2.18101

The purpose of this assessment work was to open up another area or ledge to quarry from. Having two or more opened ledges is a common practice with drive in style quarries, it allows for more flexibility to perform different quarrying functions at the same time. The assessment work was performed on claim # 1149700 (formerly claim # 1160896).

The work that was performed was stripping two areas of overburden. The two areas are located approximately 400 feet south of the existing working quarry on either side of the access road. The first area is located on the west side of the quarry access road and is approximately 15 feet wide by 50 feet long by 14 feet deep, reference sketch #1. The overburden was piled on the west side of the excavation. Some exposed ledge was visible at this location. The stone appeared to have the same color and crystal pattern as the initial quarry area. The second area is located on the east side of the quarry road and is approximately 50 feet wide by 50 feet long by 3 feet deep, reference sketch #1. The overburden was piled on the north end of the excavation. The stone from this site also appeared to have the same color and crystal pattern as the initial site.

A total of six days or 58.18 hours was spent removing the overburden from both sites. The project started on November 26 and was completed on December 2, 1997. The only piece of equipment used for this work was a John Deere 544B loader with a 2 yard bucket. There was no further cleaning of the stripped ledge, this will be completed the spring of 1998. No test holes were drilled or samples taken from either site. Quarrying in these locations should commence the spring of 1998.

The other assessment work completed was the restaking of the above mentioned claim. Approximately five hours, @ \$90.00/hr, was spent on restaking and application preparation for claim # 1149700. The work was started and completed on the 15th of November, 1997.

Re: Revisions to Claim Assessment

Dear Steve,

I would like to add to the technical support data I submitted to you this past December. Specifically, Sections 10(2)(a)(I) and 10(2)(b)(iii). Enclosed are lab results of granite samples taken from the Kenora location as well as an updated drawing.

The stone uncovered from the recent stripping is the same color and crystal structure as the granite we have been quarrying on the active ledge. The average absorption is at 0.16%, the average compressive strength is 20,400 psi and the average flexural strength is 1,200 psi. If you have any further questions, please call me at 320-685-4838.

Sincerely,

Brian D. Sjaheim

6. Instructions for cutting back credits that are not approved.

Some of the credits claimed in this declaration may be cut back. Please check (✓) in the boxes below to show how you wish to prioritize the deletion of credits:

- ☒ 1. Credits are to be cut back from the Bank first, followed by option 2 or 3 or 4 as indicated.
- ☐ 2. Credits are to be cut back starting with the claims listed last, working backwards; or
- ☐ 3. Credits are to be cut back equally over all claims listed in this declaration; or
- ☐ 4. Credits are to be cut back as prioritized on the attached appendix or as follows (describe):

Note: If you have not indicated how your credits are to be deleted, credits will be cut back from the Bank first, followed by option number 2 if necessary.

1. Work filed within two years of performance is claimed at 100% of the above Total Value of Assessment Work.
2. If work is filed after two years and up to five years after performance, it can only be claimed at 50% of the Total Value of Assessment Work. If this situation applies to your claims, use the calculation below:

TOTAL VALUE OF ASSESSMENT WORK **x 0.60 =** **Total \$ value of worked claimed**

- Work older than 5 years is not eligible for credit.
- A recorded holder may be required to verify expenditures claimed in this statement of costs within 45 days of a request for verification and/or correction/clarification. If verification and/or correction/clarification is not made, the Minister may reject all or part of the assessment work submitted.

I, Brian Sjaasheim, do hereby certify, that the amounts shown are as accurate as may
(Please print full name)
reasonably be determined and the costs were incurred while conducting assessment work on the lands indicated on
the accompanying Declaration of Work form as Brian Sjaasheim I am authorized
(Please enter agent, or claim company position with signing authority)
to make this certification.

Dear Sir or Madam:

Submission Number: 2.18101

Status

Subject: Transaction Number(s): W9810.00001 Approval After Notice

We have reviewed your Assessment Work submission with the above noted Transaction Number(s). The attached summary page(s) indicate the results of the review. **WE RECOMMEND YOU READ THIS SUMMARY FOR THE DETAILS PERTAINING TO YOUR ASSESSMENT WORK.**

If the status for a transaction is a 45 Day Notice, the summary will outline the reasons for the notice, and any steps you can take to remedy deficiencies. The 90-day deemed approval provision, subsection 6(7) of the Assessment Work Regulation, will no longer be in effect for assessment work which has received a 45 Day Notice.

Please note any revisions must be submitted in DUPLICATE to the Geoscience Assessment Office, by the response date on the summary.

If you have any questions regarding this correspondence, please contact Steve Beneteau by e-mail at benetest@epo.gov.on.ca or by telephone at (705) 670-5855.

Yours sincerely,
