

FEBRUARY 2021

Updated Mining Land Tenure Data Now Available

As part of our ongoing efforts to bring you one of the most comprehensive mining land administration systems in the world, we have updated the lease, patent and Mining Licence of Occupation (MLO) data in MLAS so you can better manage your mining land tenures and associated transactions.

MLAS now displays the lease, patent and MLO data that was current on May 21, 2020.

In addition to the updated mining land tenure data, land tenure holders and their agents can now see the following data fields when they view their land tenure information in MLAS:

- Rent/tax effective date
- Land registry office
- Long legal description
- Former lease number

Updates planned for early 2021:

- In the context of lease renewals, exploration and consultation reserve credits on the former lease will move over to the renewed lease.
- We are updating lease numbers on the MLAS Map Viewer, where applicable.
- Where a new lease has been issued, we are updating mining claims with a “Requested for Lease” status to “Leased.” Remaining exploration and consultation reserve credits on the mining claim(s) will move over to the new lease.
- Any changes made since May 21, 2020 to the lease, patent and MLO data will appear in MLAS.

What you need to know:

1. It is important to keep your client profile in MLAS current. Be aware the mailing address in your client profile is only related to correspondence in respect of unpatented mining claims. If a rent/tax billing address related to mining patents, mining leases and MLOs requires updating, please notify the ministry by email at mlas.ltau@ontario.ca, fax at (705) 670-5863, or mail at:

Mining Lands Administration System (MLAS)

FACT SHEET

FEBRUARY 2021

2. Report any discrepancies with mining land tenure ownership or status as well as missing or incorrect data. Please note mining land tenure data viewed from the MLAS Map Viewer contains limited details.
3. Property Identification Numbers (PINs), title documents and registered instruments affecting ownership and/or other interests relating to mining patents and mining leases can be obtained online through ONLAND (Ontario Land Registry Access) at www.onland.ca/ui/.
4. More frequent updates to the mining land tenure data are being planned.
