INTRODUCTION

Cedartree 2-92 consists of claim number K 855253. Bulldozer work was performed on this claim in December of 1990 and follow up trenching, rock drill, blasting, sampling and assays were done in 1991 and 1992. This claim is located on MNR claim map G 2613, area of Dogpaw Lake.

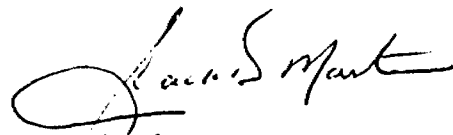

LOCATION AND ACCESSIBILITY

This claim is approximately ninety (90) kilometres south-east of the town of Kenora, Ontario. The simplest way to reach it is via truck from Kenora, east on highway 17, then south on highway 71 (Fort Frances) approximately twelve (12) kilometres south of Sioux Narrows to the Cameron Lake Road. You travel east on this gravel road for twelve point five (12.5) kilometres. This road runs through the southern part of claim K 898770 and can be easily recognized by the bulldozed, sheared and gravel area north and south of the road. Other alternatives are by float or ski equipped aircraft from Kenora or Nestor Falls, or via boat or skidoo from Whitefish First Nation Reserve at Dogpaw Lake.

NOTE: The Cameron Lake Road goes to the Nuinsco Mine at Cameron Lake, approximately twenty-five (25) kilometres east of highway seventy-one (71). It is also used by logging trucks. Dave Burt has a portable sawmill one (1) kilometre east of the highway.

GEOLOGY

The carbonate zone in the north central part of Claim No. K 855253 was bulldozed in 1990 and has been traced for over 90 metres and is open at both ends. It is in this zone that 12 trenches were blasted and sampled. The zone is silicious and mineralized with five (5) to ten (10) percent sulphides. The zone has many narrow quartz stringers throughout it. Low gold values were obtained from this zone. The area bulldozed is approximately ninety by thirty (90x30) metres.
