## REVELL TOWNSHIP PROJECT

### I

#### 1. INTRODUCTION

This report serves to summarize the results of a soil sampling program done in July and August, 2000 on claim 1149795 in Revell Township. This work was done to follow up the results of a bedrock sampling program done in 1999 which confirmed the presence of platinum, palladium and gold mineralization in a zone mineralized with disseminated chalcopyrite and nickeliferous pyrrhotite. The results of this recent work indicate the presence of other mineralized zones under overburden about 100 metres north of the original zone.

#### 2. LOCATION and ACCESS

Claim 1149795 on which work was done in both 1999 and 2000 is located approximately 55 kilometres east of Dryden, Ontario in the central part of Revell Township between the CPR Railway and the Trans-Canada Highway. This claim is accessible from the Trans-Canada Highway via the Basket Lake Forest Access Road. The MTS is 52F/9SE.

#### 3. PROPERTY DEFINITION

Claim 1149795 consists of two claim units which covers about 80 acres in area. Revell Township is surveyed and claim 1149795 is in the south half of the north part of Lot 7, Concession 4 of this township. The claim is in good standing until Sept. 29/2000.

#### 4. WORK HISTORY

Mineralization in the target area was first documented in 1969 by J. Satterly of the Ontario Department of Mines.

In 1967 G.L. Pigeon carried out work which included eight diamond drill holes.

R. Shklanka (1969) reported that drill hole number two of G.L. Pigeon's work intersected two separate intersections: one of 10 ft. assaying 0.77% Cu and 0.64% Ni and another of 12 ft. assaying 0.90% Cu and 0.68% Ni.

4. WORK HISTORY, Continued

In 1992 Champion Bear Resources carried out a geophysical survey. (H. Petack, 1992) This was followed with a geochemical survey by the same company in 1994. (S. Sears, 1994)

In 1999 R. Fairservice carried out a bedrock sampling program. This work indicated the presence of platinum, palladium and gold in the copper-nickel zone of mineralization.

5. CURRENT WORK

Work in the current program involved the collection and analysis of 41 samples of humus from the swamp area which borders the mineralized zone (outlined in the 1999 work) on the north side. These samples were taken from the black, organic material which exists in a layer from 2 cm to 10 cm in thickness throughout the swamp. With few exceptions the samples taken were saturated with swamp water. This work took place in two phases as follows:

Phase 1 July 12-13 & 14, 2000

1. Enlargement of the grid area to enable three cross-sectional tests of the swamp area.
2. Construction of pickets for sample stations at 10 metre intervals.
3. Collection of humus material from 30 sample sites numbered RVL-1-00 to RVL-30-00.
4. Delivery of these samples to ~~ALS Chemex~~ <sup>ALS Chemex</sup> in Thunder Bay, Ontario for drying and analysis.

Phase 2 August 2 & 3, 2000

1. Receipt and examination of results from phase I. The anomalous results from several samples indicated further work was warranted.
2. The grid was again expanded in the vicinity of the northernmost sample taken which also yielded the highest results. (RVL-30-00)
3. The collection of humus material from 11 sample sites numbered RVL-31-00 to RVL-41-00 incl.
4. Delivery of these samples to ALS Chemex in Thunder Bay

## 6. ASSAYING PROCEDURES

The 41 samples of humus from the project area were all analyzed by ALS Chemex.

The preparation of the samples by ALS Chemex involved the oven drying of all samples for a period of 48 hours at a temperature not exceeding 150 degrees Fahrenheit to avoid the escaping of volatile elements such as mercury and arsenic. The material was then sieved at -80 mesh (180 microns). Thirty grams of the resulting sample material was then shipped to the ALS Chemex laboratory in Mississauga, Ontario. Analysis was then done on all 41 samples using the ALS Chemex aqua regia ICP package for 32 metals including copper, nickel, cobalt, silver, chromium, zinc and vanadium.

Four of the original 30 samples (numbers 14, 15, 16 and 30) were also analyzed for gold, platinum and palladium using the ALS Chemex G-15 package which is a fire assay ICP package.

Copies of all the above reported assays are attached.

## 7. DISCUSSION OF RESULTS

The main focus of the 32 element G-32 package for the purpose of this project was copper and nickel. These elements have an obvious association with the platinum group elements and thus serve as indicator minerals for platinum and palladium.

In the current program sample number 29 was taken from humus directly overlying the presently known copper-nickel mineralization on the base line at 00+00 (R. J. Fairservice, 1999). The results from this sample which were 125 ppm Cu and 63 ppm Ni. offer some geochemical parameters which could be expected from overburden covered zones of disseminated copper and nickel mineralization in this area. Similar and somewhat higher results were obtained in the current work around sample number 30 which yielded 178 ppm Cu and 158 ppm Ni. This section of anomalous results is approximately 80 to 90 metres north of the known mineralization and could reflect subsurface mineralization in that area.

## 8. RECOMMENDATIONS

As a follow-up to the sampling work done to date the following work program is recommended:

1. Expanded grid construction to the north and east of the mineralized zone and the humus anomaly.

2. Further humus sampling over the grid area to identify more zones of mineralization.

3. An I. P. survey over the project area to identify potential zones of disseminated copper-nickel sulphides similar to the known mineralization.

Contingent upon the results of the combined geochemical and geophysical work, a drill program could then be planned and implemented.

 P.O. #:

Samples submitted to our lab in Thunder Bay, ON.  
 This report was printed on 15-AUG-2000.

SAMPLE PREPARATION		
CHEMEX CODE	NUMBER SAMPLES	DESCRIPTION
201	11	Dry, sieve to -80 mesh
229	11	ICP - AQ Digestion charge

\* NOTE 1:

The 32 element ICP package is suitable for trace metals in soil and rock samples. Elements for which the nitric-aqua regia digestion is possibly incomplete are: Al, Ba, Be, Ca, Cr, Ga, K, La, Mg, Na, Sr, Ti, Tl, W.

ANALYTICAL PROCEDURES					
CHEMEX CODE	NUMBER SAMPLES	DESCRIPTION	METHOD	DETECTION LIMIT	UPPER LIMIT
2118	11	Ag ppm: 32 element, soil & rock	ICP-AES	0.2	100.0
2119	11	Al %: 32 element, soil & rock	ICP-AES	0.01	15.00
2120	11	As ppm: 32 element, soil & rock	ICP-AES	2	10000
557	11	B ppm: 32 element, rock & soil	ICP-AES	10	10000
2121	11	Ba ppm: 32 element, soil & rock	ICP-AES	10	10000
2122	11	Be ppm: 32 element, soil & rock	ICP-AES	0.5	100.0
2123	11	Bi ppm: 32 element, soil & rock	ICP-AES	2	10000
2124	11	Ca %: 32 element, soil & rock	ICP-AES	0.01	15.00
2125	11	Cd ppm: 32 element, soil & rock	ICP-AES	0.5	500
2126	11	Co ppm: 32 element, soil & rock	ICP-AES	1	10000
2127	11	Cr ppm: 32 element, soil & rock	ICP-AES	1	10000
2128	11	Cu ppm: 32 element, soil & rock	ICP-AES	1	10000
2150	11	Fe %: 32 element, soil & rock	ICP-AES	0.01	15.00
2130	11	Ga ppm: 32 element, soil & rock	ICP-AES	10	10000
2131	11	Hg ppm: 32 element, soil & rock	ICP-AES	1	10000
2132	11	K %: 32 element, soil & rock	ICP-AES	0.01	10.00
2151	11	La ppm: 32 element, soil & rock	ICP-AES	10	10000
2134	11	Mg %: 32 element, soil & rock	ICP-AES	0.01	15.00
2135	11	Mn ppm: 32 element, soil & rock	ICP-AES	5	10000
2136	11	Mo ppm: 32 element, soil & rock	ICP-AES	1	10000
2137	11	Na %: 32 element, soil & rock	ICP-AES	0.01	10.00

6. Instruction for cutting back credits that are not approved.

Some of the credits claimed in this declaration may be cut back. Please check (✓) in the boxes below to show how you wish to prioritize the deletion of credits:

- 1. Credits are to be cut back from the Bank first, followed by option 2 or 3 or 4 as indicated.
- 2. Credits are to be cut back starting with the claims listed last, working backwards; or
- 3. Credits are to be cut back equally over all claims listed in this declaration; or
- 4. Credits are to be cut back as prioritized on the attached appendix or as follows (describe):

Note: If you have not indicated how your credits are to be deleted, credits will be cut back from the Bank first, followed by option number 2 if necessary.

For Office Use Only

Received Stamp	Deemed Approved Date	Date Notification Sent
	Date Approved	Total Value of Credit Approved
	Approved for Recording by Mining Recorder (Signature)	

Personal information collected on this form is obtained under the authority of subsection 6 (1) of the Assessment Work Regulation 6/96. Under section 8 of the Mining Act, this information is a public record. This information will be used to review the assessment work and correspond with the mining land holder. Questions about this collection should be directed to a Provincial Mining Recorder, Ministry of Northern Development and Mines, 3rd Floor, 933 Ramsey Lake Road, Sudbury, Ontario, P3E 6B5.

2 20582

Table with 4 columns: Work Type, Units of work, Cost Per Unit of work, Total Cost. Rows include Labour: cutting lines and preparing grid; Collection of 41 samples; Assaying 41 samples G-32 pkg 41 humus samples; Assaying 4 samples G-15 pkg 4 humus samples; Associated Costs; Transportation Costs; Food and Lodging Costs; Total Value of Assessment Work \$830.56

Calculations of Filing Discounts:

- 1. Work filed within two years of performance is claimed at 100% of the above Total Value of Assessment Work.
2. If work is filed after two years and up to five years after performance, it can only be claimed at 50% of the Total Value of Assessment Work. If this situation applies to your claims, use the calculation below:

TOTAL VALUE OF ASSESSMENT WORK x 0.50 = Total \$ value of worked claimed.

Note:
- Work older than 5 years is not eligible for credit.
- A recorded holder may be required to verify expenditures claimed in this statement of costs within 45 days of a request for verification and/or correction/clarification. If verification and/or correction/clarification is not made, the Minister may reject all or part of the assessment work submitted.

Certification verifying costs:

I, Robert J. Fairservice, do hereby certify, that the amounts shown are as accurate as may reasonably be determined and the costs were incurred while conducting assessment work on the lands indicated on the accompanying

Declaration of Work form as Recorded Holder I am authorized to make this certification. (recorded holder, agent, or state company position with signing authority)

Dear Sir or Madam:

**Submission Number:** 2.20562

**Status**

**Subject: Transaction Number(s):** W0010.00080 Approval

---

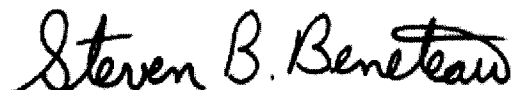

We have reviewed your Assessment Work submission with the above noted Transaction Number(s). The attached summary page(s) indicate the results of the review. **WE RECOMMEND YOU READ THIS SUMMARY FOR THE DETAILS PERTAINING TO YOUR ASSESSMENT WORK.**

If the status for a transaction is a 45 Day Notice, the summary will outline the reasons for the notice, and any steps you can take to remedy deficiencies. The 90-day deemed approval provision, subsection 6(7) of the Assessment Work Regulation, will no longer be in effect for assessment work which has received a 45 Day Notice. Allowable changes to your credit distribution can be made by contacting the Geoscience Assessment Office within this 45 Day period, otherwise assessment credit will be cut back and distributed as outlined in Section #6 of the Declaration of Assessment work form.

Please note any revisions must be submitted in DUPLICATE to the Geoscience Assessment Office, by the response date on the summary.

If you have any questions regarding this correspondence, please contact LUCILLE JEROME by e-mail at [lucille.jerome@ndm.gov.on.ca](mailto:lucille.jerome@ndm.gov.on.ca) or by telephone at (705) 670-5858.

Yours sincerely,
