessment Work Regulation, will no longer be in effect for assessment work which has received a 45 Day Notice.

Please note any revisions must be submitted in **DUPLICATE** to the Geoscience Assessment Office, by the response date on the summary.

If you have any questions regarding this correspondence, please contact Bruce Gates by e-mail at gates_b@torv05.ndm.gov.on.ca or by telephone at (705) 670-5856.

Yours sincerely,

A handwritten signature in black ink, appearing to read "Blair Kite".
