

THESE TERMS GOVERN YOUR USE OF THIS DOCUMENT

Your use of this electronic information product (“EIP”), and the digital data files contained on it (the “Content”), is governed by the terms set out on this page (“Terms of Use”). By opening the EIP and viewing the Content, you (the “User”) have accepted, and have agreed to be bound by, the Terms of Use.

EIP and Content: This EIP and Content is offered by the Province of Ontario’s *Ministry of Northern Development and Mines* (MNDM) as a public service, on an “as-is” basis. Recommendations and statements of opinions expressed are those of the author or authors and are not to be construed as statement of government policy. You are solely responsible for your use of the EIP and its Content. You should not rely on the Content for legal advice nor as authoritative in your particular circumstances. Users should verify the accuracy and applicability of any Content before acting on it. MNDM does not guarantee, or make any warranty express or implied, that the Content is current, accurate, complete or reliable or that the EIP is free from viruses or other harmful components. MNDM is not responsible for any damage however caused, which results, directly or indirectly, from your use of the EIP or the Content. MNDM assumes no legal liability or responsibility for the EIP or the Content whatsoever.

Links to Other Web Sites: This EIP or the Content may contain links, to Web sites that are not operated by MNDM. Linked Web sites may not be available in French. MNDM neither endorses nor assumes any responsibility for the safety, accuracy or availability of linked Web sites or the information contained on them. The linked Web sites, their operation and content are the responsibility of the person or entity for which they were created or maintained (the “Owner”). Both your use of a linked Web site, and your right to use or reproduce information or materials from a linked Web site, are subject to the terms of use governing that particular Web site. Any comments or inquiries regarding a linked Web site must be directed to its Owner.

Copyright: Canadian and international intellectual property laws protect the Content. Unless otherwise indicated, copyright is held by the Queen’s Printer for Ontario.

It is recommended that reference to the Content be made in the following form:

Azar, B. 2016. Geological, geochemical and geophysical data from the Attwood Lake area, Fort Hope greenstone belt, northwestern Ontario; Ontario Geological Survey, Miscellaneous Release—Data 334.

Use and Reproduction of Content: The EIP and the Content may be used and reproduced only in accordance with applicable intellectual property laws. *Non-commercial* use of unsubstantial excerpts of the Content is permitted provided that appropriate credit is given and Crown copyright is acknowledged. Any substantial reproduction of the Content or any *commercial* use of all or part of the Content is prohibited without the prior written permission of MNDM. Substantial reproduction includes the reproduction of any illustration or figure, such as, but not limited to graphs, charts and maps. Commercial use includes commercial distribution of the Content, the reproduction of multiple copies of the Content for any purpose whether or not commercial, use of the Content in commercial publications, and the creation of value-added products using the Content.

Publication Sales

Ministry of Northern Development and Mines

933 Ramsey Lake Rd., Level A3

Sudbury, Ontario P3E 6B5

Tel: 1-888-415-9845, ext. 5691 (toll-free inside Canada and the United States)

Tel: (705) 670-5691 (local calls)

Fax: (705) 670-5770

Users of OGS products are encouraged to contact those Aboriginal communities whose traditional territories may be located in the mineral exploration area to discuss their project.

Miscellaneous Release—Data 334

Geological, Geochemical and Geophysical Data from the Attwood Lake Area, Fort Hope Greenstone Belt, Northwestern Ontario

by B. Azar

This publication can be downloaded from

http://www.geologyontario.mndm.gov.on.ca/mndmaccess/mndm_dir.asp?type=pub&id=MRD334

This digital data release consists of geological information, geochemical (whole-rock and assay) data, magnetic susceptibility data and selected field photographs, collected in 2014, during bedrock geological mapping, at a scale of 1:50 000, in the Attwood Lake area in the Fort Hope greenstone belt. Also included are a previously published article and presentations to the public related to the project. This release comprises 308 photographs (*.jpg* files), 5 Microsoft® Excel® 2010 (*.xlsx*) files and 5 documents in portable document format (*.pdf*). These data augment Preliminary Map P.3800, *Precambrian Geology of the Attwood Lake Area, Fort Hope Greenstone Belt*; the marginal notes and the geological legend for this map are also provided.

Data are organized into 6 folders:

1. Field Data
2. Geochemistry
3. Geology
4. Geophysics
5. Photographs
6. Presentations and Publications

1. Field Data. This folder contains 2 Microsoft® Excel® 2010 (.xlsx) workbook files.

MRD334_Attwood Lake_Rock Descriptions-2014.xlsx contains 1 worksheet of field notes taken for each sample collected; the notes were recorded on the Trimble® handheld global positioning system (GPS) device. Notes have been edited to remove abbreviations and spelling errors. Some of the interpretations changed with geochemical information and additional review; these changes are not reflected in this document. Locations are provided as Universal Transverse Mercator (UTM) co-ordinates using North American Datum 1983 (NAD83), Zone 16.

MRD334_Attwood Lake_Structural Data-2014.xlsx consists of 2 worksheets that contain the structural measurements and related observations taken during the 2014 field season.

“Structural_data_Attwood” worksheet contains all of the station information, location, structure type, structure symbol, dip, azimuth and notes for each measurement taken. Locations are provided as UTM co-ordinates using NAD83, Zone 16.

“Structural_symbol_legend” worksheet provides a legend for all the symbols recorded in the column SYMBOL in the worksheet “Structural_data_Attwood”.

2. Geochemistry. This folder contains 1 Microsoft® Excel® 2010 (.xlsx) workbook file.

MRD334_Attwood Lake_Geochemistry.xlsx consists of 3 worksheets that contains the results of analyses performed at the Geoscience Laboratories (Geo Labs), Ontario Geological Survey, Sudbury. The methods used, lower detection limit for each method, and reported units for each method are included for each element (and oxide) listed. UTM co-ordinates are provided in NAD83, Zone 16.

“Whole rock geochemistry” worksheet contains 243 whole-rock geochemical and duplicate analyses from this study acquired from samples collected during the summer of 2014. The worksheet also contains location data (“Easting” and “Northing”), “Rock Name” and map code for each sample collected.

“Assay” worksheet contains 25 assay and duplicate analyses from this study acquired from samples collected during the summer of 2014. Sample descriptions are also provided. The worksheet also contains sample descriptions and location data (“Easting” and “Northing”) for each sample collected.

“Abbreviations” worksheet provides an explanation for the abbreviations and acronyms used in row 4 “Method” in the other 2 worksheets, and explains all additional abbreviations used in the workbook. Additional methods that were used in sample preparation are included here, but are not represented on the other 2 worksheets.

3. Geology. This folder contains 2 portable document format (.pdf) files, one of which is a publication associated with this project.

P3800_Legend.pdf is the general legend (rock codes) used as the base for Ontario Geological Survey Preliminary Map P.3800, *Precambrian Geology of the Attwood Lake Area, Fort Hope Greenstone Belt* (Azar, Ferguson and Mayer 2016). Material in the geochemistry workbook file are cross-referenced to map codes in the legend.

P3800_Marginal Notes.pdf provides additional information on the study area using a version of the marginal notes, with 2 figures and 2 tables, from Preliminary Map P.3800.

4. Geophysics. This folder contains 1 Microsoft® Excel® 2010 (.xlsx) file.

MRD334_Attwood Lake_Magnetic Susceptibility Data-2014.xlsx contains 2 worksheets.

“Mag sus data_Attwood-2014” worksheet provides magnetic susceptibility data from the study area collected during the summer of 2014.

Measurements were collected using an Exploranium® KT-10 magnetic susceptibility meter. Magnetic susceptibility is defined as the degree to which a substance can be magnetized and, in this case, is expressed as the ratio of the intensity of magnetization (k) to the ratio of the Earth’s magnetic field to magnetic field induced by the susceptibility meter. The readings (k) are expressed as 10^{-3} times the SI unit for susceptibility and are dimensionless. The minimum value that can be recorded by the meter is 0.001×10^{-3} SI units; the largest value is 999×10^{-3} SI units. Sample location information is given in UTM co-ordinates, NAD83, Zone 16.

“Pick Lists, Notes” worksheet provides additional information about the pick-lists for fields (“Geological Province”, “Meter Number”, “UTM Zone”, “Rock Type Pick List”, “Rock Types Corresponding to Pick List”, “Dike Swarm Name”, “Metamorphic Grade”) used in the workbook.

5. Photographs. This folder contains 308 field photographs (as .jpg files) and 1 Microsoft® Excel® 2010 (.xlsx) file. The photographs were taken during the summer of 2014 as part of the mapping project.

MRD334_Attwood Lake_Photo Captions.xlsx provides the photograph number, station number, location, the reason for taking the photograph (“Type”), a brief photo description and identifies the scale used in the photo. Photo file names for the .jpg files are based on station location, e.g., 14BA045P02 is photograph number 2 (“P02”), from station BA045 in 2014. Station location information is given in UTM co-ordinates, NAD83, Zone 16.

6. Presentations and Publications. This folder contains 3 portable document format (.pdf) files, one of which is a publication associated with this project.

MRD334_Azar_NWOMMS-2015_presentation.pdf is from a presentation entitled “Geology and Mineral Potential of the Attwood Lake Area” given at the Northwestern Ontario Mines and Minerals Symposium in Thunder Bay, Ontario, on April 15, 2015. The presentation highlighted the mineral potential of the Attwood Lake area.

MRD334_Azar_OEGS-NWOMMS-2014-2015_poster.pdf is part of the larger poster, entitled “Precambrian Bedrock Mapping Projects in the Far North”, presented at the Ontario Exploration and Geoscience Symposium in Sudbury, Ontario, on November 4–5, 2014, and again at the Northwestern Ontario Mines and Minerals Symposium in Thunder Bay, Ontario, on April 14–15, 2015.

MRD334_SoFW2015-04_Azar_Ferguson.pdf is an article (Azar and Ferguson 2014), published in the Ontario Geological Survey *Summary of Field Work and Other Activities, 2014* volume, which, written immediately following field work in the Attwood Lake area during the summer of 2014, outlined the activities and results of that field work.
